Handbook of Family Resilience Dorothy S. Becvar, 2012-08-24 Resilience is a topic that is currently receiving increased attention. In general, resilience refers to the capacity of those who even under the most stressful circumstances are able to cope, to rebound, and to go on and thrive. Resilient families are able to regain their balance following crises that arise as a function of either nature or nurture and to continue to encourage and support their members as they deal with the necessary requirements for accommodation, adaptation, and ultimately healthy survival. **Handbook of Family Resilience** provides a broad body of knowledge regarding the traits and patterns found to characterize resilient individuals and well-functioning families, including those with diverse structures, various ethnic backgrounds, and a variety of non-traditional forms. This Handbook brings together a variety of perspectives aimed at understanding and helping to facilitate resilience in families relative to a full range of challenges.

Pioneering Paths in the Study of Families Gary W. Peterson, Suzanne Steinmetz, 2014-03-18 Meet the men and women whose groundbreaking work elevated the field of family studies. In **Pioneering Paths in the Study of Families: The Lives and Careers of Family Scholars**, you will find 40 autobiographies written by leading scholars in sociology, family studies, psychology, and child development. Their fascinating stories demonstrate how their family experiences, educational opportunities, and occupational endeavors not only shaped the disciplines they chose but also shaped the theoretical perspectives they utilized and the topics they researched. From the editors: These autobiographies document the experiences of scholars from the early twentieth century to the present. The descriptions of early influences on their education, of their graduate school experiences, and of their academic career paths provide a wealth of valuable material. Since four of these scholars have died and a number are in their eighties or older, these histories provide rich case studies on factors that influence the decision to go to college, get married, pursue an advanced degree, make specific occupational choices, and investigate certain topics. These autobiographies also detail the barriers that early women scholars in the social sciences faced. The scholars whose lives you will learn about in **Pioneering Paths in the Study of Families** include Joan Aldous, Katherine R. Allen, Pauline Boss, Carlfred B. Broderick, Wesley R. Burr, Catherine Street Chilman, Harold T. Christensen, Marilyn Coleman, Rand D. Conger, Randal D. Day, William J. Doherty, Evelyn Millis Duvall, Glen H.
