## **Radical Papers Readings In Education:**

The Radical Papers: Readings in Education Harold W. Sobel, Arthur E. Salz, 1972      **Reconstructing Education** Greta Hofman Nemiroff, 1992-05-30 Drawing on elements of progressive education existential theory feminist pedagogy and values education critical humanism combines the holistic psychological concerns of humanistic education with the sociopolitical contextualization of critical pedagogy Developed over the past seventeen years in one of North America's most experimental postsecondary programs The New School of Dawson College this theory and practice responds to both the personal and the political needs of students Reconstructing Education is at once a review of this century's educational theories an account of the work at the school and an empowering illustration of the way in which schools can incite the motivation of students and encourage them to become active members in a truly democratic society The case study chapters on The New School give concrete examples of how this philosophy is manifested in the school's methodology structure and pedagogy and draws heavily on the written work of teachers and students To formulate a similar approach for a specific school it is essential to combine a rigorous analysis of existing educational models with the dialectical process of creating and recreating a new model defined by the articulation of both learners and teachers affective cognitive and socially constructed needs This is a valuable book for anyone concerned with alternative approaches to education and for courses on educational theory or the philosophy of education      Franco Basaglia's Revolution Carlo Guareschi, Valeria Bizzari, 2025-02-18 This book explores the importance of the work of Franco Basaglia a pioneer in the democratic psychiatry movement Using a multidisciplinary approach combining philosophy and psychology this volume seeks to illuminate the past and create a clearer picture of Basaglia's impact in conceptualizing modern psychiatric care It reviews the contemporary status of care and offers new insights for a critical evaluation of care that takes the psychiatric revolution to a new level Highlights Basaglia's diagnostic and clinical practice Employs a multi disciplinary approach Joins phenomenology and critical theory      **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1975      *The Publishers' Trade List Annual*, 1977      **Education and Play** Barbara Dinham, Michael Norton, 1977      *Resources in Education*, 2001-04      Teachers, Ideology and Control (RLE Edu N) Gerald Grace, 2012-05-04 Teachers of the urban working class especially in inner city areas have always been regarded as strategic agents in processes of social and cultural formation In the Victorian era seen as The Teachers of the People Pioneers of Civilization and Preachers of Culture their role in gentling and controlling the urban masses was crucial They have always been at the centre of confrontation and struggle in a classroom sense in a cultural sense and in a socio political sense In contemporary inner city schools such confrontation and struggle remain a reality Teachers Ideology and Control is one of the first attempts to examine this important social and occupational group by locating contemporary sociological research in an historical framework As such it will be of interest not only to students of sociology and education especially urban education but also to social historians Its relevance to those who either administer

or teach in urban schools will be clear The author shows the ways in which contemporary inner city schools are caught up in an ideological struggle in education He explore the nature of constraint and control in urban education with reference to existing constructs of the good teacher the demands of the teacher s work situation and the reality of autonomy He suggests that viewed historically the relative autonomy of teachers has increased as a result largely of socio political and institutional crises At the same time however there have been important changes in the modality of social control changes from more explicit to more implicit features What it is to be a good teacher the effects of day to day immersion in school life and the ideology of professionalism these are all seen to be important constituents of a network of implicit control in contemporary education

**Nietzsche, Ethics and Education** Peter Fitzsimons,2007-01-01 Undermining the fundamental place of freedom equality and universal reason Nietzsche s philosophy recognises that we occupy multiple and contradictory subject positions within social life With no metaphysical realm of reason no divine inspiration for morality and no transcendental basis for human essence we are left with the embodied reflective and creative self as a source of ethics From this perspective arises Nietzsche s *bermensch* a continuous process of overcoming and becoming interpreted as a metaphor for education that honours difference and incorporates otherness The book explores the development of Nietzsche s philosophy and its application to the problems of education disturbing traditional liberal and democratic accounts of the relationship between individual and society Threaded throughout is the author s critique of the way educational institutions are driven by political and economic considerations explored through notions of autonomy and subjectivity The book is suitable for graduate students and academics wanting to engage either with postmodern interpretations of ethics in education or with political philosophy in relation to development of self and community

*Third World Education* Anthony R. Welch,2002-05-03 This book debunks the argument that quality in education can only be achieved by limiting or trading off equality The quality of schooling is a major issue for Third World nations across the globe However there is no single measure which is universally accepted Whether it is as some economists might argue an issue of the number of desks per classroom or one of national sovereignty is widely disputed Defining equality in education becomes increasingly difficult in an era of globalization in which there exists a wide gap between rich and poor both within and between nations In the context of an international move towards New Right politics and neo liberal economic ideologies both the quality and equality of education are imperiled This book argues that any worthy definition of quality education must include the interests and participation of the underprivileged     **Paperbound Book Guide for Colleges** ,1974
