Séminaire d'Analyse P. Lelong - P. Dolbeault - H. Skoda P. Lelong, P. Dolbeault, H. Skoda, 2006-11-14 *Entire Functions of Several Complex Variables* Pierre Lelong, Lawrence Gruman, 2012-12-06 Entire functions of several complex variables constitute an important and original chapter in complex analysis The study is often motivated by certain applications to specific problems in other areas of mathematics partial differential equations via the Fourier Laplace transformation and convolution operators analytic number theory and problems of transcendence or approximation theory just to name a few What is important for these applications is to find solutions which satisfy certain growth conditions The specific problem defines inherently a growth scale and one seeks a solution of the problem which satisfies certain growth conditions on this scale and sometimes solutions of minimal asymptotic growth or optimal solutions in some sense For one complex variable the study of solutions with growth conditions forms the core of the classical theory of entire functions and historically the relationship between the number of zeros of an entire function $f(z)$ of one complex variable and the growth of $|f|$ or equivalently $\log |f|$ was the first example of a systematic study of growth conditions in a general setting Problems with growth conditions on the solutions demand much more precise information than existence theorems The correspondence between two scales of growth can be interpreted often as a correspondence between families of bounded sets in certain Frechet spaces However for applications it is of utmost importance to develop precise and explicit representations of the solutions *Seminaire D'Algebre Paul Dubreil Et Marie-Paule Malliavin*, 1986 *Séminaire d'Analyse P. Lelong - P. Dolbeault - H. Skoda* Pierre Lelong, Pierre Dolbeault, Henri Skoda, 1986-06 *Proceedings - Séminaire d'algèbre Paul Dubreil et Marie-Paule Malliavin*, 1986 **Trudy i materialy nauchnykh kongressov i soveshchaniï, opublikovannye za rubezhom v ... gg**, 1982 **Trudy i Materialy Nauchnykh Kongressov i Soveshchaniï**, 1982 *Zeros and Growth of Entire Functions of Several Variables, the Complex Monge-Ampère Operator and Some Related Topics* Xing Yang, 1992 *Serials Catalog* Iowa State University. Library, 1990 **Proceedings of the International Congress of Mathematicians** Ichiro Satake, 1992-01-05 These proceedings start with the official report of the Congress given in the front pages a list of donors and a list of registered participants as well as the reports of the opening and closing ceremonies The main body of the proceedings includes the papers presented by the 15 plenary speakers and 139 invited speakers selected by the Programm Committee These volumes are rounded off by the reports of the works of the four fields medalists V G Drinfeld V F R Jones S Mori E Witten and the winner of the Rolf Nevanlinna Prize A A Razborov **Proceedings of the International Congress of Mathematicians, August 21-29, 1990, Kyoto, Japan** Ichirō Satake, 1991 *Pluripotential Theory* Maciej Klimek, 1991 Pluripotential theory is a recently developed non linear complex counterpart of classical potential theory Its main area of application is multidimensional complex analysis The central part of the pluripotential theory is occupied by maximal plurisubharmonic functions and the generalized complex Monge Ampere operator The interplay

between these two notions provides the focal point of this monography which contains an account of the developments from the large volume of recent work in this area The substantial proportion of this volume devoted to classical properties of subharmonic and plurisubharmonic functions makes the pluripotential theory available to a wide audience of analysts
