## **Reason And History Or Only A History Of Reason:**

Between Reason and History David S. Owen, 2002-07-18 The first book length treatment in English of Habermas's theory of social evolution and progress

**Powers of Distinction** Nancy Levene, 2017-12-06 In this major new work philosopher of religion Nancy Levene examines the elemental character of religion and modernity. Deep in their operating systems she argues are dualisms of opposition and identity that cannot be reconciled with the forms of life they ostensibly support. These dualisms are dead ends but they conceal a richer position, another kind of dualism constitutive of mutual relation. This dualism is difficult to distinguish and its concept of relation difficult to commit to. It risks contention and even violence. But it is also the indispensable support for modernity's most innovative ideals: democracy, criticism and interpretation. In readings from Abraham to the present, Levene recovers this richer dualism in its difference from the alternatives: other dualisms, nondualism, multiplication. From Abraham we get the biblical call to give up tribal belonging for a promised land of covenantal relation. Yet modernity, inclusive of this call, is also the principle that critiques the promise when it divides self from other, us from them. Drawing on a long tradition of thinkers and scholars, even as she breaks new ground, Levene offers here nothing less than a new way of understanding modernity as an ethical claim about our world: a philosophy of the powers of distinction to include rather than to divide.

**Reason and Nature** Morris R. Cohen, 2018-12-14 First published in 1931, this volume represents the culmination of twenty years of the study on the principles of science. Noticing a widespread craving for philosophical light at a time of scant such offerings, Morris R. Cohen aimed to demonstrate here the fundamental and ancient connection between nature and science, between hearts and minds, in an attempt to salve the developing mutual hostility between the two in the 1920s. The volume bears particular relation to George Santayana's *Life of Reason* and Bertrand Russell's *Principles of Mathematics* and explores areas including the character of the insurgence against reason and reason in the contexts of the natural and social sciences.

*Theology in the Age of Scientific Reasoning* Nancey Murphy, 2018-07-05 In this timely and provocative book, Nancey Murphy sets out to dispel skepticism regarding Christian belief. She argues for the rationality of Christian belief by showing that theological reasoning is similar to scientific reasoning as described by contemporary philosophy of science. Murphy draws on new historicist accounts of science, particularly that of Imre Lakatos. According to Lakatos, scientists work within a research program consisting of a fixed core theory and a series of changing auxiliary hypotheses that allow for prediction and explanation of novel facts. Murphy argues that strikingly similar patterns of reasoning can be used to justify theological assertions. She provides an original characterization of theological data and explores the consequences for theology and philosophy of religion of adopting such an approach.

**A Global History of Modern Historiography** Georg G Iggers, Q. Edward Wang, Supriya Mukherjee, 2013-09-13 So far histories of historiography have concentrated almost exclusively on the West This is the first book to offer a history of modern historiography from a global perspective Tracing the transformation of historical writings over the past two and half centuries the book portrays the transformation of historical writings under the effect of professionalization which served as a model not only for Western but also for much of non Western historical studies At the same time it critically examines the reactions in post modern and post colonial thought to established conceptions of scientific historiography A main theme of the book is how historians in the non Western world not only adopted or adapted Western ideas but also explored different approaches rooted in their own cultures

**The Discipline of History and the History of Thought** M.C. Lemon, 2002-06-01 Although much has been written of the nature of history and its disciplinary problems less attention has been paid to the history of thought M C Lemon's rigorously philosophical work first re asserts the discipline of history in general as narrative based before pursuing the methodological implications for the

history of thought This original work of scholarship will raise the level of argument in philosophy of history and provoke debate among historians philosophers and political theorists      **Faith, Reason, and Beyond Reason** Mark J.

Boone,2024-07-16 The relationship between faith and reason is multifaceted Faith transcends reason in that it is more than reason alone can contain or fully guarantee yet it is neither unreasonable nor something to which reason is irrelevant and reason says some pretty fine things about it This volume updates nine previously published articles on faith and reason by a Christian philosopher who has been studying these matters for two decades alongside one new essay and a philosophical dialogue These articles explain and integrate key ideas on faith and reason including Alvin Plantinga s account of how Christian belief can be knowledge even without evidence defenses of faith from Augustine and William James accounts of empirical evidence for faith from different world religions the distinction between faith and sight in the New Testament the structure of the evidence for the authority of the Bible the idea that faith transcends reason because some articles of faith are beyond human comprehension even if we have evidence that they are true and the nature of faith as a total commitment beyond what the evidence alone can guarantee      Historical Roots of Cognitive Science Theo C. Meyering,2012-12-06

Cognitive science in Howard Gardner s words has a relatively short history but a very long past While its short history has been the subject of quite a few studies published in recent years the current book focuses instead on its very long past It explores the emergence of the conceptual framework that was necessary to make the rise of modern cognitive science possible in the first place Over the long course of the history of the theory of perception and of cognition various conceptual breakthroughs can be discerned that have contributed significantly to the conception of the mind as a physical symbol system with intricate representational capacities and unimaginably rich computational resources In historical retrospect such conceptual transitions seemingly sudden and unannounced are typically foreshadowed in the course of enduring research programs that serve as slowly developing theoretical constraint structures gradually narrowing down the apparent solution space for the scientific problems at hand Ultimately the fundamental problem is either resolved to the satisfaction of the majority of researchers in the area of investigation or else and much more commonly one or more of the major theoretical constraints is abandoned or radically modified giving way to entirely new theoretical vistas In the history of the theory of perception this process can be witnessed at various important junctures      What Reason Promises Wendy Doniger,Peter

Galison,Susan Neiman,2016-06-20 This collection demonstrates the range of approaches that some of the leading scholars of our day take to basic questions at the intersection of the natural and human worlds The essays focus on three interlocking categories Reason stakes a bigger territory than the enclosed yard of universal rules Nature expands over a far larger region than an eternal category of the natural And history refuses to be confined to claims of an unencumbered truth of how things happened      **Designing the City of Reason** Ali Madanipour,2007-04-11 With a practical approach to theory Designing the

City of Reason offers new perspectives on how differing belief systems and philosophical approaches impact on city design
