Teaching Undergraduate Science Linda C. Hodges, 2023-07-03 This book is written for all science or engineering faculty who have ever found themselves baffled and frustrated by their undergraduate students lack of engagement and learning The author an experienced scientist faculty member and educational consultant addresses these issues with the knowledge of faculty interests constraints and day to day concerns in mind Drawing from the research on learning she offers faculty new ways to think about the struggles their science students face She then provides a range of evidence based teaching strategies that can make the time faculty spend in the classroom more productive and satisfying Linda Hodges reviews the various learning problems endemic to teaching science explains why they are so common and persistent and presents a digest of key ideas and strategies to address them based on the research she has undertaken into the literature on the cognitive sciences and education Recognizing that faculty have different views about teaching different comfort levels with alternative teaching approaches and are often pressed for time Linda Hodges takes these constraints into account by first offering a framework for thinking purposefully about course design and teaching choices and then providing a range of strategies to address very specific teaching barriers whether it be students motivation engagement in class ability to problem solve their reading comprehension or laboratory research or writing skills Except for the first and last chapters the other chapters in this book stand on their own i.e. can be read in any order and address a specific challenge students have in learning and doing science Each chapter summarizes the research explaining why students struggle and concludes by offering several teaching options categorized by how easy or difficult they are to implement Some for example can work in a large lecture class without a great expenditure of time others may require more preparation and a more adventurous approach to teaching Each strategy is accompanied by a table categorizing its likely impact how much time it will take in class or out and how difficult it will be to implement Like scientific research teaching works best when faculty start with a

goal in mind plan an approach building on the literature use well tested methodologies and analyze results for future trials Linda Hodges message is that with such intentional thought and a bit of effort faculty can succeed in helping many more students gain exciting new skills and abilities whether those students are potential scientists or physicians or entrepreneurs Her book serves as a mini compendium of current research as well as a protocol manual a readily accessible guide to the literature the best practices known to date and a framework for thinking about teaching **Journal of Rural Education**,1924 **Educational Times** ,1898 **Hug a Tree** Robert E. Rockwell,Elizabeth A. Sherwood,Robert A. Williams,1983 Ideas and activities involving the natural environment **Research in Early Childhood Science Education** Kathy Cabe Trundle,Mesut Saçkes,2015-04-15 This book emphasizes the significance of teaching science in early childhood classrooms reviews the research on what young children are likely to know about science and provides key points on effectively teaching science to young children Science education an integral part of national and state standards for early childhood classrooms encompasses not only content based instruction but also process skills creativity experimentation and problem solving By introducing science in developmentally appropriate ways we can support young children s sensory explorations of their world and provide them with foundational knowledge and skills for lifelong science learning as well as an appreciation of nature This book emphasizes the significance of teaching science in early childhood classrooms reviews the research on what young children are likely to know about science and provides key points on effectively teaching young children science Common research methods used in the reviewed studies are identified methodological concerns are discussed and methodological and theoretical advances are suggested
