Reason And Commitment:

Reason and Commitment Roger Trigg, 1973 Dr Trigg demonstrates the importance of subjecting our most ingrained views to philosophical analysis and criticizes the tendency to sacrifice truth and reason for convention **Reason and Commitment** , Reason and Nature José Luis Bermúdez, Alan Millar, 2002 Reason and Nature investigates the normative dimension of reason and rationality and how it can be situated within the natural world Nine philosophers and two psychologists address three main themes The first concerns the status of norms of rationality and in particular how it is possible to show that norms we take to be objectively authoritative are so in fact The second has to do with the precise form taken by the norms of rationality The third concerns the role of norms of rationality in the psychological explanation of belief and action It is widely assumed that we use the normative principles of rationality as regulative principles governing psychological explanation This seems to demand that there is a certain harmony between the norms of rationality and the psychology of reasoning What then should we make of the well documented evidence suggesting that people consistently fail to reason well And how can we extend the model to non language using creatures As this collection testifies current work in the theory of rationality is subject to very diverse influences ranging from experimental and theoretical psychology through philosophy of logic and language to metaethics and the theory of practical reasoning This work is pursued in various philosophical styles and with various orientations Straight down the line analytical and largely a priori enquiry contrasts with empirically constrained theorizing A focus on human rationality contrasts with a focus on rationality in the wider natural world As things stand work in one style often proceeds in isolation from work in others If progress is to be made on rationality theorists will need to range widely Reason and Nature will provide a stimulus to that endeavour **Institutional Treatment of Delinquent Boys** Alida C. Comparability of Maternal Mortality Rates in the United States and Certain Foreign Countries Alida C. Bowler, Elizabeth Carpenter Tandy, Ella Gardner, Ella Oppenheimer, Mary Elizabeth Skinner, United States. Children's Bureau, Ruth S. Bloodgood, 1935 *Institutional Treatment of Delinquent Boys*, 1936 *Agency and Autonomy in Kant's Moral Theory* Andrews Reath, 2006-02-23 Andrews Reath presents a selection of his best essays on various features of Kant's moral psychology and moral theory with particular emphasis on his conception of rational agency and his conception of autonomy The opening essays explore different elements of Kant's views about motivation including his account of respect for morality as the distinctive moral motive and his view of the principle of happiness as a representation of the shared structure of non moral choice These essays stress the unity of Kant's moral psychology by arguing that moral and non moral considerations motivate in essentially the same way Several of the essays develop an original approach to Kant's conception of autonomy that emphasizes the political metaphors found throughout Kant's writings on ethics They argue that autonomy is best interpreted not as a psychological capacity but as a kind of sovereignty in claiming that moral agents have autonomy Kant regards them as a kind of sovereign legislator with the power to give moral law through their willing The final essays explore some of the implications of this conception of autonomy elsewhere in Kant's moral thought arguing that his Formula of Universal Law uses this conception of autonomy to generate substantive moral principles and exploring the connection between Kantian self legislation and duties to oneself The collection offers revised versions of several previously published essays as well as two new papers Autonomy of the Will as the Foundation of Morality and Agency and Universal Law It will be of interest to all students and scholars of Kant and to many moral philosophers

The Logic of Commitment Gary Chartier, 2017-07-20 This book develops and defends a conception of commitment and explores its limits Gary Chartier shows how commitment serves to resolve conflicts between ordinary moral intuitions and the reality that the basic aspects of human well being are incommensurable He outlines a variety of overlapping and mutually reinforcing rationales for making commitments explores the relationship between commitment and vocation and the relevance of commitment to love and notes some reasons why it might make sense to disregard one's commitments The Logic of Commitment will appeal to ethicists interested in the connection between commitment and personal well being and to anyone who wonders why and when it might make sense to make or keep commitments

The Moral Universe John Bengson, Terence Cuneo, Russ Shafer-Landau, 2024-06-24 The Moral Universe marks an importance advance in metaethical thinking offering the most sustained and sophisticated development of nonnaturalistic moral realism to date Employing a

novel philosophical method it addresses central questions in metaethics concerning the nature of moral reality its fundamental laws its relation to the natural world and its normative authority The authors advance new ways of answering these questions contending that moral standards regarding what to do and how to be are not only objectively authoritative but essentially so Rather than arising from personal schemes or collective ideals morality flows from the nature of things One of the principal aims of the book is to show how this view accommodates and explains a wide range of data concerning the metaphysical and normative dimensions of morality Along the way the book offers novel characterizations of moral realism and nonnaturalism defends and explains the existence of substantive moral conceptual truths supplies a new treatment of moral supervenience substantiates the categoricity and importance of moral reasons and presents a strategy for identifying the source of morality Exemplifying a commitment to the integrity of moral philosophy *The Moral Universe* also tackles fundamental issues in value theory and normative ethics in the service of developing a systematic explanatorily potent version of nonnaturalist realism Publications of the Children's Bureau United States. Intellectual, Humanist and Religious Commitment Peter Forrest,2019-07-25 This book offers a rigorous analysis of why commitment matters and the challenges it presents to a range of believers Peter Forrest treats commitment as a response to lost innocence He considers the intellectual consequences of this by demonstrating why for example we should not believe in angels He then explores why humans are attached to reason and to humanism recognising the different commitments made by theist and non theist humanists Finally he analyses religious faith specifically fideism defining it by way of contrast to Descartes Pascal and William James as well as contemporary philosophers including John Schellenberg and Lara Buchak Of particular interest to scholars working on the philosophy of religion the book makes the case both for and against committing to God recognising that God's divine character sets up an emotional rather than an intellectual barrier to commitment to worship **The Criminal Law Review** ,1914 **Reprints of the Criminal Rulings of the Chief Court of the Punjab**

Punjab. Chief Court,Alan Brice Broadway,Arthur Llewelyn Danson,1923 *Time and the Philosophy of Action* Roman Altshuler,Michael J. Sigrist,2016-06-10 Although scholarship in philosophy of action has grown in recent years there has been little work explicitly dealing with the role of time in agency a role with great significance for the study of action As the articles in this collection demonstrate virtually every fundamental issue in the philosophy of action involves considerations of time The four sections of this volume address the metaphysics of action diachronic practical rationality the relation between deliberation and action and the phenomenology of agency providing an overview of the central developments in each area with an emphasis on the role of temporality Including contributions by established rising and new voices in the field *Time and the Philosophy of Action* brings analytic work in philosophy of action together with contributions from continental philosophy and cognitive science to elaborate the central thesis that agency not only develops in time but is shaped by it at every level
