the superficial aspects so generally engaging people's concern and often professional treatment which he terms triviality. He considers how contemporary practice of psychotherapy often fails to admit to the critical difference, fails to recognize it in practice and subsequently treats patients for irrelevancies while neglecting core essential issues. Keen addressed his concern about the prevalent practices among psychological medical practitioners vis-à-vis the prescriptive drug control of mental problems in earlier publications. In this work including a therapy case study, Keen's position is an important one warranting wide attention in the medical and helping professions. It stresses that pharmacotherapy threatens our access and openness to ultimate issues. For professionals and scholars in medicine, public health, clinical psychology, psychiatrists, and psychotherapists.
