SEMIOTICS:
An Introductory Anthology

Edited with Introductions by Robert E. Innis

Charles Morris once said that the concept of sign may prove as fundamental to the sciences of men as the concept of atom has been to the physical sciences or the cell for biology. What is a sign? Why are there signs? Where do signs come from? How many types and kinds of signs are there? What is the basis for their classification? What are their respective powers? What are their uses? Semiotics deals with all these questions and more. It is perhaps one of the most exciting contemporary intellectual developments. The texts in this volume are *the* classic statements in semiotics and touch on a vast set of problems and themes—philosophical, aesthetic, literary, cultural, biological, anthropological, and so on. Authors represented are: Charles Sanders Peirce, Ferdinand de Saussure, V. N. Vološinov, Karl Bühler, Susanne K. Langer, Claude Lévi-Strauss, Gregory Bateson, Roman Jakobson, Charles Morris, Roland Barthes, Meyer Schapiro, Émile Benveniste, Umberto Eco, René Thom, and Thomas A. Sebeok.

ROBERT E. INNIS, Professor of Philosophy at the University of Lowell, has published many articles in philosophy, semiotics, and social and cultural theory and is the author of *Karl Bühler: Semiotic Foundations of Language Theory* (Plenum) and the translator of *The Central Texts of Ludwig Wittgenstein*, by Gerd Brand (Basil Blackwell).
