World Fire Stephen J. Pyne,2014-07-01 Back in PrintWorld Fire is the story of how fire and humans have coevolved The two are inseparable and together they have repeatedly remade the planet Pyne considers the evolution of fire in such diverse regions as Australia Africa Brazil Sweden Greece Iberia Russia and India and then ponders Antarctica the land without fire As he examines changing techniques for and attitudes toward fire control Pyne challenges our concepts of nature and wilderness and explains why the study and management of fire have tremendous environmental cultural and political implications Booklist A sweeping historical treatise that examines our world s love hate relationship with conflagration His engrossing ideas leave bright embers in the memory Outside **GTR-WO** United States. Forest Service,1975 The Last Organic Farmer Paige Bradley,2024-12-10 AgriCorp s gleaming Nutridomes pierce the smog choked sky monuments to a world stripped bare The scent of soil is a ghost replaced by the metallic tang of synthetic nutrients But in the parched heartland Elias Thorne cultivates a defiant patch of green a rebellion sown in heirloom seeds untouched by AgriCorp s sterile grip When one tomato vine miraculously resists AgriCorp s engineered blight a spark ignites Whispers of Elias s defiant crops reach Karen Hernandez a disillusioned botanist yearning to atone for her past complicity in AgriCorp s schemes and Malcolm Mac Riley an eccentric inventor hiding in the ruins of an observatory Together they embark on a perilous cross country journey pursued relentlessly by Dr Alison Hines AgriCorp s ruthless head of research who sees in Elias s seeds not just a threat but the key to ultimate control Their flight is fueled by more than survival it s a race against time to expose AgriCorp s conspiracy a plot to sever humanity s connection with nature itself Elias carries the weight of his daughter lost to AgriCorp s engineered famine while Karen grapples with the ghosts of her past Mac s ingenuity provides their lifeline his inventions a shield against AgriCorp s surveillance As they traverse a decaying world they uncover a secret buried within the seeds a

symbiotic microbe capable of neutralizing AgriCorp's genetic stranglehold. This discovery sets the stage for a final showdown at a hidden seed sanctuary, a battle not just for seeds but for the very soul of humanity's relationship with nature. The fight is fraught with peril and moral dilemmas. Joseph Chaney, an AgriCorp loyalist, witnesses the human cost of blind obedience; his faith shaken to the core. Dr. Hines, driven by an insatiable hunger for control, unveils her terrifying plan to synthesize the microbe and create a new generation of crops entirely dependent on AgriCorp's patented life. In a desperate gamble, Karen unleashes a counter agent plunging the sanctuary into chaos. Amidst the fray, Elias and the seed savers scatter their precious cargo, whispers of rebellion transformed into a roar. AgriCorp is wounded but not defeated. The future remains uncertain, a fragile landscape scarred by corporate greed. Yet the seeds of change have been sown, carrying the promise of a world where the scent of soil and the taste of real food are no longer just memories.

Biostimulants for Crops from Seed

Germination to Plant Development Shubhpriya Gupta, Johannes Van Staden, 2021-06-23. Biostimulants for crops from seed germination to plant development focuses on the effects and roles of natural biostimulants in every aspect of plant growth development to reduce the use of harmful chemical fertilizers and pesticides. Biostimulants are a group of substances of natural origin that offer a potential to reduce the dependency on harmful chemical fertilizers causing environmental degradation. While there is extensive literature on biostimulants, there remains a gap in understanding how natural biostimulants work and their practical application. This book fills that gap, presenting the ways in which biostimulants enhance seed vigor and plant productivity by looking into their mode of action, an area still being researched for deeper understanding. Exploring the roles of seed germination, pollen tube formation, pollen-pistil interaction, flower and fruit setting, to plant pigments, rhizospheric and soil microorganisms, the book also sheds light on the challenges and realistic opportunities for the use of natural biostimulants. Approaches biostimulant research with the goal of transforming scientific research into practical application. Includes real world examples from laboratory, greenhouse and field experiments. Presents the biochemical, physiological and molecular mode of action of biostimulants.
