Cardiovascular Disease and Health in the Older Patient David J. Stott, Gordon D. O. Lowe, 2012-11-08 As improvements in living conditions and advances in modern medicine lead to increased life expectancy and the number of older adults world wide continues to grow so the number of older individuals with cardiac and cerebrovascular disease is rising Over eighty per cent of all cardiovascular disease related deaths now occur in patients aged sixty five or older The high prevalence of co morbidities frailty and cognitive decline amongst older patients requires that a holistic approach to the management of cardiovascular disease is required Written and edited by leading experts in the field Cardiovascular diseases and health in the older patient provides scholarly evidence and data which explain why treating an older patient with cardiovascular disease is often different from treating a young or middle aged patient with the same disease The chapters have been updated and expanded from the cardiovascular section of the renowned Pathy's Principles and Practice of Geriatric Medicine edited by Alan J Sinclair John E Morley and Bruno Vellas The revised chapters contain updated evidence and references to recent clinical practice guidelines in Europe and North America this book provides complete authoritative information on this major cause of death poor health and disability in old age Covering the epidemiology pathophysiology and management of cardiovascular disease in the older patient the book is an excellent reference at all clinical and pre clinical levels and will appeal particularly to geriatricians cardiologists and GPs as well as cardiac specialist nurses and practice nurses With a Foreword by Stuart M Cobbe

Physiology of the Gastrointestinal Tract Kim E. Barrett, Faye K. Ghishan, Juanita L. Merchant, Hamid M. Said, Jackie D. Wood, 2006-05-10 FROM THE PREFACE The original purpose of the First Edition of Physiology of the Gastrointestinal Tract to collect in one set of volumes the most current and comprehensive knowledge in our field was also the driving force for the Fourth Edition The explosion of information at the cellular level made possible in part by the continued emergence of powerful molecular and cellular techniques has resulted in a greater degree of revision than that of any other edition The first section now titled

Basic Cell Physiology and Growth of the GI Tract contains numerous new chapters on topics such as transcriptional regulation signaling networks in development apoptosis and mechanisms in malignancies Most of the chapters in this section were edited by Juanita L Merchant Section II has been renamed Neural Gastroenterology and Motility and has been expanded from seven chapters with rather classic titles to more than twenty chapters encompassing not only the movement of the various parts of the digestive tract but also cell physiology neural regulation stress and the regulation of food intake Almost all of the chapters were recruited and edited by Jackie D Wood The third section is entirely new and contains chapters on Immunology and Inflammation which were edited by Kim E Barrett The fourth section on the Physiology of Secretion consists of chapters with familiar titles but with completely updated information to reflect the advances in our understanding of the cellular processes involved in secretion The last section on Digestion and Absorption contains new chapters on the intestinal barrier protein sorting and ion channels along with those focusing on the uptake of specific nutrients These chapters were recruited and edited by Hamid M Said and Fayez K Ghishan Collected in one set the most current and comprehensive coverage of gastrointestinal physiology Information presented in a style that is both readable and understandable Valuable to the specialized researcher the clinical gastroenterologist the teacher and the student Features an entirely new section on Immunology and Inflammation Each section edited by the preeminent scientist in the field

Care of the Critically Ill Patient Jack Tinker, Warren M. Zapol, 2012-12-06 Nine years have passed since the first edition of Care of the Critically Ill Patient was published As its editors Maurice Rapin and I were fortified by the many positive and helpful comments of reviewers and readers the work appeared to have fulfilled our original aims and objectives Intensive care medicine has of course advanced and changed in many ways since 1982 and it therefore seemed appropriate to consider the preparation of a second edition Encouraged by the reception of the first and the timely prompting of the publishers we began in 1986 to prepare for a new edition Caring for critically ill patients is of universal concern and we were therefore delighted when Warren Zapol joined us as C n editor widening our international base The three of us subsequently spent many happy and productive times together planning the content priorities scale and contributions for the new edition A great tragedy then overcame us Maurice Rapin died suddenly His death deprived us of a true friend and colleague who had been an international pioneer during the development of intensive care medicine I will always remember with affection and professional pride the many hours he and I worked together in preparing the first edition of this book and also as founding editors of the now firmly established journal Intensive Care Medicine An obituary written by Warren Zapol that appeared in the journal follows the Preface

The Very Old Critically Ill Patients Hans Flaatten, Bertrand Guidet, H  l  ne Vallet, 2022-08-03 This book part of the European Society of Intensive Care Medicine ESICM textbook series provides detailed up to date information on the care of the critical ill very old 80 years patients in the ICU The very old are expanding fast in our populations and this is mirrored in our hospitals and ICUs as well During the last decade a lot more information

about the group of critical ill elderly has been published and several large networks cooperate in performing multinational studies in this field one of them with roots in the ESICM This book will give readers knowledge about the current epidemiology of elderly ICU patients in patients centered outcomes and factors affecting these outcomes A large part is devoted to age related changes in vital organ functions and the specific geriatric syndromes like frailty cognitive decline reduced activity of daily living sarcopenia and immunosenescence This is all important for the practicing intensivists to know about In addition specific groups of the elderly in the ICU are also described like the elderly patients with trauma or sepsis The book is written jointly by intensivists and geriatricians often working in teams and originating from many different countries This herald a new era in the collaboration between these two groups in order to improve care and rehabilitation We have a lot to learn from each other as both groups have a holistic view of our patients although with different perspectives This book should be of value for all working in adult ICUs physicians as well as nurses It will hopefully lead to a better understanding of the particular challenges posed by this important sub group of ICU patients and how to manage his group in a way that combine respect for life as well as death and includes patients and caregivers in this process
