Safer Childbirth A Critical History Of Maternity Care:

Safer Childbirth? Marjorie Tew, 2013-11-11 Since the first edition went to press in 1989 there have been many important developments concerning different aspects of maternity care To take account of these much needs to be added to this history Late 1989 saw the publication of the double volume set of studies *Effective Care in Pregnancy and Childbirth* in which all the then existing evidence on all the associated procedures was considered and evaluated by well informed and impartial authors representing many countries This informative collection has since been followed by a flow of single reports of new research findings about specific subjects within the field To incorporate the new material has involved in particular a considerable enlargement and rearrangement of the text and reference lists for Chapters 3 and 4 which deal with antenatal and intranatal care Then in 1990 the House of Commons Health Committee under its chairman Nicholas Winterton undertook a further enquiry into the maternity services in Britain A wide range of people concerned as providers or users of the service as well as researchers concerned to find out how well the service was meeting needs chose to submit testimonies written and oral These testimonies were all later published in six volumes which offered a most valuable depiction of the maternity service from many points of view

Safer Childbirth? Marjorie Tew, Jill Curtis, 1998 In the text's first edition Marjorie Tew showed through her painstaking statistical analysis of perinatal mortality rates for hospital and home that for some women hospital birth might actually be more dangerous than home birth These findings and further compelling evidence gathered by the House of Commons Health Committee in 1992 should have revolutionized the direction of maternity care This third edition considers the evidence on which the recommended changes in policy were made and the implications of implementing them

Women, Power, and Childbirth Kathleen D. Turkel, 1995-11-06 Based on her 12 year study of a free standing birth center Turkel analyzes the medical model of childbirth in contrast to the midwifery model In the medical model of birth women are defined as patients and birth takes place in hospitals where women have little if any control over their experience The midwifery model views birth as a healthy process where midwives act as teachers and guides for women during pregnancy and birth helping women and their families to shape and define their experience to meet their needs and expectations Under existing legal and cultural circumstances free standing birth centers face a dilemma They must continually accommodate the medical model while trying to maintain the midwifery model and give women an option to home birth or to hospital birth

Men and Maternity Rosemary Mander, 2004-08-02 Since the development of modern medicine men have become increasingly involved in childbearing as obstetricians and more recently as fathers This book argues that the beneficial contribution of men has been taken for granted Certain changes to childbearing practice have resulted which together with men's involvement have been encouraged without any reference to evidence and without adequate opportunity

for reflection Considering the findings of recent research and wider literature and using qualitative research with mothers the text examines how men became increasingly involved in childbearing the medicalisation of childbirth the difficulties men experience with childbirth as fathers challenging situations such as fathers grief the taken for granted assumptions that men s increased contribution to childbearing is beneficial This text will be of great interest to academics and postgraduate students of midwifery obstetrics medicine and health studies as well as practising midwives and obstetricians health visitors childbirth educators and labor and delivery room nurses Medical Anthropology Cecil G.
