The Dimensions of Time and the Challenge of School Reform Patricia C. Gandara, 2000-01-01 Annotation As the education reform movement matures into its second decade it is clear that many promising efforts have fallen short in their attempts to create real school change One reason for this is that the process of school reform is much more complex than most reformers realized or were willing to acknowledge The Dimensions of Time and the Challenge of School Reform points to another problem the problem of time and its role in both the success and failure of school reform efforts The importance of understanding the role that time plays in both learning and instruction and finding ways to provide time for teachers grappling with change and students learning to accommodate a new language and culture are important themes in this book This book is directed to policymakers and practitioners as well as to academics in that it combines theory with the real world experiences of many who have been active in the school reform movement and who have learned through trial and error how to think about time in innovative ways Book jacket

Pursuing Instructional Effectiveness in Higher Education Edwin George Ralph, 2004 The title of this book has two meanings One meaning expresses a sense of relief that during the last several years post secondary institutions have begun to pay serious attention to the enhancement of instruction on their campuses There has been an emergence of new organisations associations conferences seminars and workshops a proliferation of books journals and articles an expansion of research and investigative inquiry and a growth of interest among post secondary faculty members and administrators all of which are devoted to various aspects of the improvement of both teaching and learning at the undergraduate level These initiatives have combined to furnish undeniable evidence attesting to the pursuit of better teaching and learning in higher education Increasing numbers of post secondary educators students and tax payers at large not only welcome wholeheartedly this new emphasis and as suggested by the last clause in the title they feel it has been long overdue A second interpretation of the title and the one which is a key theme of this book emphasises the substantive concept of the use and management of time and timing as an integral component of effective instruction From the Introduction

**Teacher Education Policy** Rob McBride,2003-12-16 To improve schools we need to improve teachers This volume provides recent research evidence that suggests that current education policy is not Promoting Effective Teacher Education And That Teacher Education Policy has failed to support the formation of professional partnerships in initial teacher education has almost ignored the induction of newly qualified teachers and has narrowed in service education into support for the implementation of central policy The evidence gathered in this book is used to argue for new forms of teacher education in every phase built upon the foundation of professional partnership between schools and institutions of higher education It is suggested that the funding for such changes could be drawn from less effective forms of school improvement such as National Curriculum development and school inspection With the implementation of such changes it is argued good quality teacher education programmes would prosper and foster a broad consensus about educational development that is often absent

*Narrative and Experience in Multicultural Education* JoAnn Phillion, Ming Fang He, F. Michael Connelly, 2005-03-23 *Narrative and Experience in Multicultural Education* provides compelling stories that raise questions, advance understandings, and promote insight into the challenges and hopes of teaching for diversity and democracy. The works contained are compelling for the stories they tell and as such there is value in their presence. That the thoughtful reader can glean important lessons with respect to multicultural education and the value of narrative inquiry as academic disciplines is intellectual icing on the cake. Francisco Rios, University of Wyoming. This work is a very exciting, important, and badly needed piece of scholarship offered by some of the most leading edge professors in the field. The diversity and diverse viewpoints it presents are unparalleled in the field of education. Cheryl J. Craig, University of Houston. The narratives in this book allow readers to put a human face to an issue related to multicultural education. A reflective reader will begin to see himself/herself in the narratives of the text. Edmundo F. Litton, Loyola Marymount University. The inclusion of chapters that deal with classroom realities elevates the text for education teacher candidates above those existing volumes that tend to deal with multi-cultural issues in the abstract. One of the strengths of this volume is that it will resonate with new and experienced classroom practitioners. Jon G. Bradley, McGill University. *Narrative and Experience in Multicultural Education* explores the untapped potential that narrative and experiential approaches have for understanding multicultural issues in education. The research featured in the book reflects an exciting new way of thinking about human experience. The studies focus on the lives of students, teachers, parents, and communities, highlighting experiences seldom discussed in the literature. The authors are diverse and their inquiries are far ranging in terms of content, ethnic groups studied, and geographic locations. They also bring their personal experience to the inquiries, actively participate in the lives of the people with whom they work, care deeply about the concerns of their participants, and search for ways to act upon these concerns. Most importantly, the work emphasizes the understanding of experience and transforming this understanding into social and educational significance. Key Features: Addresses new ways to explore multicultural issues in education rather than relying on theoretical generalizations; the book focuses explicitly on individual and group experiences; Emphasizes the transformation of experience into education especially through the study of complex multicultural issues; Challenges readers' assumptions of multicultural issues by offering numerous narrative accounts and research studies for work with various ethnic groups. *Narrative and Experience in Multicultural Education* is designed for use in courses in multicultural education and qualitative research, especially in departments of education, anthropology, and sociology. Professional educators, researchers, and consultants will also find this a valuable introduction to narrative research and a welcome addition to the literature.
