**Planning a Small Scale Library Building. Flexibility and Sustainability** Anura Karunanayake,2017-10-09 Document from the year 2017 in the subject Library Science Information Documentation Science language English abstract The well secured library building is essential for providing a better community service for various kinds of public information use and needs It is a highly respected and commonly used place of one s culture from the far back of the evolution of the civilization Society development in every means such as economically and culturally depends on the knowledge possessed by its own people Therefore the place where the knowledge is stored considered as a monumental place The term library building referred in this book has a very wide and peculiar meaning This book does not merely consider the construction aspect of the building but discusses the needs to be considered in construction from users and librarians point of view It must be noted that the term library building will readily be judged that it cannot interpret to be an architectural aspect of the building as well This book is intended to provide some useful information for library personals students who are learning library designing as well as architects who don t have basic knowledge of library needs and requirements These three parties as a team need to know how important it is to have practical information on library buildings in a book Each chapter of this book will provide materials as well as practical applications in organizing a library building or converting an existing building to a library

*IFLA Library Building Guidelines* Karen Latimer,Hellen Niegaard,2007 The information society and the information age are changing library services as well as library premises This raises questions about what needs to be considered when planning and designing new library buildings in order to achieve attractive efficient and future oriented new library spaces This new publication provides information and guidelines for the building planning process whether you are planning a new public or academic library building It reflects on fundamental issues on new development trends and on the planning process The library building process is seen from both the library manager s perspective as well as that of the architect and designer Issues covered include what to consider when investigating the need for space library design from a marketing viewpoint green management and sustainability relating to library buildings and a layman s guide to reading plans This publication and the IFLA guidelines provided are not seen as a traditional set of recommendations to be rigidly adhered to since this would be unrealistic in a fast changing and global context Rather library managers and architects should read them in order to inform their thinking on key issues and establish a planning programme They must then relate them to their own countries and circumstances by making the relevant local adjustments
