## **Real Process How Logic And Chemistry Combine In Hegels Philosophy Of Nature:**

**Real Process** John W. Burbidge, 1996 Hegel's Philosophy of Nature was for a long time regarded as an outdated historical curiosity. Yet if systematic completeness is given up, the value of Hegelian arguments and of Hegelian logic generally becomes uncertain. In this book John Burbidge reveals the abiding significance of the Philosophy of Nature as the intermediate movement in Hegel's system. Burbidge looks at three specific texts in Hegel's work: the two chapters of the Science of Logic that deal with the concept of chemism and the section on chemical process in the Philosophy of Nature. Through his detailed commentary he clarifies Hegel's distinction between a strictly theoretical philosophy and one that understands the natural world. He shows that Hegel does not presume to derive natural data a priori nor is he simply dependent on the explanatory theories arrived at by chemists themselves. Experience provides the data but thought sets the parameters. Burbidge sets Hegel's thought in context with sketches of what Kant, Fichte, and Schelling had to say about chemistry and with background outlining the stage chemistry had reached at the time Hegel was writing. He also reveals how Hegel changed his mind as he revised each section for succeeding editions of his work, thus providing a fascinating case study of the development of Hegel's ideas. **BOOK JACKET Title Summary field provided by Blackwell North America Inc. A Commentary to Hegel's Science of Logic David Gray Carlson, 2007-01-04 Hegel is regarded as the pinnacle of German idealism and his work has undergone an enormous revival since 1975. In this book David Gray Carlson presents a systematic interpretation of Hegel's *The Science of Logic*, a work largely overlooked through a system of accessible diagrams identifying and explicating each of Hegel's logical derivations.

Schelling, Hegel, and the Philosophy of Nature Benjamin Berger, 2023-11-30 This book develops an original interpretation of the relationship between F. W. J. Schelling and G. W. F. Hegel. It argues that the difference between these philosophers should be understood in light of their shared commitment to the philosophy of nature and the idea that spirit or humanity emerges from the natural world. The author makes a case for the contemporary relevance of German idealist philosophy of nature by walking the reader through its major themes, motivations, and arguments. Along the way, Schelling and Hegel are shown to develop key insights about the structure of reality and the dependence of living things and human beings upon inorganic natural processes. In elucidating the details of Schelling's and Hegel's respective philosophies of nature, the book challenges some of our most basic assumptions about the scope of philosophical inquiry and the relationship between matter, life, and human existence. *Schelling, Hegel, and the Philosophy of Nature* will appeal to scholars and advanced students working on German idealism as well as those interested in contemporary philosophies of nature and the topic of emergence.

*The Logic of Hegel's 'Logic'* John W. Burbidge, 2006-03-28 George Wilhelm Friedrich Hegel has seldom been considered a major figure in the history of logic. His two texts on logic, both called *The Science of Logic*, both written in Hegel's characteristically dense and obscure language, are often considered more as works of metaphysics than logic. But in this highly readable book John Burbidge sets out to reclaim

Hegel's Science of Logic as logic and to get right at the heart of Hegel's thought Burbidge examines the way Hegel moves from concept to concept through every chapter of his work and traces the origins of Hegel's effort to think through the way thought thinks to Plato Kant and Fichte Having established the framework of Hegel's logical thought Burbidge demonstrates how Hegel organized the rest of his system including the Philosophy of Nature Philosophy of Spirit and his Lectures on World History Art Religion and Philosophy A final section discusses English language interpretations of Hegel's logic from the nineteenth through twentieth centuries Burbidge's The Logic of Hegel's Logic is written with an eye to the reader of general interests avoiding as much as possible the use of Hegel's technical vocabulary It is an excellent introduction to an otherwise very difficult text and has recently appeared in an Iranian translation

