On The Theory And Practice Of Archaeological Computing:

On the Theory and Practice of Archaeological Computing Gary R. Lock, Kayt Brown, 2000 These nine papers based on the 4th World Archaeological Congress held in South Africa in 1999 take a critical view of computer usage in archaeology and study its impact on the discipline and especially in terms of archaeological method and theory Contents Introduction Gark Lock Computers and archaeological cultural change J Huggett Archaeological computing and disciplinary theory J Gidlow Mathematics and computers H Forsyth Virtual reality G Goodrick Archaeological archives for the 21st century F Grew Intellectual excavation A Beck English sites and monuments records B Robinson Can computers help aerial survey R Palmer Is there such a thing as Computer Archaeology

Beyond the Map Gary R. Lock, 2000 This set of papers by European and North American archaeologists explore the interface between new spatial technologies and areas of theoretical concern in spatial archaeology Differing aspects of landscape such as vision perception and movement are explored through a series of case studies that focus on how spatial technologies can influence archaeological interpretation and to what extent these new technologies can be manipulated to take us beyond 2 dimensional maps Individual site based analyses and new applications of predictive modelling are also presented and assessed together with the wider questions of spatial technologies within heritage management

Theory and Practice in Late Antique Archaeology Luke Lavan, William Bowden, 2002-12-01 Can ideas and approaches current in mainstream archaeology be made to work in the conservative world of classical archaeology This volume seeks to explore theoretical frameworks methodology and field practice suited to the late antique Mediterranean Broad themes such as long term change topography the economy and social life are covered but in terms of specific issues and evidential problems currently being tackled by scholars of late antiquity This book will be useful to students and researchers seeking to enrich their approaches to Mediterranean historical archaeology and to anyone wishing to possess an overview of the current state of late antique archaeology

Handbook of Research on Computational Science and Engineering: Theory and Practice Leng, J., Sharrock, Wes, 2011-10-31 By using computer simulations in research and development computational science and engineering CSE allows empirical inquiry where traditional experimentation and methods of inquiry are difficult inefficient or prohibitively expensive The Handbook of Research on Computational Science and Engineering Theory and Practice is a reference for interested researchers and decision makers who want a timely introduction to the possibilities in CSE to advance their ongoing research and applications or to discover new resources and cutting edge developments Rather than reporting results obtained using CSE models this comprehensive survey captures the architecture of the cross disciplinary field explores the long term implications of technology choices alerts readers to the hurdles facing CSE and identifies trends in future development

Technologies in Cultural Heritage” , Using Computers in Archaeology Gary R. Lock,2003 This is the first comprehensive review of computer applications in archaeology from the archaeologist s perspective The book deals with all aspects of the discipline from survey and excavation to museums and education *Digital Research in the Study of Classical Antiquity* Simon Mahony,Gabriel Bodard,2016-04-22 This book explores the challenges and opportunities presented to Classical scholarship by digital practice and resources Drawing on the expertise of a community of scholars who use innovative methods and technologies it shows that traditionally rigorous scholarship is as central to digital research as it is to mainstream Classical Studies The chapters in this edited collection cover many subjects including text and data markup data management network analysis pedagogical theory and the Social and Semantic Web illustrating the range of methods that enrich the many facets of the study of the ancient world This volume exemplifies the collaborative and interdisciplinary nature that is at the heart of Classical Studies Digital Archaeology Thomas Laurence Evans,Patrick T. Daly,2006 The authors address how digital technologies have been and can be incorporated within different aspects of archaeology and heritage management They aim to stimulate widespread thought and debate on how IT can be holistically integrated into the study of past cultures **Human Remains: Another Dimension** Tim Thompson,David Errickson,2017-02-16 Human Remains Another Dimension The Application of 3D Imaging in the Funerary Contextbrings together scattered literature on the topic assimilating disparate pieces that relate to the novel use of non invasive three dimensional imaging techniques in the forensic context All chapters are written by specialists in the field who use these types of imaging techniques within their research bringing an engaging and comprehensive view that demonstrates the current use of 3D non invasive imaging techniques using case studies In addition the advantages for using such methods their current limitations and possible solutions are also reviewed Includes three dimensional imaging techniques presented from a forensics point of view Written by well renowned specialists in the field Assimilates disparate pieces that relate to the novel use of non invasive three dimensional imaging techniques The Virtual Representation of the Past Mark Greengrass,Lorna Hughes,2017-05-15 This unique book critically evaluates the virtual representation of the past through digital media A distinguished team of leading experts in the field approach digital research in history and archaeology from contrasting viewpoints including philosophical methodological and technical They illustrate the challenges involved in representing the past digitally by focusing on specific cases of a particular historical period place or technical problem **Reimagining Regional Analyses** Tina L. Thurston,2009-10-02 Reimagining Regional Analysis explores the interplay between different methodological and theoretical approaches to regional analysis in archaeology The past decades have seen significant advances in methods and instrumental techniques including geographic information systems the new availability of aerial and satellite images and greater emphasis on non traditional data such as pollen soil chemistry and botanical remains At the same time there are new insights into human impacts on ancient environments and increased recognition of the importance of micro scale changes in human

society These factors combine to compel a reimagining of regional archaeology The authors in this volume focus on understanding individual trajectories and the historically contingent relationships between the social the economic the political and the sacred as reflected regionally Among topics considered are the social construction of landscape use of spatial patterning to interpret social variability paleoenvironmental reconstruction and human impacts and social memory and social practice This book opens a discourse around the spatial patterning of the contingent recursive relationships between people their social activities and the environment

Capturing the Senses Giacomo Landeschi,Eleanor Betts,2023-06-12 This open access book surveys how digital technology can contribute effectively to improving our understanding of the past through a sensory engagement based on the evidence of material culture In particular it encourages specialists to consider senses and human agency as important factors in studying ancient space while recognising the role played by digital tools in enhancing a human centred form of analysis Significant advances in archaeological computing digital methods and sensory approaches have led archaeologists to rethink strategies and methods for creating narratives of the past Recent progress in data visualisation and implementation as well as other nascent digital sensory methods means that it is now easier to explore and experience ancient space from a multiscale perspective from the individual body or single building to the wider landscape The chapters in *Capturing the Senses* Digital Methods for Sensory Archaeologies present innovative methods for representing an embodied experience of ancient space simulating but not recreating ancient behaviours and social interaction Chapters cover topics including the potentials and pitfalls of visualising recreating and re enacting experiencing the senses in Virtual Reality environments and also digital reconstructions and auralisations of ancient spaces to study sound sensory perception Overall the book demonstrates that multisensory approaches can give a new perspective on how ancient spaces were intended to be used by inhabitants to fulfil a series of purposes including conveying messages and regulating movement This is an open access book
