Selected Essays Of Gottfried Haberler:

Selected Essays of Gottfried Haberler Gottfried Haberler, 1985 Gottfried Haberler's contributions to the field of international trade and finance began in the 1920s with a seminal paper on comparative costs. His continuing contributions to open economy analysis, development, business cycles, and inflation, the theory of money, and rational expectations are highlighted in this selection of 27 essays spanning the years 1925 to 1980. The essays are divided into five major sections representing the subdisciplines of Haberler's most significant work. The first section on international trade contains his work on comparative costs, comparative advantage, and the location of production and international trade. A section on international finance deals with the state of the international monetary system under conditions of world recession, control over international reserves, U.S. balance of payments policy, currency depreciation, and the terms of trade and transfer and price movements. The topic of inflation and business cycles is covered in the third section with essays on income policies, stagflation, and the Great Depression, and the international transmission of inflation. Section four deals with economic development, and the concluding section contains essays on the theory of money and general macroeconomic theory. Several articles are translated here for the first time, and there is a complete bibliography of Haberler's work up to 1980. With original contributions from a stellar cast, the volumes provide economists, especially those interested in macroeconomics and the history of economic thought, with an in-depth analysis of Harvard economics. **The Canon in the History of Economics** Michalis Psalidopoulos, 2000-03-09 The construction and the role of the economic canon, the accepted list of great works and great authors, has been the subject of much recent literary and historical debate. By contrast, the concept of the canon has been largely dormant in the study of the history of economics, with the canonical sequence of Smith, Ricardo, Marx, etc. constituting the [Revised and Enlarged Edition](#) Charles P. Kindleberger, 1986-04-22 The World in Depression is the best book on the subject, and the subject in turn is the economically decisive decade of the century so far. Economic Thinkers David A. Dieterle, 2013-08-08 Who are the individuals whose novel ideas, writings and philosophies have influenced economics throughout history and in doing so have helped change the world? This encyclopedia provides a readable study of economics by examining the great economists themselves. This book presents biographies of 200 economic thinkers throughout history, supplying a one-stop reference about the men and women whose ideas, writings and philosophies created the foundation of our current understanding of economics. Depicting their subjects within the contexts of history, development, economics and econometrics, these biographies provide an insightful overview of the world of economics through the economists of significance and the many subdisciplines, topics, eras and philosophies they represent. *Economic Thinkers: A Biographical Encyclopedia* begins by describing economic thinkers in ancient Greece and Rome, moves through history to cover economists in the 15th through 19th centuries and addresses economic theory in the 20th century and the modern era. Written to be easily accessible and highly readable, the work will appeal to students, scholars, general readers and anyone interested in learning about the historical and philosophical foundation of economics.

The Open Economy Macromodel: Past, Present and Future Arie Arnon, Warren Young, 2012-12-06 The impetus for the conference that was the basis for this volume emanated from the influence of two brilliant minds: Egon Sohmen and Adam Klug, who both died at an early age, leaving their families and the professions of economics and economic history with major voids. In the course of research on the origins of Open Economy Macroeconomics, the significant contributions of Egon Sohmen came to the fore. After correspondence with some of those involved in the early development of the Open Economy Macromodel, we turned to Adam Klug for his views on the matter as he had dealt with the history of intertemporal trade models in his Ph.D. thesis. And it was Adam who suggested the idea of a conference bringing together economists and economic historians. At this point, we want to acknowledge the very generous grant from the Egon Sohmen Foundation and the active participation of Dr. Helmut Sohmen and Mrs. Renee Sohmen at the conference. We also want to thank Prof. Sir Aaron Klug, Nobel Laureate, and the Klug family for their support and the financial contribution of the Adam Klug Memorial Lecture Fund at Ben-Gurion University. Other institutions that contributed to the conference were the Gianni Foundation, Bank of Israel, University of North Carolina, Department of Economics, Faculty of Social Science, and Aharon Meir Center for Banking, Bar-Ilan University, Department of Economics and Faculty of Social Science, Ben-Gurion University of the Negev.
