**Imagining Outer Space** Alexander C.T. Geppert, 2018-04-25 Imagining Outer Space makes a captivating advance into the cultural history of outer space and extraterrestrial life in the European imagination How was outer space conceived and communicated What promises of interplanetary expansion and cosmic colonization propelled the project of human spaceflight to the forefront of twentieth century modernity In what way has West European astroculture been affected by the continuous exploration of outer space Tracing the thriving interest in spatiality to early attempts at exploring imaginary worlds beyond our own the book analyzes contact points between science and fiction from a transdisciplinary perspective and examines sites and situations where utopian images and futuristic technologies contributed to the omnipresence of fantasmatic thought Bringing together state of the art work in this emerging field of historical research the volume breaks new ground in the historicization of the Space Age

**Inmate Radicalisation and Recruitment in Prisons** Clarke Jones, Raymund Narag, 2018-12-07 It is traditionally viewed that vulnerable inmates form captive audiences for violent terrorist offenders who in turn are destined to turn prisons into training grounds for militant activities all the while forming alliances with more hardened criminals to produce an even greater threat However there is limited empirical grounding to underpin these assertions Inmate Radicalisation and Recruitment in Prisons challenges existing perceptions about prison radicalisation Whilst not downplaying the seriousness of the prison radicalisation threat it seeks a more balanced interpretation of current discussion Drawing on original research in the Philippines and case studies from Australia the US Canada Indonesia the UK France the Netherlands and Belgium the authors posit an alternative view that suggests that the imprisonment of a terrorist may mark the beginning of physical disengagement and psychological de radicalisation Offering evidence based insights to help determine how best to house terrorist offenders this volume will appeal to students and researchers interested in fields such as Criminology and Criminal Justice Terrorism Prisons and Organised Crime
