Semiconductors Group Iv Elements And Iii V Compounds Data In Science And Technology:

Semiconductors Otfried Madelung, 1992 Continues the series providing the data most used by physicists chemists and other scientists making it more quickly accessible than from the larger references manuals Presents in tabular or graphic form information on about a hundred semiconductor materials other than those covered in the first volume Indexed only by substance Annotation copyrighted by Book News Inc Portland OR

Semiconductors Otfried Madelung, 1991-03-18 The frequent use of well known critical data handbooks like Beilstein Gmelin and Landolt Bornstein is impeded by the fact that merely larger libraries often far away from the scientist's working place can afford such precious collections To satisfy an urgent need of many scientists for having at their working place a comprehensive high quality but cheap collection of at least the basic data of their field of interest the series Data in Science and Technology is started now This first volume presents the most important data on two groups of semiconductors the elements of the IVth group of the periodic system and the III V compounds All data were compiled from information on about 2500 pages in various volumes of the New Series of Landolt Bornstein For each critically chosen data set and each figure the original literature is cited In addition tables of content refer to the handbooks the data were drawn from Thus the presentation of data in this volume is of the same high quality standard as in the original evaluated data collections We hope to meet the needs of the physical community with the volumes of the series Data in Science and Technology forming bridges between the laboratory and additional information sources in the libraries

Semiconductors Otfried Madelung, 1991-03-18 The large handbooks in physics chemistry and other disciplines contain data needed every day and additional data as important as the others but needed only at longer time intervals Thus a new series Data in Science and Technology has been founded which besides the basic data contains a full list of contents of the respective volumes the data were drawn from Hence the user is informed what additional information is held at his disposal in the more complete handbooks i e the Data in Science and Technology provide a bridge from the laboratory to the library The third volume contains information about semiconductors others than group IV elements and III V compounds It is an extension of the first volume on group IV elements and III V compounds and contains data and further information about some hundred other semiconducting substances
