Race And Ethnicity In Research Methods:

Rethinking Race and Ethnicity in Research Methods John H Stanfield II, 2016-06-03 This collection of original work demonstrates the new ways in which particular research methodologies are used valued and critiqued in the field of race and ethnic studies Contributing authors discuss the ways in which their personal and professional histories and experiences lead them to select and use particular methodologies over the course of their careers They then provide the intellectual histories strengths and weaknesses of these methods as applied to issues of race and ethnicity and discuss the ethical practical and epistemological issues that have influenced and challenged their methodological principles and applications Through these rigorous self examinations this text presents a dynamic example of how scholars engage both research methodologies and issues of social justice and ethics This volume is a successor to Stanfield's landmark *Race and Ethnicity in Research Methods*

Race and Ethnicity in Research Methods John H. Stanfield (II.), 1993-05-05 Studying across race and ethnic lines creates many problems for the researcher These problems involve practical strategic ethical and epistemological questions alike The contributors to *Race and Ethnicity in Research Methods* most of them scholars of color examine the array of methods used in quantitative qualitative and comparative historical research to show how ethnic sensitive research can best be carried out Among the methodological traditions discussed are survey research demography testing and assessment ethnography discourse analysis comparative methods and archival research Of interest not only to the researcher and instructor of race and ethnic studies this volume should be of equal value to social scientists interested in teaching or practicing any form of research that needs to properly address issues of race and ethnicity This comprehensive guide will be an invaluable resource for anyone who teaches and or is engaged in research in the field of race and ethnicity Behavioural Psychotherapy I highly recommend this volume for those researchers who are genuinely interested in producing better and more creative solutions to some of the issues and problems involving racial and ethnic minority groups *Journal of Marketing Research* In *Race and Ethnicity in Research Methods* John H Stanfield II and Rutledge M Dennis call for serious and rigorous treatment of the subject which sheds the journalistic style narrow focus and cultural bias of much of past research They bring together 13 articles that reveal the rich diversity of methods available for researching ethnic groups and ethnic relations There is a healthy dose of multidisciplinary The book is essential for U S race and ethnic researchers who seek to avoid the narrowness and pitfalls of much past research I would recommend this book for research seminars on race and ethnic relations specifically and for general methodology courses which seek to present the diversity of approaches to sociological issues *Contemporary Sociology* This book contains essays that will stimulate much discussion among scholars while providing practical ethical and strategic methodological considerations for conducting research across racial and ethnic lines *Nursing Research* [Researching 'Race' and Ethnicity](#) Yasmin Gunaratnam, 2003-09-03 Drawing upon ethnographic research the author uses detailed case study examples to show how race and ethnicity is produced negotiated and resisted in qualitative

research encounters **Critical Issues in Anti-racist Research Methodologies** George Jerry Sefa Dei, Gurpreet Singh Johal, 2005 Anti racism studies have blossomed over the years with scholarship and political work reinforcing each other to cement anti racist change But how do we understand anti racist research How is anti racist research methodology different from other methods of research investigation What are the principles of anti racism research This edited collection attempts to provide some answers by bringing together works that examine the perils and desires of anti racist research with a particular focus on the notion of difference and a serious consideration of the race gender class and sexuality intersections implications of educational research *Handbook of Research Methods in Public Administration, Second Edition* Gerald J.
