Series Of Proceedings And Reports Challenges In African Hydrology And Water:

Hydrology in the Humid Tropic Environment Arnold Ivan Johnson, Carlos A. Fernández-Jáuregui, 1998 Selected Water Resources Abstracts , 1986 **Fluoride in Drinking-water** John Kirtley Fawell, Kenneth Bailey, World Health Organization, 2006 Fluoride is known to occur at elevated concentration in a number of parts of the world where it can be a significant cause of disease The primary focus of this book is the prevention of adverse health effects from excessive levels of fluoride in drinking water The book fills the urgent need identified for updating the WHO Guidelines for Drinking water Quality for information on the occurrence of fluoride its health effects ways of reducing excess levels and methods for analysis of fluoride in water The draft document produced by a working group of experts convened to consider protection from fluoride and its control was issued for extensive review and consultation The resultant book which incorporates the comments received was further peer reviewed by experts in developed and developing countries It is aimed at a wide range of individuals including health workers and sanitary engineers who may require a broad introduction to the subject with more detailed guidance in some specific areas Fluoride in Drinking water will be an invaluable reference source for all those concerned with the management of drinking water containing fluoride and the health effects arising from its consumption including water sector managers and practitioners as well as health sector staff at policy and implementation levels It will also be of interest to researchers students development workers and consultants *Eastern and Southern Africa* Debby Potts, T.A.S. Bowyer-Bower, 2016-02-04 A unique and comprehensive introduction to contemporary development issues in East and Southern Africa and represents a significant departure from the often descriptive approach adopted by existing regional and development texts on African regions Each contribution is carefully chosen to highlight the theoretical basis to development issues and the practical problems of implementing development plans in this vital subregion Overall this produces comprehensive and balanced coverage of historical economic political and social issues The twin issues of globalisation and modernisation give the book a clear focus Environmental Health Perspectives , 1990 The Agricultural Groundwater Revolution Mark Giordano, Karen G. Villholth, 2007 While addressing the issues of using groundwater in agriculture for irrigation in the developing world this book discusses the problems associated with the degradation and overexploitation of using it It explores the practiced and potential methods for its management in the context of agricultural development **Hydrological Extremes** Lars Gottschalk, 1999 **Urban Groundwater Pollution** David Lerner, 2003-01-01 More than 50% of the world's population already live in cities and the proportion is rising extremely rapidly towards developed country levels of more than 90% Groundwater from wells is the major source of water supply for many of these cities however groundwater is polluted by the cities that overlie it and sewerage systems are often

Freshwater Challenges of South Africa and its Upper Vaal River Anja du Plessis, 2017-02-07 This book promotes better understanding and awareness of South Africa's significant water problems by describing the country's and especially the

Upper Vaal River's water resources It is a go to book for students professionals and regular citizens when information is required regarding the country's and more specifically the Upper Vaal River's freshwater resources It highlights the major problems and risks which need to be addressed and give a realistic and true representation of the current water affairs

