

Changes in Perception of Radiation Risks (Next-generation Effects)

Radiation Risks Risk Perception And Social Constructions

Gerald Mars, David T. H. Weir

Radiation Risks Risk Perception And Social Constructions:

Radiation Risk, Risk Perception and Social Constructions J. B. Reitan, G. N. Kelly, 1996 The Social and Cultural Construction of Risk B.B. Johnson, V.T. Covello, 2012-12-06

The Social and Cultural Construction of Risk Issues Methods and Case Studies Vincent T Covello and Branden B Johnson Risks to health safety and the environment abound in the world and people cope as best they can But before action can be taken to control reduce or eliminate these risks decisions must be made about which risks are important and which risks can safely be ignored The challenge for decision makers is that consensus on these matters is often lacking Risks believed by some individuals and groups to be tolerable or acceptable such as the risks of nuclear power or industrial pollutants are intolerable and unacceptable to others This book addresses this issue by exploring how particular technological risks come to be selected for societal attention and action Each section of the volume examines from a different perspective how individuals groups communities and societies decide what is risky how risky it is and what should be done The writing of this book was inspired by another book Risk and Culture An Essay on the Selection of Technological and Environmental Dangers Published in 1982 and written by two distinguished scholars Mary Douglas a British social anthropologist and Aaron Wildavsky an American political scientist the book received wide critical attention and offered several provocative ideas on the nature of risk selection perception and acceptance

Risks in Technological Systems Göran Grimvall, Åke Holmgren, Per Jacobsson, Torbjörn Thedéen, 2009-11-03 Risks in Technological Systems is an interdisciplinary university textbook and a book for the educated reader on the risks of today's society In order to understand and analyze risks associated with the engineering systems on which modern society relies other concerns have to be addressed besides technical aspects In contrast to many academic textbooks dealing with technological risks this book has a unique interdisciplinary character that presents technological risks in their own context Twenty four scientists have come together to present their views on risks in technological systems Their scientific disciplines cover not only engineering economics and medicine but also history psychology literature and philosophy Taken together these contributions provide a broad but accurate interdisciplinary introduction to a field of increasing global interest as well as rich opportunities to achieve in depth knowledge of the subject

What is Safe? David R. Williams, 1998 Is it safe What are the risks involved are questions frequently asked by members of the public This unique book explains the fundamental problems faced in modern day life Terms such as risk and safe are clearly defined and the risks encountered between birth and death are discussed including transport the home healthcare diet and the workplace The perception of risk and the risks from radiation natural radwaste and nuclear reactors are covered along with management of risk and the psychology of risk perception

What is Safe The Risks of Living in a Nuclear Age is illustrated with examples from the most deeply researched areas Written for the lay person the volume also includes a complete reprint of the late Lord Walter Marshall's famous lecture The Radioactive Garden It will be of interest to students teachers researchers industrialists or indeed anyone wishing for an up to

date view of risk and safety **Constructing Risk and Safety in Technological Practice** Boel Berner, Jane Summerton, 2003-08-29 Modern technological systems entail risks and uncertainties of hitherto unknown dimensions This book discusses the construction of risk and safety within a variety of empirical contexts where technologies and their risk are debated and handled by individuals groups or organizations With contributions from leading scholars from Europe and the USA it presents original theoretical discussions linked to detailed empirical case studies [The Social Construction of Worksite Health and Safety Problems](#) Brian Leland Cole, 2003 **The SAGE Handbook of Risk Communication** Hyunyi Cho, Torsten Reimer, Katherine A. McComas, 2014-10-29 In this comprehensive state of the art overview of risk communication the field s leading experts summarize theory current research and practice in a range of disciplines and describe effective communication approaches for risk situations in diverse contexts such as health environment science technology and crisis Offering practical insights the contributors consider risk communication in all contexts and applications interpersonal organizational and societal offering a wider view of risk communication than other volumes Importantly the handbook emphasizes the communication side of risk communication providing integrative knowledge about the models audiences messages and the media and channels necessary for effective risk communication that enables informed judgments and actions regarding risk Editors Hyunyi Cho Torsten Reimer and Katherine McComas have significantly contributed to the field of risk communication with this important reference work a must have for students scholars and risk and crisis communication professionals **The Institutional Dynamics of Culture, Volumes I and II** Perri Six, 2018-12-20 These two volumes present the most important recent developments in the institutional theory of culture and demonstrate their practical applications Sometimes called grid group analysis or cultural theory they derive from the work of Durkheim in the 1880s and 1900s and develop the insights of the anthropologist Mary Douglas and her followers from the 1960s on First redefined within social and cultural anthropology the theory s influence is shown in recent years to have permeated all the main disciplines of social science with substantial implications for politics history business work and organizations the environment technology and risk and crime and consumption Today the institutional theory of culture now rivals the rational choice Weberian and postmodern outlooks in influence across the social sciences [Encyclopedia of Health Communication](#) Teresa L. Thompson, 2014-04-18 From the dynamics of interpersonal communication between health professionals and clients to global command and control during public health emergencies that cross international borders the field of health communication bridges many disciplines and involves efforts from the micro to the macro It involves navigating personal cultural and political complexities and an ability to distill complex technical science into quickly and easily understood terms for ready distribution by the mass media or to an individual patient or to the parent of an ailing child Despite an abundance of textbooks specialized monographs and academic handbooks this is the first encyclopedic reference work in this area covering the breadth of theory and research on health communication as well as their practical application

