**The RAINS Model of Acidification** Joseph Alcamo,1991      **The RAINS Model of Acidification** J. Alcamo,R. Shaw,L. Hordijk,1990-07-31      Regional Acidification Models Juha Kämäri,David F. Brakke,Alan Jenkins,Stephen A. Norton,Richard F. Wright,2012-12-06 In order to provide meaningful information for evaluating environmental consequences of alternative control strategies of air pollutant emissions scientists have recently initiated numerous studies aiming at collecting and making use of regional data New kinds of mathematical models have been developed that no longer are calibrated just for individual stands or catchments but can be applied on a large regional scale Such regional models and data were reviewed at a meeting Models to describe the geographic extent and time evolution of acidification and air pollution damage organized by the Finnish Research Project on Acidification HAPRO and held in Aulanko Hiimeenlinna Finland July 5 8 1988 This volume is based on the outcome of that meeting The chapters of the volume are written by leading scientists in the field The main objective of this volume is to discuss the potential of regional models to analyze the geographic extent of acidification as well as the environmental damage and the time evolution of the responses of the environment First in Part I of the volume sensitivity distributions of ecosystems forest soils and surface waters are described The focus of interest is therefore extended from the most sensitive ecosystems to sensitive and moderately sensitive parts of the environment When formulating national and international targets it is of crucial importance to know the whole distribution of critical loads within the area and not only the level the most sensitive ecosystem can tolerate      **Integrated Global Models of Sustainable Development - Volume III** Akira Onishi,2009-08-18 Integrated Global Models of Sustainable Development is a component of Encyclopedia of Technology Information and Systems Management Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias In the 21st century the human society is facing the challenge of sustainable development with constraints of global environmental changes In order to cope with poverty and international per capita income disparity IPCID there should be further needs for economic development to provide employment opportunities against Terrorism and refugees The coverage in three volumes tries to show a possibility of sustainable development from a global viewpoint by using alternative policy simulations The chapters are organized so that the readers might understand archived historical trends in global modeling for sustainable development Starting from global models in the 1970s 1980s 1990s the updated latest modeling works are also included as far as possible The chapters deal with roles of integrated global models scope and methodologies and policy implications These three volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs      Acidification and its Policy Implications T. Schneider,1986-11-01 Providing a wealth of reference material for research scientists and policy makers these proceedings address the extremely complex problem of acidification a phenomenon which is causing serious deterioration of natural

environments in Europe and North America Papers review the effects of acidification on the aquatic environment flora fauna and vegetation and materials and also review cultural properties the ecology as a whole and the economic impact of acidification The papers on forest dieback cover potential stress factors and the effects on materials and cultural properties Scientific research results are presented which deal with models as tools for abatement strategies and underline the application of models in policy making The review papers of scientific research on acidification are followed by the official report of the conference and presentations by representatives of the EEC member countries giving an overview of national research programmes and policies regarding acidification
