Hopkins,1993 Covers the 1986 explosion of the Chernobyl nuclear power plant and its aftermath Recounts a string of significant events that hurried the effects of Glasnost along the inept efforts to clean up the site and the growing realization by Soviet citizens of what really happened Appendix includes a complete chronology of recovery cost estimates Illustrated

Environmental issues present a daunting challenge to the international system The destruction of the tropical rainforest the Chernobyl explosion and the ozone layer hole all underline the transnational nature of environmental threats and the need for states to act together in order to tackle them How have such environmental issues entered political agendas in different parts of the world and how has that affected national positions Can governments ever reconcile their own national interests

with the international cooperation needed to deal with transboundary issues such as climate change This book traces the history of international environmental negotiations and regulations and looks at the domestic policies upon which cooperation in the international community depends It covers some major milestones in recent history from the Torrey Canyon accident through to the Rio Earth Summit and the emergence of the European Community as a major international environmental actor It also looks at cross cutting issues such as the role of non governmental organizations the environmental impacts of world agriculture and trading arrangements industry s attitudes and the relationship between democracy and environmental protection It concludes by examining how the international system has adapted and may adapt further to deal effectively with environmental problems and reflects on the implications of this for the future
