Advanced Data Structures Anuradha A. Puntambekar, 2020-12-01 *Advanced Data Structures* is a core subject in Computer Science. It includes a solid introduction to algorithms, data structures, and uses C syntax and structure in the design of data structures. This textbook helps the students to make the transition from fundamentals of data structures to an advanced level of data structures and their applications. At the beginning, the non-linear data structures such as trees and graphs are discussed in the first two units. In the third unit, the concept of hashing is discussed. In this, the hashing methods, collision handling techniques, concept of dictionary, and skip lists are discussed. Next two units are based on search trees and multiway trees. These are basically the advanced level tree structures such as AVL trees, Optimal Binary Search Trees (OBST), B trees, B+ trees, Trie trees, Red black trees, KD trees, and AA trees. Sufficient number of examples and programming illustrations are supported for better understanding of the complex concepts in the simplest manner. Finally, the file organization is discussed in which various file organization techniques and implementation is illustrated. The objective of this book is to enable students to have the much needed foundation for advanced technical skill leading to better problem solving approach.

The Social Communication Intervention Programme Resource Catherine Adams, Jacqueline Gaile, 2024-03-29 The Social Communication Intervention Programme (SCIP) has been developed to support school aged children 6-11 years with social communication pragmatic and language needs. SCIP provides a rationale and method for providing specialist level pragmatics and language therapy for these children who have significant social communication differences. The SCIP model is introduced in *The Social Communication Intervention Programme Manual* and this book presents the content of the intervention programme itself using a nested structure of 150 adaptable therapy activities. It contains the complete set of resources required to plan and deliver the interventions set out in the companion book including forms, activities, and ready-made information sheets. Content can also be downloaded and printed for easy use. Used alongside *The Social Communication Intervention Programme Manual*, this book offers a truly practical, tried and tested model to provide targeted individualised intervention for children with social communication challenges. It is an essential tool for speech and language therapists, specialist teachers, and psychologists who are working with children with social communication pragmatic and language needs. For the most effective use, *The SCIP Resource* should be purchased alongside *The SCIP Manual*. *Children's Counting and Concepts of Number* Karen C. Fuson, 2012-12-06 For some time now, the study of cognitive development has been far and away the most active discipline within developmental psychology. Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive, 50% seems like a conservative estimate. Hence, a series of scholarly books devoted to work in cognitive development is especially appropriate at this time. The Springer Series in Cognitive Development contains two basic types of books: namely, edited collections of original chapters by several authors, and original volumes written by one author or a small group of authors. The

flagship for the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Volumes in the Progress sequence are strongly thematic in that each is limited to some well defined domain of cognitive developmental research e g logical and mathematical development semantic development All Progress volumes are edited collections Editors of such books upon consultation with the Series Editor may elect to have their works published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors will be published as separate volumes within the series is being used in the selec A fairly broad definition of cognitive development tion of books for this series

Reformulation and Acquisition of Linguistic Complexity Claire Martinot,Tomislava Bošnjak Botica,Sonia Gerolimich,Urszula Paprocka-Piotrowska,2019-03-04 Reformulation and Acquisition of Linguistic Complexity proposes a new answer to the question of the appropriation or acquisition of a mother tongue a complex object one that is both stable and perpetually evolving This answer is based on the reformulating principle that children spontaneously apply a principle that is illustrated here with children retelling the same story These children are all 6 8 or 10 years old and speak French Italian Croatian or Polish as a first language This book demonstrates that the acquisition of any mother tongue is explained by the application of various reformulation procedures between source predications and reformulated predications These procedures are comparable from one language to another and different from one age group to another This book also studies certain complex phenomena at the lexical and syntactical levels and analyzes how children depending on their age treat these phenomena Finally we show that the acquisition of a mother tongue is a fundamentally linguistic activity

Unearthing the Real Process Behind the Event Data Gert Janssenswillen,2021-04-07 This book is a revised version of the PhD dissertation written by the author at Hasselt University in Belgium This dissertation introduces the concept of process realism Process realism is approached from two perspectives in this dissertation First quality dimensions and measures for process discovery are analyzed on a large scale and compared with each other on the basis of empirical experiments It is shown that there are important differences between the different quality measures in terms of feasibility

validity and sensitivity Moreover the role and meaning of the generalization dimension is unclear Second process realism is also tackled from a data point of view By developing a transparent and extensible tool set a framework is offered to analyze process data from different perspectives From both perspectives recommendations are made for future research and a call is made to give the process realism mindset a central place within process mining analyses In 2020 the PhD dissertation won the BPM Dissertation Award granted to outstanding PhD theses in the field of Business Process Management
