Grudin, 2017-10-20 This book explores Andy Warhol s creative engagement with social class During the 1960s as neoliberalism perpetuated the idea that fixed classes were a

mirage and status an individual achievement Warhol's work appropriated images techniques and technologies that have long been described as generically American or middle class Drawing on archival and theoretical research into Warhol's contemporary cultural milieu Grudin demonstrates that these features of Warhol's work were in fact closely associated with the American working class The emergent technologies Warhol conspicuously employed to make his work home projectors tape recorders film and still cameras were advertised directly to the working class as new opportunities for cultural participation What's more some of Warhol's most iconic subjects Campbell's soup Brillo pads Coca Cola were similarly targeted since working class Americans under threat from a variety of directions were thought to desire the security and confidence offered by national brands Having propelled himself from an impoverished childhood in Pittsburgh to the heights of Madison Avenue Warhol knew both sides of this equation the intense appeal that popular culture held for working class audiences and the ways in which the advertising industry hoped to harness this appeal in the face of growing middle class skepticism regarding manipulative marketing Warhol was fascinated by these promises of egalitarian individualism and mobility which could be profound and deceptive generative and paralyzing charged with strange forms of desire By tracing its intersections with various forms of popular culture including film music and television Grudin shows us how Warhol's work disseminated these promises while also providing a record of their intricate tensions and transformations

overlooked aspect of Warhol's oeuvre providing an essential new perspective on the artist's legacy **Artists Respond** Melissa Ho, Thomas Crow, Erica Levin, Mignon Nixon, Martha Rosler, Smithsonian American Art Museum, 2019-04-02 Published in conjunction with the exhibition of the same name on view at the Smithsonian American Art Museum Washington DC March 15 2019 to August 18 2019 *Staging the Archive* Ernst van Alphen, 2014-11-15 Dedicated to art practices that mobilize the model of the archive *Staging the Archive* demonstrates the ways in which such archival artworks probe the possibilities of what art is and what it can do Through a variety of media methodologies and perspectives the artists surveyed here also challenge the principles on which the notions of organization evidence and documentation are built The earliest examples of the modern archival artwork were made in the 1930s but only since the 1960s have artists really embraced archival principles to inform structure and shape their works This includes practices that consist of archive construction archaeological investigation record keeping and the use of archived materials but also interrogations of the principles claims and effects of the archive *Staging the Archive* shows how artists read the concept of the archive against the grain questioning not only what the archive is and can be but what materials images or ideas can be archived Ernst van Alphen examines these archival artists and artworks in detail setting them within their social political and aesthetic contexts Exploring the works of Marcel Duchamp Marcel Broodthaers Christian Boltanski Annette Messager Fiona Tan and Sophie Calle among others he reveals how modern and contemporary artists have used and contested the notion of the archive to establish new relationships to history information and data **The Evolution of Conceptual Art In America** Kempton Mooney, 2000 *Comic Abstraction* Roxana Marcoci, 2007 Foreword by Glenn D Lowry Text by Roxana Marcoci **Aspects** Edward A. Vazquez, 2018-01-02 Stretching lengths of yarn across interior spaces American artist Fred Sandback 1943 2003 created expansive works that underscore the physical presence of the viewer This book the first major study of Sandback explores the full range of his art which not only disrupts traditional conceptions of material presence but also stages an ethics of interaction between object and observer Drawing on Sandback's substantial archive Edward A Vazquez demonstrates that the artist's work with all its physical slowness and attentiveness to place as well as its relationship to minimal and conceptual art of the 1960s creates a link between viewers and space that is best understood as sculptural even as it almost surpasses physical form At the same time the economy of Sandback's site determined practice draws viewers focus to their connection to space and others sharing it As Vazquez shows Sandback's art aims for nothing less than a total recalibration of the senses as the spectator is caught on neither one side nor the other of an object or space but powerfully within it **Art** Jonathan Vickery, Diarmuid Costello, 2007-01-01 The last few decades have witnessed an explosion in ideas and theories on art Art itself has never been so topical but much recent thinking remains inaccessible and difficult to use This book assesses the work of those thinkers including artists who have had a major impact on making criticizing and interpreting art since the 1960s With entries by leading international experts this book presents a concise critical appraisal

Anywhere or Not at All Peter Osborne, 2013-06-04 A new reading of the philosophy of contemporary art by the author of The Politics of Time Contemporary art is the object of inflated and widely divergent claims But what kind of discourse can open it up effectively to critical analysis Anywhere or Not at All is a major philosophical intervention in art theory that challenges the terms of established positions through a new approach at once philosophical historical social and art critical Developing the position that contemporary art is postconceptual art the book progresses through a dual series of conceptual constructions and interpretations of particular works to assess the art from a number of perspectives contemporaneity and its global context art against aesthetic the Romantic pre history of conceptual art the multiplicity of modernisms transcategoriality conceptual abstraction photographic ontology digitalization and the institutional and existential complexities of art space and art time Anywhere or Not at All maps out the conceptual space for an art that is both critical and contemporary in the era of global capitalism Winner of the 2014 Annual Book Prize of the Association for the Study of the Arts of the Present USA

Getting the Picture Jason E. Hill, Vanessa R. Schwartz, 2020-09-08 Powerful and often controversial news pictures promise to make the world at once immediate and knowable Yet while many great writers and thinkers have evaluated photographs of atrocity and crisis few have sought to set these images in a broader context by defining the rich and diverse history of news pictures in their many forms For the first time this volume defines what counts as a news picture how pictures are selected and distributed where they are seen and how we critique and value them Presenting the best new thinking on this fascinating topic this book considers the news picture over time from the dawn of the illustrated press in the nineteenth century through photojournalism's heyday and the rise of broadcast news and newsreels in the twentieth century and into today's digital platforms It examines the many kinds

of images sport fashion society celebrity war catastrophe and exoticism and many mediums including photography painting wood engraving film and video Packed with the best research and full colour illustrations throughout this book will appeal to students and readers interested in how news and history are key sources of our rich visual culture Monochrome Craig Staff,2015-09-17 The monochrome a single colour of paint applied over the entirety of a canvas remains one of the more contentious modernist artistic inventions But whilst the manufacture of these pictures of nothing was ostensibly straightforward their subsequent theorisation has been anything but More than a history Monochrome Darkness and Light in Contemporary Art is the first account of the monochrome s lively role in contemporary art Liberated from the burden of representation the monochrome first stood for emancipation an ideological and artistic impulse that characterised the avant garde of the early twentieth century Historically the monochrome embodied the most extreme form of abstraction and pure materiality Yet more recently adaptations of the art form have focused on a broader range of cultural and interpretive contexts Provocative innovative and timely this book argues that the latest artistic strategies go beyond stylistic concerns and instead seek to re engage with ideas around authorship process and the conditions of the visible as they are given and understood through both light and darkness Discussing works by artists such as Katie Paterson Hiroshi Sugimoto Tom Friedman Bruno Jakob Sherrie Levine and Ceal Floyer the book shows that the debates around an artwork s form and its possibility for meaning that the monochrome first engendered remain very much alive in contemporary visual culture
