Cities and the Grand Tour Rosemary Sweet,2012-10-04 A fascinating study of how British travellers experienced described and represented the cities they visited on the Grand Tour      **The Ruins Lesson** Susan Stewart,2020-01-15 How have ruins become so valued in Western culture and so central to our art and literature Covering a vast chronological and geographical range from ancient Egyptian inscriptions to twentieth century memorials Susan Stewart seeks to answer this question as she traces the appeal of ruins and ruins images and the lessons that writers and artists have drawn from their haunting forms Stewart takes us on a sweeping journey through founding legends of broken covenants and original sin the Christian appropriation of the classical past and images of decay in early modern allegory Stewart looks in depth at the works of Goethe Piranesi Blake and Wordsworth each of whom found in ruins a means of reinventing his art Lively and engaging *The Ruins Lesson* ultimately asks what can resist ruination and finds in the self transforming ever fleeting practices of language and thought a clue to what might truly endure      **Athens on the Frontier** Patrick Lee Lucas,2023-03-28 In 1811 architect Benjamin Henry Latrobe spurred American builders into action when he called for them to reject the corrupt Age of Dioclesian or the still more absurd and debased taste of Louis the XIV and to emulate instead the ancient temples of Greece In response people in the antebellum trans Appalachian region embraced the clean lines intricate details and stately symmetry of the Grecian style On newly built public buildings private homes and religious structures references to classical Greek architecture became the preferred ornamentation Several antebellum cities and towns adopted the moniker of Athens styling themselves as centers of culture education and sophistication As the trend grew American citizens understood the name as a link between the Grecian style and the founding principles of democracy signaling a change of taste in service to the larger American cultural ideal In *Athens on the Frontier* Patrick Lee Lucas examines the material culture of Grecian style buildings in antebellum America to help recover nineteenth century regional identities As communities worked to define their built landscape and develop a shared Western identity Lucas's study invites readers to question many of the assumptions Americans have made about divisions and cultural formation in antebellum society      The Life and Works of Robert Wood Rachel Finnegan,Lynda Mulvin,2022-01-06 *The Life and Works of Robert Wood 1717-1771* commemorates the Irish classicist and traveller on the 250th anniversary of his death and provides the general reader with a source book for the fascinating life and career of a much neglected figure in the realm of Irish eighteenth century travels and antiquarianism      *Bodybuilding* Martin Myrone,2005-01-01 Combining visual analysis social history and masculinity studies *Bodybuilding* effects a vivid image of this critical period in Britain's cultural history and establishes an ambitious new framework for the study of late eighteenth century art and gender **BOOK JACKET**      **Language and the Grand Tour** Arturo Tosi,2020-04-02 *Language is*

still a relatively under researched aspect of the Grand Tour This book offers a comprehensive introduction enriched by the amusing stories and vivid quotations collected from travellers writings providing crucial insights into the rise of modern vernaculars and the standardisation of European languages      **Elements of Architecture** Mikkel Bille,Tim Flohr

Sorensen,2016-02-26 *Elements of Architecture* explores new ways of engaging architecture in archaeology It conceives of architecture both as the physical evidence of past societies and as existing beyond the physical environment considering how people in the past have not just dwelled in buildings but have existed within them The book engages with the meeting point between these two perspectives For although archaeologists must deal with the presence and absence of physicality as a discipline which studies humans through things to understand humans they must also address the performances as well as temporal and affective impacts of these material remains The contributions in this volume investigate the way time performance and movement both physically and emotionally are central aspects of understanding architectural assemblages It is a book about the constellations of people places and things that emerge and dissolve as affective mobile performative and temporal engagements This volume juxtaposes archaeological research with perspectives from anthropology architecture cultural geography and philosophy in order to explore the kaleidoscopic intersections of elements coming together in architecture Documenting the ephemeral relational and emotional meeting points with a category of material objects that have defined much research into what it means to be human *Elements of Architecture* elucidates and expands upon a crucial body of evidence which allows us to explore the lives and interactions of past societies      *A City's Architecture* William Alvis Brogden,2016-12-05 When considering the successful design of cities the focus tends to be on famous examples such as Paris or Rome with equally successful but smaller and more remote examples being ignored In addition the more diffuse patterns of settlement of the north and western parts of Europe are hardly considered at all in comparison to the tightly formed urban centres of the Mediterranean However the diffuse town region is typical of our time whatever the location By analysing the development of a successful small city of ancient foundation which grew from a diffuse long settled and dense landscape then demonstrated a slow growth as a tight urban form before an early adoption of the designed landscape as town lessons can be learned These lessons may be useful in addressing the nature and growth of any city or city region The story of Aberdeen is just such an example Not only are the materials for its long history present its relations and concerns with the wider world are also well attested and many of the ideas which directed or significantly impinged on the design of cities were tested there or had their origin there As its form accumulated and developed over such a long time Aberdeen also suggests the idea of an architecture of the city This book examines the development and design of a city from three inescapable aspects its location and character of the landscape its own particular history of development and its cultural responses to various waves of thought
