

PLAYGROUND PROBLEM SOLVING

Esqueda students are taught simple problem solving strategies to help them solve playground problems on their own. This method should be discussed and even used at home for reinforcement. The method is called Walk, Talk, or Rock.

Walk

If a student does not agree with a situation, the student can just walk away and play somewhere else.

Talk

The children having the dispute will step out of the way and try to reach an agreeable decision that they are both happy with (a win/win situation).

Rock

Many playground situations can be solved by playing a single game of paper, scissors, rock. Arguments such as who got to the ball, court, drinking fountain, line, etc. first can be solved using this method. This method can also be used if the judge did not see what happened in a game.

Reminders: No chasing, no play fighting

Rocks, balls or anything else should not be thrown out of the yard, at any building or person!

No climbing on trees or fences.

All personal sports items or games are to be kept at home

Have fun, be safe and be kind.

How to Use Problem-based Learning in the Classroom Robert Delisle, Association for Supervision and Curriculum Development, 1997 Engaging and motivating students especially the least motivated learners is a daily challenge But with the process of problem based learning PBL any teacher can create an exciting active classroom where students themselves eagerly build problem solving skills while learning the content necessary to apply them With problem based learning students work begins with an ill defined problem Key to this problem is how it explicitly links something important in students daily lives to the classroom This motivational feature is vital as students define the what where and how of resolving the problem situation Problem based learning may sound potentially chaotic and haphazard but it rests on the firm foundation of a teacher s work behind the scenes The teacher develops a problem long before students see it specifically choosing the skills and content the problem will emphasize and matching those to curriculum and standards Though a PBL problem will have no right answer the teacher structures the experience so that specific learning takes place as students generate the problem solving steps research issues and produce a final product The teacher guides without leading assists without directing
