Mid Twentieth Century American Philosophy Personal Statements:

Mid-twentieth Century American Philosophy: Personal Statements Peter Anthony Bertocci, 1974 *A Twentieth-Century Collision* Peter M. Collins, 2010-07-08 A Twentieth Century Collision explores intellectual culture in the United States during the twentieth century a topic which cannot be understood without attention to the gradual narrowing of the scope of academic philosophy and its diminishing influence This narrowing signifies a growing indifference to and elimination of genuinely metaphysical and prescriptively ethical questions as well as the bifurcation of faith and reason American Catholic universities it is contended in this book can render a seriously needed contribution to combating the negative effects of this historical development one of which is the separation of questions concerning the ultimate meaning of life from rational inquiry This thesis is pursued by 1 reviewing a highly selective but also highly representative sample of pertinent mainstream philosophical principles and 2 comparing them with principles of Pope John Paul II found in three documents in which he elaborates his views on the nature and role of philosophy and its relationship to theology in Catholic higher education This project is not unrelated to recent persistent criticism that American Catholic universities have forfeited their identity and thus their unique contribution to American cultural pluralism *E.A. Burtt, Historian and Philosopher* D. Villemaire, 2013-04-17 Burtt's book *The Metaphysical Foundations of Modern Physical Science* is something of a puzzle within the context of twentieth century intellectual history especially American intellectual history Burtt's pioneering study of the scientific revolution has proved to prophetic in its rejection of both scientism and positivism Published in 1924 Burtt's book continues to be read in educated circles and remains both the rose and the thorn on university reading lists raising skeptical questions about science methods and science knowledge just as it did seventy five years ago This book examines Burtt's public academic and personal life From his politics of conscience after World War I on through the Cold War Burtt is shown to be a man of unparalleled integrity whose relentless search for philosophic understanding drove his more quixotic philosophical quests and steered his personal life including its tragic dimension toward simple virtue The many who have been affected by *The Metaphysical Foundations* will be especially interested in this new perspective on the life and thought of its author Those who have not read Burtt's books might be inspired to study this unusual American thinker *Dictionary of Modern American Philosophers* John R. Shook, 2005-01-01 The *Dictionary of Modern American Philosophers* includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including

hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought The Bloomsbury Encyclopedia of Philosophers in America John R. Shook, 2016-02-11 For scholars working on almost any aspect of American thought The Bloomsbury Encyclopedia to Philosophers in America presents an indispensable reference work Selecting over 700 figures from the Dictionary of Early American Philosophers and the Dictionary of Modern American Philosophers this condensed edition includes key contributors to philosophical thought From 1600 to the present day entries cover psychology pedagogy sociology anthropology education theology and political science before these disciplines came to be considered distinct from philosophy Clear and accessible each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading Featuring a new preface by the editor and a comprehensive introduction The Bloomsbury Encyclopedia to Philosophers in America includes 30 new entries on twenty first century thinkers including Martha Nussbaum and Patricia Churchland With in depth overviews of Waldo Emerson Margaret Fuller Noah Porter Frederick Rauch Benjamin Franklin Thomas Paine and Thomas Jefferson this is an invaluable one stop research volume to understanding leading figures in American thought and the development of American intellectual history *Personal Identity, the Self, and Ethics* F. Santos, Santiago Sia, 2007-08-16 Going beyond the controversy surrounding personhood in non philosophical contexts this book defends the need for a credible philosophical conception of the person Engaging with John Locke Derek Parfit and P F Strawson the authors develop an original philosophical anthropology based on the work of Charles Hartshorne and A N Whitehead **Critical Readings in Teacher Education** , 2008-01-01 Like other fields of study teacher education defines itself both by what it includes and by what it excludes Teacher educators and researchers have spent a great deal of time seeking and attempting to eradicate the flaws in existing structures and practices but significantly less time learning to perceive the absences The premise of this book is that until we can identify and begin to address what is absent teacher education will be constrained by a perennial recycling of concerns that have characterized so much of research policy and practice to date If teacher education is to have a different future we need to ask different and difficult questions This book with contributions from theorists in Australia Canada and the United States addresses the challenges we face in establishing a more hopeful future for teacher education The authors provocative contributions identify what is missing in teacher education while providing critical counterpoints to existing frames of reference in the field In writing against the grain they open up new conceptual spaces and exciting trajectories for a different teacher education **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1976 *Encyclopedia of Educational Theory and Philosophy* D. C. Phillips, 2014-05-19 Education is a field sometimes beset by theories of the day and with easy panaceas that overpromise the degree to which they can alleviate pressing educational problems The two volume Encyclopedia of

