**Encyclopedia of Cancer** Manfred Schwab, 2011-10-14

The merging of different basic and clinical science disciplines towards the common goal of fighting against cancer has long ago called for the establishment of a comprehensive reference source both as a tool to close the language gap between clinical and basic science investigators and as a platform of information for students and informed laymen alike The Encyclopedia of Cancer provides rapid access to focused information on all topics of cancer research for clinicians research scientists and advanced students Given the overwhelming success of the Second Edition which appeared in 2009 and fast recent development in the different fields of cancer research it has been decided to publish a third fully revised and expanded edition following the principal concept of the first edition that has proven so successful Recent developments are seeing a dynamic progress in basic and clinical cancer science with translational research increasingly becoming a new paradigm in cancer research In particular new approaches to both Personalized Cancer Medicine and Targeted Therapies have made promising progress While the Second Edition featured scholarly contributions from approximately 1 000 scientists clinicians in four Volumes the Third Edition

includes 1 300 contributors in 7 Volumes with an A Z format of approx 7000 entries It provides definitions of common acronyms and short definitions of related terms and processes in the form of keyword entries In addition there are detailed essays which provide comprehensive information on syndromes genes and molecules and processes and methods Each essay is well structured with extensive cross referencing between all entries In the Third Edition topical Essays present a comprehensive picture of major cancers such as Breast Cancer Colorectal Cancer Prostate Cancer Ovarian Cancer Renal Cancer Lung Cancer and Hematological Malignancies Leukemias and Lymphomas For each of these cancers different authoritative Essays are included that cover topics ranging from Pathology to Clinical Oncology and Targeted Therapies This new feature should meet the expectance that a wide community has towards a major cancer reference works The Encyclopedia of Cancer will be accessible both in print and online and this information source should be of value to both the clinical and basic scientific community as well as to the public

Global Challenges in Radiation Oncology Daniel Grant Petereit, 2015-07-13 In the United States much of the research is focused on developing new and very expensive technologies and drugs often without a major therapeutic benefit In resource limited countries basic oncology care is frequently lacking In addition the benefits of various chemo radiotherapy combinations for a number of malignancies are unknown as these populations have not been adequately investigated For oncologists in these countries who have marginal to adequate resources accrual to clinical trials is virtually non existent to minimal due to the complexities of their population and competing co morbidities As a result there is a tremendous disparity in treatment outcomes for these populations compared to those in developed countries Therefore we have asked a number of oncologists from different parts of the world to report their experience Topics that will be covered include locally advanced breast and cervical cancer India South Africa human resources for cancer control in India systematic review of radiation resources in low and middle income countries planning national radiotherapy services building sustainable partnerships through the newly formed ICEC International Cancer Export Corps cancer disparities among American Indians and training radiation oncologists in these under served parts of the world Authors will discuss lessons learned from their populations practical suggestions to address these disparities and how we as a global oncology community can address and mitigate these global challenges The editorial by Dr Coleman and myself highlights the invaluable contributions from our global contributors Thank you for taking the time to read this special issue on global cancer disparities We are all energized to begin addressing the needs of our cancer patients worldwide