Selected Water Resources Abstracts ,1986 Bibliography and Index of Geology ,1985 **Applied Hydrogeology of Fractured Rocks** B.B.S. Singhal †,R.P. Gupta,2013-11-11 Hydrology is a topical and growing subject as the earth's water resources become scarcer and more vulnerable Although more than half the surface area of continents is covered with hard fractured rocks there has until now been no single book available dealing specifically with fractured rock hydrogeology This book deals comprehensively with the fundamental principles for understanding these rocks as well as with exploration techniques and assessment It also provides in depth discussion of structural mapping remote sensing geophysical exploration GIS field hydraulic testing groundwater quality and contamination geothermal reservoirs and resources assessment and management Hydrogeological aspects of various lithology groups including crystalline rocks volcanic rocks carbonate rocks and clastic formations are dealt with separately using and discussing examples from all over the world Applied Hydrogeology of Fractured Rocks will be an invaluable reference source for postgraduate students researchers exploration scientists and engineers engaged in the field of groundwater development in fractured rock areas The United Nations World Water Development Report UNESCO World Water Assessment Programme, Van der Gun, Jac,2012-03-26 **Climate Change 2001: Impacts, Adaptation, and Vulnerability** Intergovernmental Panel on Climate Change. Working Group II.,2001-07-02 Some issues addressed in this Working Group III volume are mitigation of greenhouse gas emissions managing biological carbon reservoirs geo engineering costing methods and decision making frameworks **Groundwater Geophysics in Hard Rock** Prabhat Chandra Chandra,2015-10-07 In hard rock terrain shallow water wells generally have a poor to moderate yield Sinking wells deeply to tap yielding fracture zones often backfires because the borehole may miss the saturated fracture zones at depths A wrong approach to groundwater exploration in hard rock has therefore often led to unnecessary recurring expenditures and waste **Water Management Challenges in Global Change** B. Ulanicki,Kalanithy Vairavamoorthy,David Butler,Peter L. M. Bounds,Fayyaz Ali Memon,2020-11-26 Water Management Challenges in Global Change contains the proceedings of the 9th Computing and Control for the Water Industry CCWI2007 and the Sustainable Urban Water Management SUWM2007 conferences The rationale behind these conferences is to improve the management of urban water systems through the development of computerbased methods Issues such as economic globalisation climate changes and water shortages call for a new approach to water systems management which addresses the relevant technical social and economic aspects This collection represents the views of academic and industrial experts from a number of countries who provide technical solutions to current water management problems and present a vision for addressing the global questions The themes underlying many of the contributions include energy and material

savings water savings and the integration of different aspects of water management The papers are grouped into three themes covering water distribution systems sustainable urban water management and modelling of wastewater treatment plants The water distribution topics cover asset and information management planning monitoring and control hydraulic modelling of steady state and transients water quality and treatment demand and leakage management optimisation design and decision support systems as well as reliability and security of water distribution systems The sustainable urban water management topics include urban drainage systems water reuse social aspects of water management and also selected facets of water resources and irrigation Computer control of wastewater treatment plants has been seen as less advanced than that of clean water systems To address this imbalance this book presents a number of modelling techniques developed specifically for these plants Water Management Challenges in Global Change will prove to be invaluable to water and environmental engineering researchers and academics managers engineers and planners and postgraduate students The Litani River, Lebanon: An Assessment and Current Challenges Amin Shaban, Mouin Hamzé, 2018-04-06 This book presents a collection of chapters covering research on the Litani River Basin The Litani River Basin occupies about a quarter of Lebanon's surface area and it has recently been subject to severe geo environmental conditions such as water contamination and decreased discharge This motivated the Lebanese government to take action and start working on the remediation of the river These actions are also supported by international organizations including the World Bank *Global-Regional Linkages in the Earth System* Peter D. Tyson, Roland Fuchs, Congbin Fu, Louis Lebel, Hermine Vloemans, Eric Odada, John Perry, Will Steffen, Hassan Virji, 2002-04-30 Global environmental change occupies a central niche in the pantheon of modern sciences There is an urgent need to know and understand the way in which global biogeochemical cycles have changed over different time scales in the past and are likely to do so in the future Equally important it is necessary to determine the extent to which natural variability and that induced by anthropogenic activities are bringing about change A number of international co operative scientific programmes address these issues Chief among them are the International Geosphere Biosphere Programme IGBP the World Climate Research Programme WCRP and the International Human Dimensions Programme IHDP for global change This book is one of a series of IGBP syntheses drawing together findings in global environmental change over the past decade or so One focus of IGBP activities is the System for Analysis Research and Training START Co sponsored by the WCRP and IHDP START establishes regional research networks for global change science in developing countries stimulates and carries out global change research in developing regions of the world and builds capacity to undertake such research at personal institutional and regional levels Several regional global change networks have been established and much regional research has been accomplished in the last five years or so In this book work relating to four of the older START regions Southern Africa South Asia Southeast Asia and East Asia will be used as case studies to illustrate regional global linkages in Earth System Science *IITA Annual Report* International Institute of Tropical Agriculture, 1983 *Nature and Resources*
