Anime's Knowledge Cultures Jinying Li, 2024-03-12 Unlocking the technosocial implications of global geek cultures Why has anime a low tech medium from last century suddenly become the cultural new cool in the information age Through the lens of anime and its transnational fandom Jinying Li explores the meanings and logics of geekdom as one of the most significant sociocultural groups of our time In Anime s Knowledge Cultures Li shifts the center of global geography in knowledge culture from the computer boys in Silicon Valley to the anime fandom in East Asia Drawing from film studies animation studies media theories fan studies and area studies she provides broad cultural and theoretical explanations of anime s appeal to a new body of tech savvy knowledge workers and consumers commonly known as geeks otaku or zhai Examining the forms techniques and aesthetics of anime as well as the organization practices and sensibilities of its fandom Anime s Knowledge Cultures is at once a theorization of anime as a media environment as well as a historical and cultural study of transnational geekdom as a knowledge culture Li analyzes anime culture beyond the national and subcultural

frameworks of Japan or Japanese otaku instead theorizing anime's transnational transmedial network as the epitome of the postindustrial knowledge culture of global geekdom. By interrogating the connection between the anime boom and global geekdom, Li reshapes how we understand the meanings and significance of anime culture in relation to changing social and technological environments.

Mechademia 3 Frenchy Lunning, 2014-11-01. Dramatic advances in genetics, cloning, robotics, and nanotechnology have given rise to both hopes and fears about how technology might transform humanity. As the possibility of a posthuman future becomes increasingly likely, debates about how to interpret or shape this future abound. In Japan, anime and manga artists have for decades been imagining the contours of posthumanity, creating dazzling and sometimes disturbing works of art that envision a variety of human/nonhuman hybrids: biological, mechanical, human/animal, and human/monster. Anime and manga offer a constellation of posthuman prototypes whose hybrid natures require a shift in our perception of what it means to be human.

Limits of the Human, the third volume in the *Mechademia* series, maps the terrain of posthumanity using manga and anime as guides and signposts to understand how to think about humanity's new potentialities and limits. Through a wide range of texts, the folklore-inspired monsters that populate Mizuki Shigeru's manga *Japan's Gothic Lolita*, subculture Tezuka Osamu's original cyborg hero Atom, and his manga version of Fritz Lang's *Metropolis*, along with Tomo Katsuhiro's 2001 anime film adaptation *The Robot*, anime *Gundam*, and the notion of the uncanny in *Ghost in the Shell 2: Innocence*, among others, the essays in this volume reject simple human/nonhuman dichotomies and instead encourage a provocative rethinking of the definitions of humanity along entirely unexpected frontiers.

The (Un)Certain Future of Empathy in Posthumanism, Cyberculture and Science Fiction Elsa Bouet, 2019-01-04. This volume was first published by Interdisciplinary Press in 2015. This volume investigates the future of empathy as contemplated by posthumanism, cyberculture, and science fiction. As humanity increasingly networks and communicates online, the reconfiguration of human communities through the removal and immediacy of the body challenges traditional notions of humanity and human capacity for empathy. The impact of cyberculture and posthumanism on humanity and its capacity for empathy is here assessed through research in literature, films, neuroscience, anthropology, and philosophy. This volume addresses the centrality of the body to human interactions and assesses how intrinsic it is to the defining of the human. The exploration of posthuman narratives which display futuristic bodily modifications also engages with the anxieties and hopes for the future of human empathy. Research in dystopian narratives shows that these anxieties are also expressed without the tropes of bodily modifications and that ideological distancing creates the conditions necessary for a lack of empathy towards otherness.
