The Handbook of Bird Identification Mark Beaman, Steve Madge, 2010-09-30 An identification guide covering all the bird species to have occurred in the European region Birding is one of the most popular activities and pastimes in Europe and so it follows that it is essential to be able to identify the birds on view be it in the back garden or for making more serious in depth studies This book aims to bring together as much information as possible in one volume using extremely detailed up to date guides and identification of every species known to have occurred in Europe and the West Palearctic that is the whole of Europe North Africa as far south as the Central Sahara the Middle East to the border of Iran the Azores Madeira Canary Islands the islands off Mauritania and the Cape Verde islands as defined by Cramp and Simons 1977 They have certainly been successful in doing so and have produced a wonderfully comprehensive guide covering nearly 900 species showing a wide range of differing plumages The colour plates are exquisite and have been painted by some of Europe s leading bird artists The text is clear and can be followed by beginners but finer points of identification are included for the benefit of more serious bird watchers Particularly helpful is the cross referencing of the text and colour plates There are more than 600 colour maps to identify where the birds are to be found which are simple and easy to use with excellent descriptions of status and habitat *The Mythology of All Races: Armenian.* Werner, A. *African* ,1964 **Armenian**
