Sentence Adverbials In A Functional Description Pragmatics Beyond Vii:

Sentence Adverbials in a Functional Description Eva Koktová, 1986-01-01 The author presents empirical arguments in favor of a joint syntactico semantic treatment within the framework of a functional generative description of a range of adverbial expressions which should be viewed as belonging to a single lexically heterogeneous but functionally homogeneous class exhibiting scoping properties and functioning as complementation of attitude CA These CA expressions do not only share their underlying functional properties but also certain surface syntax properties

Optimizing Adverb Positions

Eva Engels, 2012 Adverb positions vary within a single language as well as across diverse languages Based on the study of adverbs in English French and German this monograph shows that the distribution of adverbs is influenced by various factors at distinct levels of linguistic representation comprising semantics syntax phonology and information structure which interact in determining adverb positions The results of the investigation are formulated within the theoretical framework of

Optimality Theory which captures the complex interaction of these factors by hierarchically ranked constraints deriving cross linguistic variation of adverb positions by differences in the language specific constraint hierarchies The book is divided into two parts While Part I examines adverb positions in general Part II investigates under which circumstances an adverb may attach to a phonetically empty constituent in the languages under discussion The book appeals to a linguistic audience interested in Germanic and Romance languages as well as in theoretical syntax in general

Adjectives in Germanic and

Romance Petra Sleeman, Freek Van de Velde, Harry Perridon, 2014-02-15 Although the Germanic and Romance languages are two branches of the same language family and although both have developed the adjective as a separate syntactic and morphological category the syntax morphology and interpretation of adjectives is by no means the same in these two language groups and there is even variation within each of the language groups One of the main aims of this volume is to map the differences and similarities in syntactic behavior morphology and meaning of the Germanic and Romance adjective and to find an answer to the following question Are the dissimilarities the result of autonomous developments in each of the two branches of the Indo European language family or are they caused by language contact

Prospects for a New

Structuralism Hans-Heinrich Lieb, 1992-01-01 This volume which has partly grown from a Round Table at the XIVth International Congress of Linguists argues for a large amount of underlying unity in outlook among different frameworks in present day linguistics the contemporary Prague School the Noematic approach the UNITYP model Integrational Linguistics Natural Morphology much recent work in phonology and Popperian Interactionism as applied in particular to historical linguistics Section I discusses philosophical issues such as realism vs cognitivism Section II characterizes current frameworks and Section III deals with individual linguistic areas like phonology Leading representatives of the various approaches are shown to agree in subscribing to most if not all of nine Principles of New Structuralism that combine ontological realism with non cognitivist mentalism These principles define a position that is structuralist in a novel sense and

appears to be partly represented also in approaches such as Katzian Platonism and Searle's intentionalism it should be compatible with frameworks like GPSG There are definite historical connections with European structuralism The position is incompatible with current cognitivism of the mechanism type but otherwise bridges traditional oppositions such as the dichotomy of generative vs non generative frameworks **Symposium on Language Universals** Toomas Help, Sirje Murumets, 1987 Studies in Language, 1987 **Word**, 1995 Analysing Complex Argumentation Arnolda Francisca Snoeck Henkemans, 1997 *BLL*, 1999 Approaching the Grammar of Adjuncts Cathrine Fabricius-Hansen, Ewald Lang, Claudia Maienborn, 2000 **Uniform Trade List Annual**, 1989 *Language* George Melville Bolling, Bernard Bloch, 2006 **The Prague Bulletin of Mathematical Linguistics**, 1992 **Subject Guide to Books in Print**, 1993

Systemic Functional Language Description J.R. Martin, Y.J. Doran, Giacomo Figueredo, 2019-10-08 This volume showcases previously unpublished research on theoretical descriptive and methodological innovations for understanding language patterns grounded in a Systemic Functional Linguistic perspective Featuring contributions from an international range of scholars the book demonstrates how advances in SFL have developed to reflect the breadth of variation in language and how descriptive methodologies for language have evolved in turn Taken together the volume offers a comprehensive account of Systemic Functional Language description providing a foundation for practice and further research for students and scholars in descriptive linguistics SFL and theoretical linguistics **Семиотика и информатика. Выпуск 36** Сборник статей, 2017-10-24 1994 **Beyond Aspectual Semantics** Astrid De Wit, Frank Brisard, Carol Madden-Lombardi, Michael Meeuwis, Adeline Patard, 2024-03-08 This volume brings together insights from leading scholars in the field of grammatical aspect to examine the multifaceted nature of this pivotal linguistic resource used to express temporal meaning The contributors explore the many ways in which linguistic research can move beyond canonical semantic analyses of aspect which still focus to a great extent on objective temporal features of what can be called situation models i.e. integrated cognitive representations of designated states of affairs The chapters in this volume widen this outlook by concentrating on less typical contexts in which aspectual constructions are used e.g. for affective purposes to mark the epistemic status of situations or to shape narrative structures This focus on non prototypicality is also reflected in the languages investigated many of which are understudied with respect to their aspectual constructions including several African languages and the sign language Kata Kolok The volume adopts a multidisciplinary methodological approach and introduces possible directions for future research based on experimental studies fieldwork research and translation mining *Linguistics*, 1998

Philologica Pragensia, 1990 **Revisiting Sentence Adverbials and Relevance** Irina T. Pandarova, 2023-06-15 This book offers a fresh take on several long standing issues relating to the non truth conditional interpretation of epistemic evidential hearsay and attitudinal sentence adverbials Drawing on a wealth of data from English and German it shows for the first time that all four adverbial classes can have both truth conditional and non truth conditional parenthetical readings A

novel account is presented according to which non truth conditional readings may arise at either the syntactic or the pragmatic level Couched in relevance theory the book also re examines the explicature and illocutionary status of the adverbial qualification and the qualified proposition and refines the notions of pointhood and at issueness to provide an original information structural analysis applicable to not just sentence adverbials but a range of other propositional qualifiers Finally the investigation identifies five factors affecting non truth conditional interpretation linear position prosody the semantics of the adverbial its information structural properties and the wider context The book will be of interest to those interested in relevance theory the semantics pragmatics interface the syntax pragmatics interface and information structure as well as for syntacticians semanticists and pragmatists interested in sentence adverbials other propositional qualifiers and parentheticality syntactic and interpretational
