SEMINAR ON SCIENTIFIC COMPUTATION

**A fourth-order conservative semi-Lagrangian finite volume WENO scheme
without operator splitting for kinetic and fluid simulations**

by

Prof. Jianxian QIU

School of Mathematical Sciences and Fujian Provincial Key Laboratory of Mathematical
Modeling and High-Performance Scientific Computing, Xiamen University

Abstract

In this presentation, we present a fourth-order conservative semi-Lagrangian (SL) finite volume (FV) weighted essentially non-oscillatory (WENO) scheme without operator splitting for two-dimensional linear transport equations with applications of kinetic models including the nonlinear Vlasov-Poisson system, the guiding center Vlasov model and the incompressible Euler equation in the vorticity-stream function formulation. To achieve fourth-order accuracy in space, two main ingredients are proposed in the SL FV formulation. Firstly, we introduce a so-called cubic-curved quadrilateral upstream cell and applying an efficient clipping method to evaluate integrals on upstream cells. Secondly, we construct a new WENO reconstruction operator, which recovers a P3 polynomial from neighboring cell averages. Mass conservation is accomplished with the mass conservative nature of the reconstruction operator and the SL formulation. A positivity-preserving limiter is applied to maintain the positivity of the numerical solution wherever appropriate. For nonlinear kinetic models, the SL scheme is coupled with a fourth-order Runge-Kutta exponential integrator for high-order temporal accuracy. Extensive bench marks are tested to verify the designed properties.

Date : 31 May 2023 (Wednesday)

Time : 4:00pm – 5:00pm

Venue : Room 5510 (Lifts 25/26)

All are Welcome!

Seminar On Scientific Computation Novemb:

Seminar on Scientific Computation, November 1949 Cuthbert Corwin Hurd, Franklin Institute (Philadelphia, Pa.). Library, International Business Machines Corporation, 1950 *Selected Papers from the Second Conference on Parallel Processing for Scientific Computing* Charles William Gear, Robert G. Voigt, 1987-01-01 Proceedings Parallel Computing

Monte Carlo Methods Malvin H. Kalos, Paula A. Whitlock, 2009-06-10 This introduction to Monte Carlo methods seeks to identify and study the unifying elements that underlie their effective application Initial chapters provide a short treatment of the probability and statistics needed as background enabling those without experience in Monte Carlo techniques to apply these ideas to their research The book focuses on two basic themes The first is the importance of random walks as they occur both in natural stochastic systems and in their relationship to integral and differential equations The second theme is that of variance reduction in general and importance sampling in particular as a technique for efficient use of the methods Random walks are introduced with an elementary example in which the modeling of radiation transport arises directly from a schematic probabilistic description of the interaction of radiation with matter Building on this example the relationship between random walks and integral equations is outlined The applicability of these ideas to other problems is shown by a clear and elementary introduction to the solution of the Schrödinger equation by random walks The text includes sample problems that readers can solve by themselves to illustrate the content of each chapter This is the second completely revised and extended edition of the successful monograph which brings the treatment up to date and incorporates the many advances in Monte Carlo techniques and their applications while retaining the original elementary but general approach

Modern Mathematics for the Engineer: First Series Edwin F. Beckenbach, 2013-09-03 This volume and its successor focus on material relevant to solving mathematical problems regularly confronted by engineers Volume One's three part treatment covers mathematical models probabilistic problems and computational considerations 1956 edition **The Computer from Pascal to von Neumann** Herman H. Goldstine, 2008-09-02 In 1942 Lt Herman H Goldstine a former mathematics professor was stationed at the Moore School of Electrical Engineering at the University of Pennsylvania It was there that he assisted in the creation of the ENIAC the first electronic digital computer The ENIAC was operational in 1945 but plans for a new computer were already underway The principal source of ideas for the new computer was John von Neumann who became Goldstine's chief collaborator Together they developed EDVAC successor to ENIAC After World War II at the Institute for Advanced Study they built what was to become the prototype of the present day computer Herman Goldstine writes as both historian and scientist in this first examination of the development of computing machinery from the seventeenth century through the early 1950s His personal involvement lends a special authenticity to his narrative as he sprinkles anecdotes and stories liberally through his text **Predicting the Winner** Ira Chinoy, 2024-05 Winner of the Ray Hiebert History of Journalism Published Work Award The history of American elections changed profoundly on the night of

November 4 1952 An outside the box approach to predicting winners from early returns with new tools computers was launched live and untested on the newest medium for news television Like exhibits in a freak show computers were referred to as electronic brains and mechanical monsters Yet this innovation would help fuel an obsession with numbers as a way of understanding and shaping politics It would engender controversy down to our own time And it would herald a future in which the public square would go digital The gamble was fueled by a crisis of credibility stemming from faulty election night forecasts four years earlier in 1948 combined with a lackluster presentation of returns What transpired in 1952 is a complex tale of responses to innovation which Ira Chinoy makes understandable via a surprising history of election nights as venues for rolling out new technologies refining methods of prediction and providing opportunities for news organizations to shine In *Predicting the Winner* Chinoy tells in detail for the first time the story of the 1952 election night a night with continuing implications for the way forward from the dramatic events of 2020 21 and for future election nights in the United States

