Frings,2013-06-29 In comparison to Husserl and Heidegger Max Scheler s philosophy of time as first presented here is considerably wider in scope Using posthumous manuscripts Frings shows that Scheler conceived the origin of time in the self activating center of individual and universal life as threefold absolute time of a four dimensional expanse This serves as a basis for establishing the phenomenon of objective time in multiple steps of constitutionality including the physical field theory and theory of relativity For Scheler objective time even though anchored in absolute time deserves maximum attention in a technological society Frings focuses here with Scheler on time experience of values and among social groups time experiences in the mind set of capitalism in politics and morals in population dynamics and time experiences in the process of aging all of which were signposts in Scheler s thought before his early demise Genealogical History in the Persianate World Jo-Ann Gross,Daniel Beben,2025-06-26 Scholarship on the Muslim world has recently begun to pay increased attention to non literary genres of documentation as sources for historical research Genealogical writings are one form of such documentation that has demonstrated significant potential for addressing a wide range of research concerns particularly for topics that receive little attention in historical chronicles and other state centered narrative sources However while genealogical documentation has received some attention in scholarship on the Arab world it remains mostly unstudied in scholarship on Persianate societies The chapters in this book offer reflections on theoretical and methodological issues concerning the study of genealogical documentation combined with case studies based primarily on previously unpublished unstudied source materials The topics explored span the full breadth of the Persianate world from Anatolia to the Ferghana Valley in Central Asia to the Gujarat region of India utilizing sources dating from the fourteenth to the twentieth century The book will be of significant interest to scholars and students of Islamic history and the Persianate ecumene as well as readers in other fields interested in comparative research demonstrating the use of genealogical documentation as historical sources *Balkanization and Global Politics* Nikolina Bobic,2019-03-25 Balkanization territorial fragmentation is becoming a significant urban and geopolitical pursuit in contemporary times Countries cities and regions are ever increasingly voicing the desire for

independence and balkanization from the nation or union they are a part of This monograph generally maps the historical and theoretical emergence of balkanization as well its more recent spread into fields as far ranging as law medicine data and security studies sociology architecture and the urban The spatialization of balkanization is particularly addressed in terms of destruction and renewal through a detailed sociopolitical interrogation of architecture and the urban including their changing symbolic ideological and functional forms The spatial connections between balkanization violent remaking destruction and renewal and global politics have predominantly been analyzed via the former Yugoslav context and the Balkans however spotlight has also been directed to the current political climate of the UK Australia and the Anglo Saxon geopolitics The analysis helps in understanding broader emergent patterns of sociospatial polarization across various scales and in respect to global geoeconomic and geopolitical restructuring This is particularly important because drawing connections between balkanization economics law media and technology is to gain an awareness of and engagement with the emerging implications of spatial remaking and global politics This monograph is a valuable resource and will be relevant to academics and students interested in spatial politics including architecture urbanism geography sociology politics international development conflict and cultural studies *The Shifting Sands of the North Sea Lowlands* Katie

Ritson,2018-10-26 Global seawater levels are rising and the low lying coasts of the North Sea basin are amongst the most vulnerable in Europe In our current moment of environmental crisis the North Sea coasts are literary arenas in which the challenges and concerns of the Anthropocene are being played out This book shows how the fragile landscapes around the North Sea have served as bellwethers for environmental concern both now and in the recent past It looks at literary sources drawn from the countries around the North Sea Denmark Germany the Netherlands and England from the mid nineteenth century onwards taking them out of their established national and cultural contexts and reframing them in the light of human concern with fast changing and hazardous environments The six chapters serve as literary case studies that highlight memories of flood disaster and recovery attempts to engineer the landscape into submission perceptions of the landscape as both local and global and the imagination of the future of our planet This approach which combines environmental history and ecocriticism shows the importance of cultural artefacts in understandings of and responses to environmental change and advocates for the importance of literary studies in the environmental humanities This book will be of great interest to students and scholars of the Environmental Humanities including Eco criticism and Environmental History as well as anyone studying literature from the Germanic philologies **Wittgenstein and Gadamer** Chris Lawn,2007-01-15 The book focuses

on how Wittgenstein and Gadamer treat language in their accounts of language as game and their major writings on the subject Philosophical Investigations and Truth and Method respectively Chris Lawn goes on to offer a critique of Wittgenstein s account of linguistic rules drawing upon Gadamer s philosophical hermeneutics particularly his emphasis upon tradition temporality historicity and novelty The text demonstrates how paying attention to such elements excluded by Wittgenstein

s conception of rules in fact strengthens Wittgenstein s position from a hermeneutical perspective Finally Wittgenstein and Gadamer investigates the possibility of connection between Wittgenstein s focus upon lexical particularity and Gadamer s greater concern for the universal and the general A groundbreaking work of post analytic philosophy Wittgenstein and Gadamer brings the work of two major modern philosophers in to dialogue It is required reading for anyone studying or researching the work of either philosopher or the philosophy of language more generally *The Hermeneutics of Doctrine* Anthony C. Thiselton,2007-11-08 Throughout the book Thiselton shows how perspectives that arise from hermeneutics shed fresh light on theological method reshape horizons of understanding and reveal the relevance of doctrine for formation and for life

Knowing Feminisms Liz Stanley,1997-03-10 Knowing Feminisms looks at feminism as a vital source of new knowledge and new ways of working throughout a range of disciplines It also scrutinizes the sometimes highly problematic forms its presence within academia can take The contributors all well known feminist academics discuss the epistemological and ontological borderlands that feminisms inhabit which although within still remain other to the academy The book addresses fundamentally important questions such as Should feminists work within traditional disciplines or abandon them in favour of Women s Studies Is the idea of feminist pedagogy as empowerment actually one which de skills Does the feminist transformation of some academic disciplines signify that these are no longer significant sites of knowledge and or power Do the essential organizational features of disciplines and institutions depend upon repressive means or is it possible to transform these according to feminist principles Are some disciplines and types of institutions particularly resistant to feminist ideas Is an intellectual home for feminism ever possible or desirable within academia or is critical thinking best done from the margins Can Women s Studies as an organizational presence within the university encompass dissenting positions on these foundational questions or will it contain and control what can be said and by whom *In Praise of Nonsense* Ted Hiebert,2012 A speculative exploration of theory subjectivity and art in an age of uncertainty
