Here to Help: NGOs Combating Poverty in Latin America Robyn Eversole, 2016-07-08 Over six billion dollars in developmental assistance is funneled annually through non governmental organizations NGOs yet little is understood about the nature of their relationship with communities and the real impact of their work This book examines what role NGOs really play in fighting poverty in Latin America Expert NGO professionals and scholars explore grass roots relationships between international religious and secular NGOs and poor communities They probe the power structures cultural assumptions dangers and possibilities that underlie NGOs work While fighting poverty is the mission of many NGOs most are aware that they often fail to make things better and in fact may make things worse By providing a forum for Northern and Southern NGOs donors scholars and poor people themselves this book explores the causes and cures of poverty and presses at the boundaries of our understanding of participatory development It identifies both internal and external factors that influence the success of NGO projects and moves beyond standard best practice theory to probe more deeply the relationships that underlie poverty and how these relationships can be shifted to achieve solutions **Third World**

Williams, 2015-05-26 The book examines the status of public service in developing countries in the sectors of health infrastructure labour and marginalized populations rural economy and public administration The last decade has witnessed significant government focus on service delivery in developing nations like South Africa Philippines India and Malaysia At the forefront of this movement has been the public sector reforms significantly driven by two broad factors public sector inefficiencies and liberal economic ideology This move towards efficient public service delivery in developing nations versus developed nations has required a significant shift in institutional thinking and institutional capacity for the governments It is therefore no surprise that while economic liberalization has been relatively easy to implement governance reforms towards public service delivery has been significantly more challenging In this background the chapters of the book with sector themes examine the three basic foundations of public policy courses of action regulatory measures and issues and funding

structures and priorities in public service delivery The book is a multi country multi sector perspective since it includes studies from Russian Federation India Ethiopia Pakistan Fiji South Africa Columbia Philippines Macedonia and India This perspective lends itself to the investigation for a comprehensive overall development model **Global Environmental**
