Raised Beaches Of The West Coast Of South West Africanamibia:

The Raised Beaches of the West Coast of South West Africa/Namibia Gudrun Corvinus,1983 **History of Namibia** Marion Wallace,2014-01-16 In 1990 Namibia gained its independence after a decades long struggle against South African rule and before that against German colonialism This book the first new scholarly general history of Namibia in two decades provides a fresh synthesis of these events and of the much longer pre colonial period A History of Namibia opens with a chapter by John Kinahan covering the evidence of human activity in Namibia from the earliest times to the nineteenth century and for the first time making a synthesis of current archaeological research widely available to non specialists In subsequent chapters Marion Wallace weaves together the most up to date academic research in English and German on Namibian history from the mid eighteenth century to the present She explores histories of migration production and power in the pre colonial period the changes triggered by European expansion and the dynamics of the period of formal colonialism The coverage of German rule includes a full chapter on the genocide of 1904 8 Here Wallace outlines the history and historiography of the wars fought in central and southern Namibia and the subsequent mass imprisonment of defeated Africans in concentration camps The final two chapters analyse the period of African nationalism apartheid and war between 1946 and 1990 The book s conclusion looks briefly at the development of Namibia in the two decades since independence A History of Namibia provides an invaluable introduction and reference source to the past of a country that is often neglected despite its significance in the history of the region and indeed for that of European colonialism and international relations It makes accessible the latest research on the country illuminates current controversies puts forward new insights and suggests future directions for research The book s extensive bibliography adds to its usefulness for scholar and general reader alike

Handbook of Pleistocene Archaeology of Africa Amanuel Beyin,David K. Wright,Jayne Wilkins,Deborah I. Olszewski,2023-08-17 This handbook showcases an Africa wide compendium of Stone Age archaeological sites and methodological advances that have improved our understanding of hominin lifeways and biogeography in the continent The focal time spans the Pleistocene Epoch c 2 5 million 11 700 years ago during which important human traits such as obligate bipedalism that freed the hands to engage in creative activities a large brain relative to body size language and social complexity developed in the general forms that they are found today The handbook is the first of its kind and it is expected to play a significant role in human evolutionary research by Collating the African Stone Age record which exists in a fragmented state along the lines of national boundaries and colonial experiences Showcasing emerging conceptual and methodological advances in African Pleistocene archaeology Providing reference datasets for teaching and researching African prehistory Making Africa s Stone Age record accessible to researchers and students based in Africa who may not have access to journal publications where most new field discoveries are published The Handbook features 128 chapters of which 116 are site entries grouped by the host countries and presented in an alphabetical order A number of those site related entries examine

multiple archaeological localities lumped under specific projects or study areas The rest of the contributions deal with methodological topics such as luminescence and radiocarbon dating field data recovery lithic analysis micromorphology and hominin fossil and zooarchaeological records of Pleistocene Africa The introductory chapter provides an historical overview of the development of Stone Age Paleolithic archaeology in Africa beginning in the mid 19th century and paleoenvironmental and chronological frameworks commonly used to structure the continent's Pleistocene record By making a good amount of African Stone Age literature accessible to researchers and the public we wish to promote interest in human evolutionary research in the continent and elsewhere Awarded the 2025 The Best Book Award by The Society of Africanist Archaeologists

The Lower !Garib – Orange River Luregn Lenggenhager, Martha Akawa, Giorgio Miescher, Romie

Nghitevelekwa, Ndidzulafhi Innocent Sinthumule, 2023-06-02 The Lower Garib or Orange River flows through the historical Namaqualand and since 1990 has formed the international border between Namibia and South Africa The contributors to this volume focus on this hardly discussed stretch of the Orange River to understand the region's social history geography and economy This book brings together scholars from Namibia South Africa and overseas as well as the knowledge and analysis from people living in the region In concise chapters and short portraits they discuss the region's past and present from a variety of perspectives

Middle-Stone-Age-Fundstellen in Südwest-Namibia Ralf Vogelsang, 1998-01-01 Axe Age

Naama Goren-Inbar, Sharon Gonen, 2024-11-01 Axe Age is dedicated to the Acheulian a unique cultural phenomenon with the longest duration and the widest distribution in the history of humanity The Acheulian lasted over 1 million years and is well known over three continents Africa Europe and Asia This stone tool tradition is characterized by its hallmark bifacial tools which include handaxes and cleavers Though this prehistoric culture has been investigated extensively for over a century countless questions have remained unanswered Many of them are addressed in this volume The volume of interest to both scholars and students presents original contributions that expand the scope of our understanding of this intriguing cultural entity The contributions cover a vast geographic terrain and a large array of issues expressing hominin cognitive abilities and behavioral modes such as landscape exploitation production of bifacial tools and their classification regional diversity transmission of knowledge transportation and discard patterns Of the many authors some are eminent scholars of worldwide reputation in Acheulian research while others are young scholars reporting on their original research data All of them contribute to gaining an improved understanding of the Acheulians and their culture

Before Modern Humans Grant S.

McCall, 2020-09-10 This fascinating volume assessing Lower and Middle Pleistocene African prehistory argues that the onset of the Middle Stone Age marks the origins of landscape use patterns resembling those of modern human foragers Inaugurating a paradigm shift in our understanding of modern human behavior Grant McCall argues that this transition related to the origins of home base residential site use occurred in mosaic fashion over the course of hundreds of thousands of years He concludes by proposing a model of brain evolution driven by increasing subsistence diversity and intensity

against the backdrop of larger populations and Pleistocene environmental unpredictability McCall argues that human brain size did not arise to support the complex patterns of social behavior that pervade our lives today but instead large human brains were co-opted for these purposes relatively late in prehistory accounting for the striking archaeological record of the Upper Pleistocene

Landscapes and Landforms of Namibia Andrew Goudie, Heather Viles, 2014-10-15 The landscapes of Namibia are of world class quality in beauty diversity and interest This book provides the first ever overview of the most important of these landscapes explains why they look as they do and evaluates why they are of note Writing from a geomorphological perspective the authors introduce the key processes and controls which influence landscape and landform development in Namibia Geological and tectonic background climate now and in the past vegetation and animals including humans are all identified as crucial factors influencing the landscape of Namibia today The book presents twenty one richly illustrated case studies of the most significant landscapes of Namibia ranging from the iconic Etosha Pan at the heart of the biggest wildlife conservation area in the north to the famous dunes and ephemeral river at Sossus Vlei in the heart of the Namib desert Each case study also contains a full list of the key references to the scientific work on that landscape The authors provide an assessment of the current state of conservation of these landscapes and their importance to tourism The book is recommended reading for anyone with a professional or amateur interest in the spectacular and intriguing landscapes of this part of southern Africa It provides a useful handbook for those travelling around Namibia and an invaluable reference guide for those interested in how landscapes develop and change
