**Journal on Data Semantics IV** Stefano Spaccapietra, 2005-12-12 Semantics in data visualization Semantic services for mobile users Supporting tools Applications of semantic driven approaches These topics are to be understood as specifically related to semantic issues Contributions submitted to the journal and dealing with semantics of data will be considered even if they are not within the topics in the list While the physical appearance of the journal issues is like the books from the well known Springer LNCS series the mode of operation is that of a journal Contributions can be freely submitted by authors and are reviewed by the Editorial Board Contributions may also be invited and nevertheless carefully reviewed as in the case for issues that contain extended versions of the best papers from major conferences addressing data semantics issues Special issues focusing on a specific topic are coordinated by guest editors once the proposal for a special issue is accepted by the Editorial Board Finally it is also possible that a journal issue be devoted to a single text

*Computational Intelligence: A Compendium* John Fulcher, 2008-05-28 Computational Intelligence A Compendium presents a well structured overview about this rapidly growing field with contributions from leading experts in Computational Intelligence The main focus of the compendium is on applied methods tried and proven as being effective to realworld problems which is especially useful for practitioners researchers students and also newcomers to the field This state of handbook style book has contributions by leading experts

**Conceptual Structures for Knowledge Creation and Communication** Aldo de Moor, Wilfried Lex, Bernhard Ganter, 2003-09-09 This volume contains the proceedings of ICCS 2003 the 11th International Conference on Conceptual Structures This conference series continues to be the main forum for the presentation and discussion of state of the art research on conceptual structures The theories methodologies and techniques presented here have grown considerably in scope in recent years On the other hand solid bridges spanning the boundaries between such diverse fields as Conceptual Graphs Formal Concept Analysis and others are increasingly being built in our community The theme of this year's conference was Conceptual Structures for Knowledge Creation and Communication In our increasingly interconnected world the potential support of information technology for the creation and communication of quality knowledge is almost boundless However in reality many conceptual barriers prevent the use of this potential The main problem is no longer in the technological infrastructure but in how to navigate use and manage the wealth of available data resources Thus the question is how to create and communicate from data the information and ultimately the knowledge

required by an ever more complex and dynamic society Conceptual structures research focuses on what is behind and between the data glut and the information overload that need to be overcome in answering this question In this way our editor contributes important ideas on how to actually realize some of the many still ambitious visions All regular papers were reviewed in a thorough and open process by at least two reviewers and one editor Conceptual Structures: Standards and Practices William M. Tepfenhart, Walling Cyre, 2007-07-23 With all of the news about the Internet and the Y2K problem it is easy to forget that other areas of computer science still exist Reading the newspaper or watching the television conveys a very warped view of what is happening in computer science This conference illustrates how a maturing subdiscipline of computer science can continue to grow and integrate within it both old and new approaches despite or perhaps due to a lack of public awareness The conceptual graph community has basically existed since the 1984 publication of John Sowa's book Conceptual Structures Information Processing In Mind and Machine In this book John Sowa laid the foundations for a knowledge representation model called conceptual graphs based on semantic networks and the existential graphs of C S Peirce Conceptual graphs constitute a very powerful and expressive knowledge representation scheme inheriting the benefits of logic and the mathematics of graphs The expressiveness and formal underpinnings of conceptual graph theory have attracted a large international community of researchers and scholars The International Conferences on Conceptual Structures and this is the seventh in the series is the primary forum for these researchers to report their progress and activities As in the past the doors were open to admit alternate representation models and approaches **AI 2001: Advances in Artificial Intelligence** Markus Stumptner, 2001-11-28 This book constitutes the refereed proceedings of the 14th Australian Joint Conference on Artificial Intelligence AI 2001 held in Adelaide Australia in December 2001 The 55 revised full papers presented together with one invited contribution were carefully reviewed and selected from a total of 100 submissions The papers cover the whole range of artificial intelligence from theoretical and foundational issues to advanced applications in a variety of fields **Conceptual Structures**, 2003 **AI 2001: Advances in Artificial Intelligence** Mike Brooks, Dan Corbett, Markus Stumptner, 2003-07-31 This book constitutes the refereed proceedings of the 14th Australian Joint Conference on Artificial Intelligence AI 2001 held in Adelaide Australia in December 2001 The 55 revised full papers presented together with one invited contribution were carefully reviewed and selected from a total of 100 submissions The papers cover the whole range of artificial intelligence from theoretical and foundational issues to advanced applications in a variety of fields **Conceptual Graphs for Knowledge Representation** Guy W. Mineau, Bernard Moulin, 1993-07-14 Artificial Intelligence and cognitive science are the two fields devoted to the study and development of knowledge based systems KBS Over the past 25 years researchers have proposed several approaches for modeling knowledge in KBS including several kinds of formalism such as semantic networks frames and logics In the early 1980s J F Sowa introduced the conceptual graph CG theory which provides a knowledge representation framework consisting of a form of logic with a graph

notation and integrating several features from semantic net and frame representations Since that time several research teams over the world have been working on the application and extension of CG theory in various domains ranging from natural language processing to database modeling and machine learning This volume contains selected papers from the international conference on Conceptual Structures held in the city of Quebec Canada August 4-7 1993 The volume opens with invited papers by J F Sowa B R Gaines and J Barwise

**Conceptual Graphs and Fuzzy Logic** Tru Hoang Cao, 2010-07-17 In this volume first we formulate a framework of fuzzy types to represent both partial truth and uncertainty about concept and relation types in conceptual graphs Like fuzzy attribute values fuzzy types also form a lattice laying a common ground for lattice based computation of fuzzy granules Second for automated reasoning with fuzzy conceptual graphs we develop foundations of order sorted fuzzy set logic programming extending the theory of annotated logic programs of Kifer and Subrahmanian 1992 Third we show some recent applications of fuzzy conceptual graphs to modelling and computing with generally quantified statements approximate knowledge retrieval and natural language query understanding

*Representation and Management of Narrative Information* Gian Piero Zarri, 2009-06-29 A big amount of important economically relevant information is buried within the huge mass of multimedia documents that correspond to some form of narrative description Due to the ubiquity of these narrative resources being able to represent in a general accurate and effective way their semantic content i e their key meaning is then both conceptually relevant and economically important In this book we present the main properties of NKRL Narrative Knowledge Representation Language a language expressly designed for representing in a standardised way the meaning of complex multimedia narrative documents NKRL is a fully implemented language environment The software exists in two versions an ORACLE supported version and a file oriented one Written from a multidisciplinary perspective this exhaustive description of NKRL and of the associated knowledge representation principles will be an invaluable source of reference for practitioners researchers and graduates
