Sequencing Financial Strategies For Developing Countries:

Sequencing? Alison Harwood, Bruce Smith, 2010-12-01 The importance of the financial system in economic development has been frequently neglected by analysts and poorly understood by policymakers Are there policy reforms or any particular sequence of reform measures that will contribute to the successful functioning of the financial system and thus spur long term economic growth What kind of regulatory changes are appropriate as countries move toward financial liberalization and as government development banks decline in importance compared to private banks and nonbank financial institutions What broad lessons can be discerned from the experience of financial reform in Asia and Latin America for the transitional countries of Russia and Eastern Europe The world's financial system has been buffeted in recent years by the crisis in the US savings and loan industry the implosion of the Japanese bubble economy of the late 1980s the Mexican peso crisis and other events The experience of Western nations in adapting to financial liberalization can provide useful insights for the many countries embarking on a course of market reforms and beginning to build the financial infrastructure for a market economy This volume analyzes the recent financial reforms and reform strategies in Asia Latin America Eastern Europe and Russia The chapters draw on the extensive practical experience of the authors and reflect the most recent empirical research in the field The contributors are Gerald Caprio Jr Dimitri Vittas and Ross Levine the World Bank David C Cole and Betty F Slade Harvard Institute for International Development Maxwell J Fry University of Birmingham at Edgbaston Claudio Gonzalez Vega Ohio State University Stephan Haggard University of California San Diego R Barry Johnston International Monetary Fund Philip A Wellons Harvard Law School Lawrence J White New York University and Alison Harwood

Financial Reform in Developing Countries José María Fanelli, Rohinton Medhora, 1998-11-12 For the large number of developing countries undergoing significant structural transformations one of the most important and controversial adjustment areas is that of the financial markets Focusing on the role of the institutional and enabling environment within which financial reform occurs and on the integration of principles of finance with more macroeconomic approaches to the subject the book contains case studies of reform experiences in Argentina India Nigeria Turkey and Uruguay Themes studied include the go slow versus big bang approach and the particular problem of bank firm inter linkages in Eastern Europe

Challenges at the Bank for International Settlements Elmar B. Koch,2007-10-20 For a number of reasons I am pleased that Elmar has asked me to write a foreword to this volume which assembles together a number of pieces that he wrote over the course of the decade between 1997 and 2007 The first reason is that it gives me the opportunity to thank him for the work he has carried out so conscientiously and ably in his role as an economist working for the BIS I would however be remiss if I did not also thank him for his earlier efforts contributing in particular to the statistical output of the MED and also the broader contribution he made as president of the Sports Club from 2004 to 2007 A second reason for being pleased is that the research contained in this volume was drawn from the period when I was chief of the MED and very much involved in discussions of the portant issues to which these papers are directed Time goes fast when one is busy and it is all too easy to forget what was yesterday s central ques on This volume constitutes a kind of reintroduction to old friends and that is always a pleasure The papers in this volume are grouped into four time periods during each of which Elmar had been given different responsibilities The in resting point is that taken together they imply an interest in essentially all the important topics of interest to the BIS