The Metaphysics of Donald C. Williams A.R.J. Fisher, 2025-04-29 The thesis of this book is that Williams played a key role in the development and revival of analytic metaphysics This book begins with an account of Williams approach to philosophy given the rise of realism in the early twentieth century with a focus on his use of induction and parsimony to argue for metaphysical theses such as metaphysical realism and metaphysical naturalism It explains his critique of logical positivism and his defence of an empirical conception of metaphysics which in turn reveals how he took himself to be standing up to rising anti metaphysical trends This book then expounds within the framework of his empirical metaphysics his one category trope ontology and its origins arguing that his systematisation of the concept of an abstract particular or trope is his most novel contribution to analytic ontology This book further presents an original interpretation of his account of concrete objects and abstract universals engaging with current debates in the metaphysics of properties sometimes defending Williams sometimes correcting misinterpretations sometimes critically reassessing his views This book also explains his defence of the four dimensional manifold of time and his objections to competing theories such as the growing block theory and presentism incorporating recently posthumously published work in *The Elements and Patterns of Being* ed A R J Fisher 2018 with up to date references to the latest work in the metaphysics

of time Lastly this book analyses Williams s influence on later philosophers such as Lewis and Armstrong and others in Australia drawing from correspondence between Williams Lewis and Armstrong and evaluates his place in the history of analytic philosophy concluding that he played a key role in the development and revival of analytic metaphysics

Charles Hartshorne and the Existence of God Donald W. Viney,1985-06-30 In a lucid and comprehensive study Professor Viney presents an excellent critical analysis of Hartshorne s thought about God Demonstrating his thesis from many points of view ontological cosmological teleological moral aesthetic etc Viney deftly illustrates Hartshorne s belief that any one argument for God is inconclusive but that many woven together make up a convincing interpretative expression of the world

Martin Heidegger on the Way William Henry Werkmeister,1996 This work is a publication of a manuscript left unfinished at his death by the author From the time of their conversations in 1936 William Henry Werkmeister has studied the phenomenon of Martin Heidegger s thought and the critical literature commenting on it During a period spanning 36 years Werkmeister wrote some nine articles and reviews about his findings He turned to other interests but the Heidegger phenomenon continued to reside at the back of his mind At age ninety Werkmeister set out once again to write a work that would unify Heidegger s thought clarify a number of its essential features place Heidegger s chief works in an order that corresponds to the time line of his thought critically appraise the development of his thought against the work of other

German philosophers particularly Nicolai Hartmann and assess the question of Heidegger's alleged Nazi sympathies

Verificationism C.J. Misak, 2005-08-04 Verificationism is the first comprehensive history of a concept that dominated philosophy and scientific methodology between the 1930s and the 1960s The verificationist principle the concept that a belief with no connection to experience is spurious is the most sophisticated version of empiricism More flexible ideas of verification are now being rehabilitated by a number of philosophers C J Misak surveys the precursors the main proponents and the rehabilitators Unlike traditional studies she follows verificationist theory beyond the demise of positivism to examine its reappearance in the work of modern philosophers Most interestingly she argues that despite feminism's strenuous opposition to positivism verificationist thought is at the heart of much of contemporary feminist philosophy Verificationism is an excellent assessment of a major and influential system of thought

The Making of American Liberal Theology Gary J. Dorrien, 2006-01-01 In this first of three volumes Dorrien identifies the indigenous roots of American liberal theology and demonstrates a wider longer running tradition than has been thought The tradition took shape in the nineteenth century motivated by a desire to map a modernist third way between orthodoxy and rationalistic deism atheism It is defined by its openness to modern intellectual inquiry its commitment to the authority of individual reason and experience its conception of Christianity as an ethical way of life and its commitment to make Christianity credible and socially relevant to modern people Dorrien takes a narrative approach and provides a biographical reading of important religious thinkers of the time including William E Channing Ralph Waldo Emerson Horace Bushnell Henry Ward Beecher Elizabeth Cady Stanton and Charles Briggs Dorrien notes that although liberal theology moved into elite academic institutions its conceptual foundations were laid in the pulpit rather than the classroom

