Naturalists Adventure In Nepal:

Development and Public Health in the Himalaya Ian Harper, 2014-02-05 Engaging with a range of public health issues this book charts important social and political transitions in Nepal through the lens of medicine and health development It focuses on mission health care institutions tuberculosis control programmes as a site of medical intervention the pharmaceuticalization of mental health and public health and in relation to development ideologies the attempted creation of modern subjects and citizens to advance the health of the nation Based on two decades of experience both as a physician and public health professional and an anthropologist the author presents these issues through four case studies of health programme intervention in a district in central Nepal to show the inter related aspects of the processes The book explains how local realities align with resist and are complicated by globalized narratives and practices of health and development It pays careful attention to traditional healers infectious disease micronutrient initiatives mental health and the historical ideological and political economic context of mission based development work Offering an ethnographic picture of the challenges and possibilities for action that exist in Nepal this book is of interest to academics in the field of medical and development anthropology and those working directly in the fields of health and development

Ornithology in Laboratory and Field Olin Sewall Pettingill, 2013-10-02 Ornithology in Laboratory and Field is intended as an aid to ornithological study at the college or university level Students who lack the background knowledge usually acquired during a course in general zoology or biology should keep it handy for ready reference a standard elementary text on the subject This book contains extensive material for purely informational reading possibly enough to supplant the need of an additional textbook Its principal purpose still complies with the title of its predecessors for it is essentially a manual to guide and assist the student in direct observations All twenty sections except the last The Origin Evolution and Decrease of Birds suggest methods and provide instructions for studies and all conclude with an extensive list of references frequently annotated for further information The twenty sections of the book can be taken up in almost any order and some may be omitted without affecting the instructional value of the others A feature of this new edition is an introduction to birds and ornithology intended for reading at the beginning of a course The purpose is twofold to show the significance of birds for study and to give an overall preview of ornithology the subject with emphasis on its wide scope how it is studied and some of the continuing and exciting opportunities that it offers for investigation

Fallen Giants Maurice Isserman, Stewart Angas Weaver, Dee Molenaar, 2010-01-01 In the first comprehensive history of Himalayan mountaineering in 50 years the authors offer detailed original accounts of the most significant climbs since the 1890s and they compellingly evoke the social and cultural worlds that gave rise to those expeditions

Press,1987 **Subject Guide to Books in Print**,1991 *British Naturalists in Qing China* Fa-ti FAN,Fa-ti Fan,2009-06-30 In the eighteenth and nineteenth centuries Western scientific interest in China focused primarily on natural history Prominent scholars in Europe as well as Westerners in China including missionaries merchants consular officers and visiting plant hunters eagerly investigated the flora and fauna of China Yet despite the importance and extent of this scientific activity it has been entirely neglected by historians of science This book is the first comprehensive study on this topic In a series of vivid chapters Fa ti Fan examines the research of British naturalists in China in relation to the history of natural history of empire and of Sino Western relations The author gives a panoramic view of how the British naturalists and the Chinese explored studied and represented China's natural world in the social and cultural environment of Qing China Using the example of British naturalists in China the author argues for reinterpreting the history of natural history by including neglected historical actors intellectual traditions and cultural practices His approach moves beyond viewing the history of science and empire within European history and considers the exchange of ideas aesthetic tastes material culture and plants and animals in local and global contexts This compelling book provides an innovative framework for understanding the formation of scientific practice and knowledge in cultural encounters Table of Contents Acknowledgments Introduction I The Port 1 Natural History in a Chinese Enterprise 2 Art Commerce and Natural History II The Land 3 Science and Informal Empire 4 Sinology and Natural History 5 Travel and Fieldwork in the Interior Epilogue Appendix Selected Biographical Notes Abbreviations Notes Index Fa ti Fan's study of the encounter between the British culture of the naturalist and the Chinese culture of the Qing is both a delight and a revelation The topic has scarcely been addressed by historians of science and this work fills important gaps in our knowledge of British scientific practice in a noncolonial context and of Chinese reactions to Western science in the eighteenth and nineteenth centuries In addition to the culture of Victorian naturalists and Sinology Fan shows an admirable grasp of visual

representation in science Chinese taxonomic schemes Chinese export art British imperial scholarship and journeys of exploration His treatment of the China trade and descriptions of Chinese markets and nurseries are especially welcome I learned a great deal and I strongly recommend this book Philip Rehbock author of *Philosophical Naturalists Themes in Early Nineteenth Century British Biology* By focusing on the experiences of British naturalists in China during a time when it was gradually being opened up to foreign influences Fan makes at least two important contributions to history of science He gives us an authoritative study of British naturalists in China as far as I know the only one of its kind and he forces us to rethink some of our categories for doing history of science including how we conceive of the relationship between science and imperialism and between Western naturalist and native Fan's scholarship is meticulous with careful attention to detail and his prose is clear controlled and succinct Bernard Lightman editor of *Victorian Science in Context*
