Johnson, 1879 **The Contemporary Construction of the Chinese Form of Marxist Literary Criticism** Yamin Hu, 2023-08-05 This open access book is the first comprehensive and systematic study of Chinese Marxist literary criticism as

an independent theoretical form It discusses and describes the theoretical features of the Chinese form of Marxist literary criticism by refining and re interpreting the iconic key concepts of people nation politics praxis along with the relationships between literature technology and capital Literary criticism and value judgment has also been discussed at length with insightful and valuable views being provided This book is a brilliant introduction to the topic and ideal academic material for global readers to grasp the essence of Chinese Marxist literary critical thought *The Return of Great Power Rivalry* Matthew Kroenig, 2020-02-13 The United States of America has been the most powerful country in the world for over seventy years but recently the U S National Security Strategy declared that the return of great power competition with Russia and China is the greatest threat to U S national security Further many analysts predict that America s autocratic rivals will have at least some success in disrupting and in the longer term possibly even displacing U S global leadership Brilliant and engagingly written *The Return of Great Power Rivalry* argues that this conventional wisdom is wrong Drawing on an extraordinary range of historical evidence and the works of figures like Herodotus Machiavelli and Montesquieu and combining it with cutting edge social science research Matthew Kroenig advances the riveting argument that democracies tend to excel in great power rivalries He contends that democracies actually have unique economic diplomatic and military advantages in long run geopolitical competitions He considers autocratic advantages as well but shows that these are more than outweighed by their vulnerabilities Kroenig then shows these arguments through the seven most important cases of democratic versus autocratic rivalries throughout history from the ancient world to the Cold War Finally he analyzes the new era of great power rivalry among the United States Russia and China through the lens of the democratic advantage argument By advancing a hard power argument for democracy Kroenig demonstrates that despite its many problems the U S is better positioned to maintain a global leadership role than either Russia or China A vitally important book for anyone concerned about the future of global geopolitics *The Return of Great Power Rivalry* provides both an innovative way of thinking about power in international politics and an optimistic assessment of the future of American global leadership [Catalog of Copyright Entries, Third Series](#) Library of Congress. Copyright Office, 1948 **The Senate and the People of Canada** James T. McHugh, 2017-09-20 The Senate of Canada is the upper house of its parliamentary system It is an appointed legislative chamber that has been frequently derided for its apparent lack of effective activity its failure to represent Canada s federal system and the perceived lack of accountability among its members Reform of the Senate persists as one of the most contentious issues in the country Typical reform proposals begin with the assumption that it must become an elected body that primarily represents Canada s provinces and can serve as an effective check on the federal government and the House of Commons This book challenges those assumptions through a thorough analysis that places the Senate within the context of other parliamentary upper houses It presents a hypothetical constitutional amendment and a proposal for non constitutional reform that are based upon alternative models derived from that broader context The book ultimately

recommends a Senate that remains unelected but with a more expansive appointment process that more appropriately reflects the optimal role of a parliamentary upper house as well as the diversity regional aspirations and political principles of Canadian democracy *Promising* William Vitek,2010-05-03 William Vitek enlarges our understanding by treating the act of promising as a social practice and complex human experience Citing engaging examples of promises made in everyday life in extraordinary circumstances and in literary works Vitek grapples with the central paradox of promising that human beings can intend a future to which they are largely blind Promising evaluates contemporary approaches to the topic by such philosophers as John Rawls John Searle Henry Sidgwick P S Atiyah and Michael Robbins but transcend their more limited focus on promissory obligation Vitek s innovative approach moves beyond theories of language ethics and law to unveil a complex human activity subject to shifting interpretations and changes in nature **Digital Information Culture** Luke

Nostalgia and Political Theory Lawrence Quill,2024-01-31 In Nostalgia and Political Theory Lawrence Quill advocates the central importance of nostalgia as a theoretical response to the historic past and a vertiginous present He does so by offering detailed analyses of diverse theoretical approaches from the ancient world to the modern day in order to reassess the relation between nostalgia and politics Quill proposes nostalgia as an organizing concept silently and not so silently influencing theorists as they construct critiques of the present or visions of the political future Nostalgia and Political Theory surveys key contributions to nostalgic and antinostalgic thinking from across the political spectrum Assessing the influence of photography radio television and personal computing on changing conceptions of the past Quill also considers the relation between populism nationalism and nostalgia By challenging those who would dismiss nostalgia as irrational or a symptom of cultural malaise Quill concludes by advancing the case for a liberal theory of nostalgia Nostalgia and Political Theory will be of interest to scholars and students in the fields of political theory social theory sociology philosophy political science memory studies and nostalgia studies **The Case for the Humanities** Eric Touya de Marenne,2016-12-01 Countering the perception that the humanities are unessential this volume contends that their well being has not only academic but also

cultural political and existential ramifications Our technologically driven world possesses the means of its own destruction while economic and financial policies undermine the very existence of our democracy At the same time the postmodern and post human age fundamentally challenges our ability and legitimacy to conceive future ideals It is within this context that the humanities provide essential paths through which the teaching and knowledge of other academic fields such as STEM and economics must be re envisioned In short the humanities must be brought back to the center of academic life The political and pedagogical implications of this interdisciplinary study thus entail a renewed critique to rethink the relation between higher education society and the world at large politically economically scientifically and technologically and the importance of the humanities within it At the heart of this reconsideration the humanities and humanity s fate and future become one

Ageing, Corporeality and Embodiment Chris Gilleard,Paul Higgs,2014-11-01 Ageing Corporeality and Embodiment outlines and develops an argument about the emergence of a new ageing during the second half of the twentieth century and its realisation through the processes of embodiment The authors argue that ageing as a unitary social process and agedness as a distinct social location have lost much of their purchase on the social imagination Instead this work asserts that later life has become as much a field for not becoming old as of old age The volume locates the origins of this transformation in the cultural ferment of the 1960s when new forms of embodiment concerned with identity and the care of the self arose as mass phenomena Over time these new forms of embodiment have been extended changing the traditional relationship between body age and society by making struggles over the care of the self central to the cultures of later life

annotates such book lists produced between the beginning of the sixteenth century and the mid seventeenth century it also reconstructs private library holdings of that period based on extant books The information thus derived is then entered into a uniform database which can be searched and from which material about those books and their owners is retrieved and published Publisher s website **Catalogue of Printed Books** British Museum,1886 **Another Sort of Learning** James V. Schall,2011-05-12 Noting the widespread concern about the quality of education in our schools Schall examines what is taught and read and not read in these schools He questions the fundamental premises in our culture which do not allow truth to be considered Schall lists various important books to read and why **Encyclopedia of Literary Translation Into English: A-L** O.