The Person and Primary Emotions Peter A. Bertocci, 2012-12-06 I shall propose that the unlearned motives of persons are primary emotions I am not surprised that many informed readers will wonder where I have been for the last five decades when even the conception of unlearned motives instincts drives urges has been shown to be little more than the result of undisciplined investigation And here I am proposing that in the nature and dynamics of some emotions that persons experience we can gain more adequate understanding of human motives at the unlearned level During the last five decades I have spent most of my time teaching the history of philosophy metaphysics philosophy of religion ethics and theory of value the psychology of personality and the philosophy of personality Increasingly I have paid special attention to the ways in which claims about the nature of man influence the theory of motives emotions and feelings What kept impressing me is the way in which the interpretation of the findings about motives feelings and emotion reflect unargued conceptions of human nature or that the views of fundamental motives feelings and emotions unduly dominate the underlying conception of the person In focusing attention first on the essential nature of a person I shall be discussing issues that are actually basic to our more analytical interpretation of the nature and dynamics of the primary motives or primary emotions

Psychoneurology 1 Norman B. Levy, 2013-06-29 Major neurological and psychological organizations have at

best set aside only small portions of their programs for papers or panels devoted to the psychological aspect of patients with end stage renal disease Thus the increased need for information concerning the psychological aspects of end stage renal disease has been met by occasional journal articles professional peer discussions small portions of national conferences and informal conversations and consultations with people with clinical and research experience in these areas The First International Conference on Psychological Factors in Hemodialysis and Transplantation arose out of a need to have a forum in which the major people involved in treatment and research in this area could share their latest work among themselves and with the registrants The initial encouragement for organizing such a conference came from the rank and file of nephrology social workers nephrology nurses and liaison psychiatrists and psychologists In early 1977 I had decided that I would make an effort to organize such a meeting and asked the two other individuals most closely identified with major research in this area Atara Kaplan De Nour and Harry S Abram to join me in planning this conference With their support and suggestions concerning the program I embarked upon an attempt to raise financial backing for it I was somewhat surprised to find that the many equipment and drug companies supporting nephrological conferences were not greatly interested in this one

From Question to Quest Santiago Sia, 2010-04-16 In facing up to life and its challenges questions inevitably arise Different situations provoke specific questions mostly trivial but frequently fundamental always seeking some kind of answer While the transition from question to quest is a rather natural one for human beings and the need for answers is a serious human demand the quest itself is significant precisely because it is a human task This book offers a number of literary philosophical enquiries into these challenges of life But it is the one set of quests stimulated deepened and widened by literature and philosophy as well as developed in a literary and philosophical way Among the topics covered are the search for meaning in life the quest for wisdom the aim of moral striving the need for community life the importance of relationships the challenge of suffering the desire for deliverance and the longing for immortality [A Marriage of Philosophy and Music](#) Erich Welling, 2014-04 How to use philosophy and music to open your horizons and enjoy being yourself put theory to work and help you experience personal growth is discussed in A Marriage of Philosophy and Music It is all about after After having a liberal education you are comfortable in modern culture and after further education and becoming a specialist in some field you enjoy using your skills We learn the ideas and methods of many social cultures and our own chosen specialty but we often neglect the liberal art of disciplining and enjoying the ideas and methods of our own individuality This book offers a path toward the education of privacy with the key words being selection design and beauty The book relates five areas of general human interest spirituality philosophy science art and body awareness The interrelation is accomplished by using personal patterns of experience that are available from philosophy and music Because of the plurality of subject matters and methods used in philosophy and music their patterns of discipline are comparable to self discipline A Marriage of Philosophy and Music attempts to create a path in this direction because besides the enjoyment of social culture and personal skills

there is enjoyment in being yourself which is a neglected liberal art
