Print 2004-2005 Ed Bowker Staff,Staff Bowker, Ed,2004 **Social Movements and Organization Theory** Gerald F. Davis,Doug McAdam,W. Richard Scott,Mayer N. Zald,2005-05-09 Although the fields of organization theory and social movement theory have long been viewed as belonging to different worlds recent events have intervened reminding us that organizations are becoming more movement like more volatile and politicized while movements are more likely to borrow

strategies from organizations Organization theory and social movement theory are two of the most vibrant areas within the social sciences This collection of original essays and studies both calls for a closer connection between these fields and demonstrates the value of this interchange Three introductory programmatic essays by leading scholars in the two fields are followed by eight empirical studies that directly illustrate the benefits of this type of cross pollination The studies variously examine the processes by which movements become organized and the role of movement processes within and among organizations The topics covered range from globalization and transnational social movement organizations to community recycling programs The Journal of the Acoustical Society of America Acoustical Society of America,2001

What makes written words so special to the brain? Gui Xue,Urs Maurer,Mohamed L Seghier,2015-01-22 Reading is an integral part of life in today s information driven societies Since the pioneering work of Dejerine on word blindness in brain lesioned patients the literature has increased exponentially from neuropsychological case reports to mechanistic accounts of word processing at the behavioural neurofunctional and computational levels tapping into diverse aspects of visual word processing These studies have revealed some exciting findings about visual word processing including how the brain learns to read how changes in literacy impact upon word processing strategies and whether word processing mechanisms vary across different alphabetic logographic or artificial writing systems Other studies have attempted to characterise typical and atypical word processes in special populations in order to explain why dyslexic brains struggle with words how multilingualism changes the way our brains see words and what the exact developmental signatures are that would shape the acquisition of reading skills Exciting new insights have also emerged from recent studies that have investigated word stimuli at the system network level by looking for instance at how the reading system interacts with other cognitive systems in a context dependent fashion how visual language stimuli are integrated into the speech processing streams how both left and right hemispheres cooperate and interact during word processing and what the exact contributions of subcortical and cerebellar regions to reading are The contributions to this Research Topic highlight the latest findings regarding the different issues mentioned above particularly how these findings can explain or model the different processes mechanisms pathways or cognitive strategies by which the human brain sees words The introductory editorial summarising the contributions included here highlights how varieties of behavioural tests and neuroimaging techniques can be used to investigate word processing mechanisms across different alphabetic and logographic writing systems *Dissertation Abstracts International* ,2008 *Cognitive Neuroscience* Marie T. Banich,Rebecca J. Compton,2023-10-19 Now in its fifth edition this accessible and comprehensive text highlights the most important theoretical conceptual and methodological issues in cognitive neuroscience Written by two experienced researchers who excel at teaching the consistent narrative ensures that concepts are linked across chapters and the careful selection of topics enables readers to grasp the big picture without getting distracted by details Clinical applications such as developmental disorders brain injuries and dementias are

highlighted In addition the analogies and examples opening case studies and In Focus boxes both engage and demonstrate the relevance of the material to real world concerns Revised for even greater clarity the fifth edition features new and updated artwork Key Questions to review concepts and Thought Questions which develop the critical thinking skills needed to evaluate future developments in this fast moving field An expanded set of online resources is also available
