Cancer, Perspective for Control Tak W. Mak, Tsung-Tang Sun, 1986 **RNA Tumor Viruses** Robin Weiss, 1984

Molecular Biology of Tumor Viruses: RNA tumor viruses John Tooze, 1981 **Chemoprophylaxis and Virus**

Infections of the Respiratory Tract J.S. Oxford, 2018-10-24 Originally it was our intention to produce a single volume book covering all aspects and approaches to the problem of specific inhibitors of respiratory viruses. However as the work progressed it became obvious that certain chapters because of the research interests of the authors concentrated particularly on influenza viruses. It seemed logical therefore to divide the book into two volumes the first emphasizing influenza and the second concentrating on other viruses as well as discussing important general aspects of drug screening and clinical testing although the second volume does have some chapters which deal mainly with influenza **The Oncogene Handbook** E.

Premkumar Reddy, Anna M. Skalka, Tom Curran, 1988 The field of Molecular Oncology has emerged in the last decade as an amalgamation of four of the foremost disciplines in cancer research: retrovirology, chemical carcinogenesis, cytogenetics and cell growth regulation. The subject matter for this book forms the unifying factor for these four areas. Although the field of Molecular Oncology is still comparatively young the technical vocabulary can be bewildering to the uninitiated. This book is clear in its divisions grouping oncogenes by biochemical activity or cellular localization; the large group of tyrosine kinases are compared by relevant features. The Oncogene Handbook allows ready access and supplies excellent cross referencing. An outstanding reference work giving basic information on each oncogene in a concise and uniform format. The fundamental importance of the subject area and its medical implications both reflected in The Oncogene Handbook provide students, scientists in other fields and clinicians with a very useful manual **Molecular Biology of Tumor Viruses** John
