Natural Resource Revenues A Test Of Federalism:

Natural Resource Revenues Anthony Scott, 1976 Debate on the question of who should receive the surplus revenue generated by natural resource exploitation Ottawa or the provinces is usually carried on in terms of history politics custom law social values and environmental considerations This collection of essays presents analyses of the question from the economist's point of view The essays fall into three groups In the first of these the authors examine the taxation of the mining and energy industries and show how the method of taxation chosen by different levels of government federal or provincial may be non neutral distorting private output and timing decisions The second group consists of careful case studies of the effects of particular natural resource taxation measures the third focuses directly on the question of provincial and federal entitlement to resource revenues Although arguments are advanced for linking the right to tax to the responsibility for management and control at present vested in the provinces most of the contributors would agree that the provinces should be regarded as stewards and bailiffs not landlords as rent collectors and managers not rentiers and owners

Forming Economic Policy Fen Osler Hampson, 2013-11-07 How do governments make key decisions on vital economic questions of national importance Can they advance the national interest on issues that are highly politicized How do they respond to competing pressures from the international and domestic environments Forming Economic Policy explores these and other questions in Canada and Mexico two very different countries which share a common vulnerability to the world economy Using the case of energy the book argues that policymakers will address the national interest but only episodically with the onset of major national crises that invoke a higher and sustained sense of national priorities These crises are frequently induced by the interaction of domestic and foreign political and economic forces The conclusions are surprising Despite profound political and economic differences between these two countries policymakers have behaved in remarkably similar ways when arriving at key policy decisions The explanation which integrates two competing views of politics the pluralist and the statist has important implications with regard to the political processes in those states which like Canada and Mexico are exposed to the world economy and face problems of political legitimacy at home Forming Economic Policy will appeal to students and teachers of political economy and comparative politics as well as to those interested in the politics of energy policy
