Natural Beauties:

Natural Beauty Elizabeth TenHouten, 2013-07-16 Combining a wealth of tips and 75 recipes for all natural beauty aids using nothing but pure ingredients direct from Mother Nature with a philosophical approach to beauty as the foremost purpose of human existence *Natural Beauty* inspires readers to pursue a natural healthful approach to caring for their mind body and soul For Elizabeth TenHouten the pursuit of beauty is cyclical We exist in a parallel state of reaching for beauty So this dialectical tension of reaching for and returning to beauty is the cyclical state of beauty In her new book *Natural Beauty* TenHouten lays out a philosophy of beauty that encompasses physical mental and spiritual well being an integrated approach that addresses the whole person *Natural Beauty* includes a wide variety of all natural beauty tips and tricks drawing on everyday ingredients with amazing healthful properties

Natural Beauty Ronald Moore, 2007-08-28 *Natural Beauty* was selected for the Choice Outstanding Academic Title list for 2008 *Natural Beauty* presents a bold new philosophical account of the principles involved in making aesthetic judgments about natural objects It surveys historical and modern accounts of natural beauty and weaves elements derived from those accounts into a syncretic theory that centers on key features of aesthetic experience specifically features that sustain and reward attention In this way Moore's theory sets itself apart from both the purely cognitive and the purely emotive approaches that have dominated natural aesthetics until now *Natural Beauty* shows why aesthetic appreciation of works of art and aesthetic appreciation of nature can be mutually reinforcing that is how they are cooperative rather than rival enterprises Moore also makes a compelling case for how and why the experience of natural beauty can contribute to the larger project of living a good life

The Intrinsic Value of Nature Leena Vilkkä, 1997 What is intrinsic value? What is the origin of value? Are people always superior to nature? This book is a philosophical analysis of the human relationship to the non-human world. It is a pioneering study of the philosophy of nature conservation in relation to the discussion of intrinsic value. Vilkkä develops a naturalistic or naturocentric theory of value that is based on ethical extensionism and pluralism. Vilkkä analyzes natural values and environmental attitudes: zoocentrism, biocentrism, and ecocentrism. This book forms a taxonomy for nature having intrinsic value. The theory of intrinsic value is based on naturocentric and naturogenic values. The book questions the thesis of weak anthropocentrism that denies the existence of naturogenic values. In Vilkkä's theory, animals and nature are the origin of value. She defends the existence of zoogenic and biogenic values in the non-human world and discusses the possibility of ecogenic value: nature as a whole having value independent of human or animal minds. Vilkkä analyzes the goodness and rights of nature, the problem of priorities, and ecological humanism. A naturocentric recommendation is that the well-being of animals and nature should have priority over human values at least in some real decision contexts. Ecological humanism recommends an attitude of respect for people, animals, and nature. The book includes an extensive glossary, index, and bibliography.
