The Architect's Brain Harry Francis Mallgrave, 2011-05-25 *The Architect's Brain Neuroscience Creativity and Architecture* is the first book to consider the relationship between the neurosciences and architecture offering a compelling and provocative study in the field of architectural theory Explores various moments of architectural thought over the last 500 years as a cognitive manifestation of philosophical psychological and physiological theory Looks at architectural thought through the lens of the remarkable insights of contemporary neuroscience particularly as they have advanced within the last decade Demonstrates the neurological justification for some very timeless architectural ideas from the multisensory nature of the architectural experience to the essential relationship of ambiguity and metaphor to creative thinking

Architect Ruth Peltason, Grace Ong-Yan, 2017-11-07 In this completely revised and up to date edition the world's most accomplished architects Gehry Pei Meier Nouvel Piano and 37 more express their views on creativity inspiration and legacy in this visually stunning one of a kind collection The Pritzker Prize is the most prestigious international prize for architecture *Architect* includes all 42 recipients of the Pritzker Prize and captures in pictures and their own words their awe inspiring achievements Organized in reverse chronological order by laureate each chapter features four to six of the

architect's major works including museums libraries hotels places of worship and more The text culled from notebooks interviews articles and speeches illuminates the architect's influences and inspirations personal philosophy and aspirations for his own work and the future of architecture The book includes More than 1000 stunning photographs blueprints sketches and CAD drawings Architect offers an unprecedented view into the minds of some of the most creative thinkers dreamers and builders of the last three decades and reveals that buildings are political emotional and spiritual

Handbook of Research on Visual Computing and Emerging Geometrical Design Tools Amoroso, Giuseppe, 2016-04-11 Visual computing and descriptive geometry are multidisciplinary fields addressing the handling of images 3D models and other computer graphics These ideas are experiencing a revival due to emergent technologies and applications available to developers Based in traditional forms of design and architecture these fields are currently experiencing a bounty of new research based on old principles The Handbook of Research on Visual Computing and Emerging Geometrical Design Tools seeks to add to this knowledge base by considering these technologies from a designer's perspective rather than reiterating the principles of computer science It combines aspects of geometry and representation with emerging tools for CAD generation and visualization while addressing the digital heritage of such fields This book is an invaluable resource for developers students of both graphic and computer generated design researchers and designers

Contemporary Curtain Wall Architecture Scott Charles Murray, 2009-10-07 In Contemporary Curtain Wall Architecture building technology historian and architect Scott Murray traces the evolution of the curtain wall from early skeleton frame structures of the past to today's complex and technologically advanced configurations Presenting twenty four detailed case studies of exemplary structures completed in the last decade he reveals the curtain wall as one of the most enduring and malleable concepts of contemporary architecture capable of adapting intelligently to site constraints utilizing resources efficiently and offering unprecedented opportunities for innovations in digital design and fabrication material detailing and aesthetic expression Book Jacket

Translucent Building Skins Scott Murray, 2013-05-07 Exploring the design of innovative building enclosure systems or skins in contemporary architecture and their precedents in earlier twentieth century modern architecture this book examines the tectonics the history and the influence of translucency as a defining characteristic in architecture Highly illustrated throughout with drawings and full colour photographs the book shows that translucency has been and continues to be a fertile ground for architectural experimentation Each chapter presents a comparative analysis of two primary buildings a recent project paired with a historical precedent highlighting how architects in different eras have realized the distinctive effects of translucency The included buildings span a variety of program types ranging from a single family residence to a factory to a synagogue Whether it is Pierre Chareau's glass lens curtain wall at the Maison de Verre Frank Lloyd Wright's wall of stacked glass tubes at the Johnson Wax Research Tower or Peter Zumthor's use of acid etched glass in a double skin envelope at the Kunsthhaus Bregenz the included projects each offer an exemplary case study of innovations in materiality and