**Nature and Naturalism in Classical German Philosophy** Luca Corti, Johannes-Georg Schüle, 2022-08-19 This book offers the first comprehensive exploration of the relevance of naturalism and theories of nature in Classical German Philosophy It presents new readings from internationally renowned scholars on Kant Jacobi Goethe the Romantic tradition Fichte Schelling Hegel and Marx that highlight the significance of conceptions of nature and naturalism in Classical German Philosophy for contemporary concerns The collection presents an inclusive view it goes beyond the usual restricted focus on single thinkers to encompass the tradition as a whole prompting dialogue among scholars interested in different authors and areas It thus illuminates the post Kantian tradition in a new wider sense The chapters also mobilize a productive perspective at the intersection of philosophy and history by combining careful textual and historical analysis with argument based philosophizing Overall the book challenges the stereotypical view that Classical German Philosophy offers at best only an idealistic one sided anachronistic and theological view of nature It invites readers to put traditional views in dialogue with current discussions of nature and naturalism Nature and Naturalism in Classical German Philosophy will be of interest to scholars and advanced students working on Classical German Philosophy 19th Century Philosophy and contemporary perspectives on naturalism

Problem of Nature in Hegel's Final System Wes Furlotte, 2018-07-02 Wes Furlotte critically evaluates Hegel's philosophy of human freedom in terms of his often disregarded conception of nature In doing so he gives us a new portrait of Hegel's final system that is surprisingly relevant for our contemporary world connecting it with recent work in speculative realism and new materialism

**Hegel's Concept of Life** Karen Ng, 2020-01-02 Karen Ng sheds new light on Hegel's famously impenetrable philosophy She does so by offering a new interpretation of Hegel's idealism and by foregrounding Hegel's Science of Logic revealing that Hegel's theory of reason revolves around the concept of organic life Beginning with the influence of Kant's Critique of Judgment on Hegel Ng argues that Hegel's key philosophical contributions concerning self consciousness freedom and logic all develop around the idea of internal purposiveness which appealed to Hegel deeply She charts the development of the purposiveness theme in Kant's third Critique and argues that the most important innovation from that text is the claim that the purposiveness of nature opens up and enables the operation of the power of judgment This innovation is essential for

understanding Hegel's philosophical method in the *Differenzschrift* 1801 and *Phenomenology of Spirit* 1807 where Hegel developing lines of thought from Fichte and Schelling argues against Kant that internal purposiveness constitutes cognition's activity shaping its essential relation to both self and world From there Ng defends a new and detailed interpretation of Hegel's *Science of Logic* arguing that Hegel's Subjective Logic can be understood as Hegel's version of a critique of judgment in which life comes to be understood as opening up the possibility of intelligibility She makes the case that Hegel's theory of judgment is modelled on reflective and teleological judgments in which something's species or kind provides the objective context for predication The Subjective Logic culminates in the argument that life is a primitive or original activity of judgment one that is the necessary presupposition for the actualization of self-conscious cognition Through bold and ambitious new arguments Ng demonstrates the ongoing dialectic between life and self-conscious cognition providing ground-breaking ways of understanding Hegel's philosophical system

Hegel and Heidegger on Nature and World Raoni Padui, 2023-04-24 The philosophical concepts of nature and world have overlapped one another in a myriad of ways throughout the history of Western philosophy Nevertheless, modernity has constructed a

decisive philosophical dichotomy between the domain of nature and the domain of the human world as a response to the revolutions of the natural sciences in the seventeenth century In Hegel and Heidegger on Nature and World Raoni Padui investigates the responses to this distinction between nature and world in the works of Hegel and Heidegger Both philosophers attempt to heal the wounds of modernity and to reconcile the human historical world to the domain of nature and both refuse to accept the dichotomy between nature and world seeking to offer a way in which humans can inhabit a meaningful world without being alienated from the nature that conditions it However the difference in their modes of reconciliation illustrates the options opened up by modern philosophy either a Hegelian path of self determination that traces our historical emancipation from the natural domain or a Heideggerian rethinking of nature that seeks a renewed proximity to the domain of things
