Promoting Academic Readiness for African American Males with Dyslexia Shawn Anthony Robinson, Corey Thompson, 2019-11-13 This timely book tackles underlying issues that see disproportionate numbers of African American males with dyslexia undiagnosed, untreated and falling behind their peers in terms of literacy achievement. Considering factors including dialectic linguistic difference, limited phonological awareness and the intersectionality of gender, language and race, the studies included in this volume illustrate how classroom practices at preschool and elementary levels are failing to support students at risk of reading and writing difficulties. Promoting Academic Readiness for African American Males with Dyslexia shows that it is possible to provide every girl and boy and particularly African American boys with effective support and appropriate interventions enabling them to read at a level that is conducive to ongoing academic performance and success. This argues that the authors of this volume is vital to the social, emotional, moral and intellectual development of our society. This edited volume was originally published as a special issue of Reading Writing Quarterly: Overcoming Learning Difficulties. It will be of great interest to graduate and postgraduate students, researchers and academics in the field of African American Education, Educational Equity, Race studies, Multiple learning difficulties and Literacy development.