fabrication techniques Today among many contemporary architects there is an engagement with new technologies new material assemblies and new priorities such as sustainability and energy efficiency A resurgent interest in translucency as a defining quality in buildings has been an important part of this recent dialogue and this book makes essential reading for any architect looking to incorporate aspects of translucency into their buildings [A Hero's Many Faces](#) T. Horror in Architecture Joshua Comaroff, Ong Ker-Shing, 2024-01-23 A new edition of this extensive visual analysis of horror tropes and their architectural analogues Horror in Architecture presents an unflinching look at how horror genre tropes manifest in the built environment Spanning the realms of art design literature and film this newly revised and expanded edition compiles examples from all areas of popular culture to form a visual anthology of the architectural uncanny Rooted in the Romantic and Gothic treatment of horror as a serious aesthetic category Horror in Architecture establishes incisive links between contemporary horror media and its parallel traits found in various architectural designs Through chapters dedicated to distorted and monstrous buildings abandoned spaces extremes of scale and other structural peculiarities and featuring new essays on insurgent natures blobs and architectural puppets this volume brings together diverse architectural anomalies and shows how their unsettling effects deepen our fascination with the unreal Intended for both horror fans and students of visual culture Horror in Architecture turns a unique lens on the relationship between the human body and the artificial landscapes it inhabits Extensively

illustrated with photographs film stills and diagrams this book retrieves horror from the cultural fringes and demonstrates how its attributes permeate the modern condition and the material world *Architect Knows Best* Simon

Richards,2016-04-15 The idea that buildings could be used to reform human behaviour and improve society was fundamental to the modernist architecture and planning of people like Walter Gropius Le Corbusier and Jos Luis Sert in the first half of the 20th century Their proposals for functional zoning multi level transport high rise living and machine inspired aesthetics came under attack from the 1950s onwards and many alternative approaches to architecture and planning emerged It was thought that the environmental determinist strand of the discourse was killed off at this time as well This book argues that it was not but on the contrary that it has deepened and diversified Many of the most prominent architect planners continue to design with a view to improving the behaviour of individual people and of society at large By looking at and interviewing major figures and movements of recent years in Britain Europe and America including L on Krier Peter Eisenman Andr s Duany Jane Jacobs Robert Venturi and Denise Scott Brown it demonstrates the myriad ways that architect planners seek to shape human behaviour through buildings In doing so the book raises awareness of this strand within the discourse and examines its different purposes and manifestations It questions whether it is an ineradicable and beneficial part of architecture and planning or a regrettable throwback to a more authoritarian phase discusses why is it seldom acknowledged directly and whether it could be handled more responsibly and with greater understanding Richards does not provide any simple solutions but in conclusion is critical of architect planners who abuse the rhetoric of social reform simply to leverage their attempts to secure building commissions while being more sympathetic towards those who appear to have a sincere desire to improve society through their buildings **Four Museums** Stefan Buzas,2004 The book presents four of the most important contemporary museums of the world Each essay details the unique design concepts of each museum illustrated with interior and exterior details *New Stone Architecture* David Dernie,2003 A discussion of stone construction and the nature of stone as a material Aimed at practising architects and students this study describes the new technologies that make the new stone forms possible This is followed by 33 case studies from around the world *Harvard Design Magazine* ,2004

Totem and taboo in architectural imagination Alessandro Rocca,2022-05-18 Identify powerful features of the architecture of the present time seeking to illuminate hidden knowledge and processes through a few key concepts The image apparently it seems so essential to understand today s architecture but which on closer analysis turns out instead to be an absence an unsolved problem an enigma hidden behind a culture secretly afflicted by iconoclasm Post production and montage so relevant in the avant garde and now fixed as an indispensable but often hidden creative component The parody the hidden but almost always present humor that corrodes the immediate message of architecture and makes it more unstable and above all more interesting Ornament a component censored by Modernism that today is once again the protagonist in new guises The relationship with the classic a secret affair that remains as a founding root of Western

architecture **Unexpected Affinities** Pablo Meninato, 2018-05-23 While the concept of type has been present in architectural discourse since its formal introduction at the end of the eighteenth century its role in the development of architectural projects has not been comprehensively analyzed This book proposes a reassessment of architectural type throughout history and its impact on the development of architectural theory and practice Beginning with Laugier's 1753 Essay on Architecture Unexpected Affinities The History of Type in the Architectural Project from Laugier to Duchamp traces type through nineteenth and twentieth century architectural movements and theories culminating in a discussion of the affinities between architectural type and Duchamp's concept of the readymade Includes over sixty black and white images