Features Nearly 600 original articles are organized A to Z within a three volume set to provide comprehensive coverage of this exciting field including such topics as theories and research traditions evaluation and assessment cultural complexities high risk and special populations message design and campaigns provider patient interaction issues media issues and more All articles were specifically commissioned for this work signed and authored by key figures in the field and conclude with cross reference links and suggestions for further reading Appendices include a Resource Guide with annotated lists of classic books and articles journals associations and web sites a Glossary of specialized terms and a Chronology offering an overview and history of the field A thematic Reader s Guide groups related articles by broad topic areas as one handy search feature on the e Reference platform which also includes a comprehensive index of search terms This A to Z three volume reference is available in both print and online formats and is a must have for libraries and researchers who seek comprehensive coverage of the theory research and applications of health communication Key Themes Community Health Issues End of Life Issues Evaluation of Health Intervention Health Education Health Communication Everyday and Family Health Communication Issues Health Campaigns Health Communication International and Diversity Issues Health Information History of Health Communication Media Content Organizational Issues and Health Policy Provider Patient Interaction Public Health Communication Specific Health Issues Providers Technology Theories Ethics Philosophy and Overriding Methodological Issues

The Risk Society Revisited Eugene Rosa,Ortwin Renn,Aaron McCright,2014 Risk is a part of life How we handle uncertainty and deal with potential threats influence decision making throughout our lives In *The Risk Society Revisited* Eugene A Rosa Ortwin Renn and Aaron M McCright offer the first book to present an integrated theory of risk and governance The authors examine our sociological understanding of risk and how we reconcile modern human conditions with our handling of risk in our quest for improved quality of life They build a new framework for understanding risk one that provides an innovative connection between social theory and the governance of technological and environmental risks and the sociopolitical challenges they pose for a sustainable future Showing how our consciousness affects risk in the decisions we make as individuals and as members of a democratic society *The Risk Society Revisited* makes an important contribution to the literature of risk research

Perspectives on Ignorance from Moral and Social Philosophy Rik Peels,2016-06-23 This edited collection focuses on the moral and social dimensions of ignorance an undertheorized category in analytic philosophy Contributors address such issues as the relation between ignorance and deception ignorance as a moral excuse ignorance as a legal excuse and the relation between ignorance and moral character In the moral realm ignorance is sometimes considered as an excuse some specific kind of ignorance seems to be implied by a moral character and ignorance is closely related to moral risk Ignorance has certain social dimensions as well it has been claimed to be the engine of science it seems to be entailed by privacy and secrecy and it is widely thought to constitute a legal excuse in certain circumstances Together these contributions provide a sustained inquiry into the nature of ignorance and the pivotal role it plays in the moral and

social domains **The Social Amplification of Risk** Nick Pidgeon, Roger E. Kasperson, Paul Slovic, 2003-07-10 This volume edited by three of the world's leading analysts of risk and its communication brings together contributions from a group of international experts working in the field of risk perception and risk communication. Key conceptual issues are discussed as well as a range of recent case studies spanning BSE and food safety, AIDS, HIV, nuclear power, child protection, Y2K, electromagnetic fields and waste incineration that take forward the state of the art in risk amplification theory. The volume also draws attention to lessons for public policy, risk management and risk communication practice. *Anthropology and Risk* Asa Boholm, 2015-04-24 Drawing on theory from anthropology, sociology, organisation studies and philosophy, this book addresses how the perception, communication and management of risk is shaped by culturally informed and socially embedded knowledge and experience. It provides an account of how interpretations of risk in society are conditioned by knowledge, claims and cultural assumptions and by the orientation of actors based on roles, norms, expectations, identities, trust and practical rationality within a lived social world. By focusing on agency, social complexity and the production and interpretation of meaning, the book offers a comprehensive and holistic theoretical perspective on risk based on empirical case studies and ethnographic enquiry. As a selection of Asa Boholm's publications throughout her career along with a newly written introduction overviewing the field, this book provides a unified perspective on risk as a construct shaped by social and cultural contexts. This collection should be of interest to students and scholars of risk communication, risk management, environmental planning, environmental management and environmental and applied anthropology. **The Perception of Risk** Paul Slovic, 2016-10-06 The concept of risk is an outgrowth of our society's great concern about coping with the dangers of modern life. *The Perception of Risk* brings together the work of Paul Slovic, one of the world's leading analysts of risk, risk perception and risk management to examine the gap between expert views of risk and public perceptions. Ordered chronologically, it allows the reader to see the evolution of our understanding of such perceptions from early studies identifying public misconceptions of risk to recent work that recognizes the importance and legitimacy of equity, trust, power and other value-laden issues underlying public concern. **Radiation Risks in Perspective** Kenneth L. Mossman, 2006-10-20 Public misperception of radiological risk consistently directs limited resources toward managing minimal or even phantom risks at great cost to government and industry with no measurable benefit to overall public health. The public's inability to comprehend small theoretical risks arrived at through inherently uncertain formulae coupled with an irrational *Genetic Modification in the Food Industry* Susan Harlander, Sibel Roller, 2012-12-06 Although the true economic impact of genetic modifications is yet to be realized, the potential of this new technology to benefit the food processing industry and to improve food quality is enormous. Specific genetically modified whole foods and food ingredients that have recently become available or are about to become available are described and discussed in relation to their technical performance and consumer acceptance. The regulatory, ethical and communication issues in food biotechnology are also reviewed. As the

products of gene technology come on stream decisions need to be made as to whether or not to use them Yet many food industry professionals have little or no background in biotechnology and have a limited concept of possible applications in foods Therefore this book aims to foster a greater understanding of the benefits and potential pitfalls of this new technology

Radiobiology Mr. Rohit Manglik,2024-01-11 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels
