REAL OBJECTS

- Objects that can be accessed and have educational value.
- Things are not necessarily presented in the classroom, but students can see directly into the object.
- For example to study the diversity of living things, classification of living things, ecosystems, and plant organs.

Lovett,Christian D. Schunn,Christian Lebiere,Paul Munro,2004-09-15 The International Conference on Cognitive Modeling brings together researchers who develop computational models to explain and predict cognitive data The core theme of the 2004 conference was Integrating Computational Models encompassing an integration of diverse data through models of coherent phenomena integration across modeling approaches and integration of teaching and modeling This text presents the proceedings of that conference

The International Conference on Cognitive Modeling 2004 sought to grow the discipline of computational cognitive modeling by providing a sophisticated modeling audience for cutting edge researchers in addition to offering a forum for integrating insights across alternative modeling approaches in both basic research and applied settings and a venue for planning the future growth of the discipline The meeting included a careful peer review process of 6 page paper submissions poster abstracts to include late breaking work in the area prizes for best papers a doctoral consortium and competitive modeling symposia that compare and contrast different approaches to the same phenomena

UML for Real Luciano Lavagno, Grant Martin, Bran V. Selic, 2007-05-08 The complexity of most real time and embedded systems often exceeds that of other types of systems since in addition to the usual spectrum of problems inherent in software they need to deal with the complexities of the physical world That world as the proverbial Mr Murphy tells us is an unpredictable and often unfriendly place Consequently there is a very strong motivation to investigate and apply advanced design methods and technologies that could simplify and improve the reliability of real time software design and implementation As a result from the first versions of UML issued in the mid 1990 s designers of embedded and real time systems have taken to UML with vigour and enthusiasm However the dream of a complete model driven design flow from specification through automated optimised code generation has been difficult to realise without some key improvements in UML semantics and syntax specifically targeted to the real time systems problem With the enhancements in UML that have been proposed and are near standardisation with UML 2.0 many of these improvements have been made In the Spring of 2003 adoption of a formalised UML 2.0 specification by the members of the Object Management Group OMG seems very close It is therefore very appropriate to review the status of UML as a set of notations for embedded real time systems both the state of the art and best practices achieved up to this time with UML of previous generations and where the changes embodied in the 2

Smart Technologies for a Sustainable Future Michael E. Auer, Reinhard Langmann, Dominik May, Kim Roos, 2024-05-31

This book includes the proceedings of the 21st International Conference on Smart Technologies Education STE2024 The International Conference on Smart Technologies Education STE is an annual global meeting dedicated to the fundamentals applications and experiences in the field of Smart Technologies Online Remote and Virtual Engineering Virtual Instrumentation and other related new technologies Nowadays online and smart technologies are the core of most fields of engineering and the whole society Consequently the motto of this year s STE2024 was Smart Technologies for a Sustainable Future The STE conference is the successor of the long standing annual REV Conferences and the annual meeting of the International Association of Online Engineering IAOE together with the EduNet World Association EWA and the International Education Network EduNet In a globally connected world the interest in online collaboration teleworking remote services and other digital working environments is rapidly increasing In response to that the general objective of this conference is to contribute and discuss fundamentals applications and experiences in the field of Online and Remote Engineering Virtual Instrumentation and other related new technologies like Cross Reality Open Science and Big Data Internet of Things and

Industrial Internet of Things Industry 4.0 Cyber Security and M2M and Smart Objects Another objective of the conference is to discuss guidelines and new concepts for engineering education in higher and vocational education institutions including emerging technologies in learning MOOCs and MOOLs and Open Resources This year STE2024 has been organized in Helsinki Finland as an onsite event supporting remote presentations from March 6 until March 8 2024 The co organizers of STE2024 were the Arcada University of Applied Sciences the International Association of Online Engineering IAOE together with the Global Online Laboratory Consortium GOLC the International Education Network EduNet and the EduNet World Association EWA STE2024 has attracted 140 scientists and industrial leaders from more than 40 countries **Digital**

Image Analysis Walter Kropatsch,Horst Bischof,2006-05-10 The human visual system as a functional unit including the eyes the nervous system and the corresponding parts of the brain certainly ranks among the most important means of human information processing The efficiency of the biological systems is beyond the capabilities of today's technical systems even with the fastest available computer systems However there are areas of application where digital image analysis systems produce acceptable results Systems in these areas solve very specialized tasks they operate in a limited environment and high speed is often not necessary Several factors determine the economical application of technical vision systems cost speed flexibility robustness functionality and integration with other system components Many of the recent developments in digital image processing and pattern recognition show some of the required achievements Computer vision enhances the capabilities of computer systems in autonomously collecting large amounts of data in extracting relevant information in perceiving its environment and in automatic or semiautomatic operation in this environment The development of computer systems in general shows a steadily increasing need in computational power which comes with decreasing hardware costs

Concept Invention Roberto Confalonieri,Alison Pease,Marco Schorlemmer,Tarek R. Besold,Oliver Kutz,Ewen Maclean,Maximos Kaliakatsos-Papakostas,2018-10-05 This book introduces a computationally feasible cognitively inspired formal model of concept invention drawing on Fauconnier and Turner's theory of conceptual blending a fundamental cognitive operation The chapters present the mathematical and computational foundations of concept invention discuss cognitive and social aspects and further describe concrete implementations and applications in the fields of musical and mathematical creativity Featuring contributions from leading researchers in formal systems cognitive science artificial intelligence computational creativity mathematical reasoning and cognitive musicology the book will appeal to readers interested in how conceptual blending can be precisely characterized and implemented for the development of creative computational systems PCM—CMM2023: Theories, Models and Simulations of Complex Physical Systems Eugeniusz Świtoński,Arkadiusz Mężyk,Śławomir Kciuk,Roman Szewczyk,2024-10-31 The idea of organizing the Polish Congress of Mechanics was born in 2005 among members of the Polish Society of Theoretical and Applied Mechanics The first Congress has been organized in 2007 In 2013 the organization of the Polish Congress of Mechanics was included in the statutory tasks

of the Polish Society of Theoretical and Applied Mechanics Referring to the splendid tradition of Polish Theoretical and Applied Mechanics the Congress has become one of the most important international scientific conventions representing this domain of science and gathering every 4 years about 500 600 specialists who deal with the issues of mechanics and mechanical engineering in a broad sense The organization of the Congress allows for the connection of many scientific communities researchers and engineers from various universities faculties research centers and institutions Such scientific meeting is an excellent place for presentation discussion and dissemination of new achievements and ideas relating to the theoretical foundations as well as practical applications of mechanics The Congress presents the current state of the art research in all disciplines of classical and quantum mechanics solid and fluid mechanics computational mechanics applied mechanics and physics as well as structural mechanics and engineering

Metaclasses and Their Application Wolfgang Klas, Michael Schrefl, 1995-07-14 Conventional object oriented data models are closed although they allow users to define application specific classes they usually come with a fixed set of modelling primitives This constitutes a major problem as different application domains e g database integration or multimedia need special support Using an extended metaclass concept this book provides for the solution of this problem a simple but extendible open object oriented data model a so called RISC model By introducing the basic concepts of the open object oriented database management system VODAK it demonstrates how the extended metaclass concept can be integrated homogeneously into object oriented data models