Mathematical Methods of Operations Research Thomas L. Saaty, 2004-01-01 The first graduate level text devoted to the subject this classic offers a concise history and overview of methods as well as an excellent exposition of the mathematical foundations underlying classical operations research procedures It begins with a review of historical scientific and mathematical aspects examples and ideas related to classical methods of forming models introduce discussions of optimization game theory applications of probability and queuing theory Carefully selected exercises illustrate important and useful ideas This text is an ideal introduction for students to the basic mathematics of operations research as well as a valuable source of references to early literature on operations research 1959 edition *Computerworld*, 1986-10-27 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network

Monte Carlo George Fishman, 2013-03-09 This book provides an introduction to the Monte Carlo method suitable for a one or two semester course for graduate and advanced undergraduate students in the mathematical and engineering sciences It also can serve as a reference for the professional analyst In the past my inability to provide students with a single source book on this topic for class and for later professional reference had left me repeatedly frustrated and eventually motivated me to write this book In addition to focused accounts of major topics the book has two unifying themes One concerns the effective use of information and the other concerns error control and reduction The book describes how to incorporate information about a problem into a sampling plan in a way that reduces the cost of estimating its solution to within a specified error bound Although exploiting special structures to reduce cost long has been a hallmark of the Monte Carlo method the proven sity of users of the method to discard useful information because it does not fit traditional textbook models repeatedly has impressed me The present account aims at reducing the impediments to integrating this information Errors both statistical and computational abound in

every Monte Carlo sampling experiment and a considerable methodology exists for controlling them **Nuclear Science Abstracts** ,1973 *Newsletter* University of Michigan Computing Center,1980 *Future Energy Conferences and Symposia* ,1994 Bibliography on the Use of IBM Machines in Science, Statistics, and Education Watson Scientific Computing Laboratory,1954 The Origins of Digital Computers B. Randell,2012-12-06 My interest in the history of digital computers became an active one when I had the fortune to come across the almost entirely forgotten work of PERCY LUDGATE who designed a mechanical program controlled computer in Ireland in the early 1940s I undertook an investigation of his life and work during which I began to realise that a large number of early developments which we can now see as culminating in the modern digital computer had been most undeservedly forgotten Hopefully historians of science some of whom are now taking up the subject of the development of the computer and accumulating valuable data particularly about the more recent events from the people concerned will before too long provide us with comprehensive analytical accounts of the invention of the computer The present book merely aims to bring together some of the more important and interesting written source material for such a history of computers Where necessary papers have been translated into English but every attempt has been made to retain the flavour of the original and to avoid possibly misleading use of modern computing terminology Numerical Methods of Reactor Analysis Melville Jr. Clark,2012-12-02 Nuclear Science and Technology Volume 3 Numerical Methods of Reactor Analysis presents the numerical analysis frequently used in the nuclear reactor field This book discusses the numerical approximation for the multigroup diffusion method which results in simple algebraic equations Organized into six chapters this volume starts with an overview of the simplified formulation of linear algebra by defining the matrices and operations with matrices This text then discusses the properties of special matrices and reviews the elementary properties of finite difference equations Other chapters consider a variety of methods of obtaining numerical solutions to the approximating equations The final chapter deals with Monte Carlo method which is a statistical method for solving statistical or deterministic problems This book is a valuable resource for nuclear engineers Students at the graduate level who had an introductory course in reactor physics and a basic course in differential equations will also find this book useful NBS-INA, the Institute for Numerical Analysis, UCLA 1947-1954 Magnus Rudolph Hestenes,1991

Proceedings of the Annual Statistical Engineering Symposium United States. Army. Chemical Corps. Engineering Agency,1955 **Proceedings, Seminar on Scientific Computation, November, 1949** International Business Machines Corporation,1950 Bulletin ,1978 **Boundary Value Problems of Heat Conduction** M. Necati Ozisik,2002-01-01 Intended for first year graduate courses in heat transfer including topics relevant to aerospace engineering and chemical and nuclear engineering this hardcover book deals systematically and comprehensively with modern mathematical methods of solving problems in heat conduction and diffusion Includes illustrative examples and problems plus helpful appendixes 134 illustrations 1968 edition

As recognized, adventure as well as experience approximately lesson, amusement, as without difficulty as contract can be gotten by just checking out a books **Seminar On Scientific Computation Novemb** furthermore it is not directly done, you could take on even more something like this life, on the subject of the world.

We offer you this proper as well as easy mannerism to get those all. We give Seminar On Scientific Computation Novemb and numerous books collections from fictions to scientific research in any way. along with them is this Seminar On Scientific Computation Novemb that can be your partner.

Seminar On Scientific Computation Novemb Introduction

In the digital age, access to information has become easier than ever before. The ability to download Seminar On Scientific Computation Novemb has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Seminar On Scientific Computation Novemb has opened up a world of possibilities. Downloading Seminar On Scientific Computation Novemb provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Seminar On Scientific Computation Novemb has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Seminar On Scientific Computation Novemb. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Seminar On Scientific Computation Novemb. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Seminar On Scientific Computation Novemb, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Seminar On Scientific Computation Novemb

has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About Seminar On Scientific Computation Novemb Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Seminar On Scientific Computation Novemb is one of the best book in our library for free trial. We provide copy of Seminar On Scientific Computation Novemb in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Seminar On Scientific Computation Novemb. Where to download Seminar On Scientific Computation Novemb online for free? Are you looking for Seminar On Scientific Computation Novemb PDF? This is definitely going to save you time and cash in something you should think about.
