Real People Personal Identity Without Thought Experiments:

Real People Kathleen V. Wilkes, 1988 A study of the scope and limits of the concept of a person covering methodology of thought experimentation real life conditions such as infancy insanity and dementia and looking at different views of the person found in Homer Aristotle the post Cartesians and contemporary cognitive science Wittgenstein's Beetle and Other Classic Thought Experiments Martin Cohen, 2008-04-15 Wittgenstein's Beetle and Other Classic Thought Experiments invites readers to participate actively in discovering the surprisingly powerful and fruitful tradition of thought experiments Gives a lively presentation of an A to Z of 26 fascinating and influential thought experiments from philosophy and science Presents vivid and often humorous discussion of the experiments including strengths and weaknesses historical context and contemporary uses Provides a how to section for engaging in thought experiments Includes illustrations mini biographies and suggestions for further reading **Personal Identity** Ellen Frankel Paul, Fred Dycus Miller, Jeffrey Paul, 2005 What is a person What makes me the same person today that I was yesterday or will be tomorrow Philosophers have long pondered these questions In Plato's Symposium Socrates observed that all of us are constantly undergoing change we experience physical changes to our bodies as well as changes in our manners customs opinions desires pleasures pains and fears Aristotle theorized that there must be some underlying substratum that remains the same even as we undergo these changes John Locke rejected Aristotle's view and reformulated the problem of personal identity in his own way is a person a physical organism that persists through time or is a person identified by the persistence of psychological states by memory These essays written by prominent philosophers and legal and economic theorists offer valuable insights into the nature of personal identity and its implications for morality and public policy Identity, Personal Identity and the Self John Perry, 2002-06-15 This volume collects a number of Perry's classic works on personal identity as well as four new pieces The Two Faces of Identity Persons and Information Self Notions and The Self and The Sense of Identity Perry's Introduction puts his own work and that of others on the issues of identity and personal identity in the context of philosophical studies of mind and language over the past thirty years *Thought Experiments* Roy A. Sorensen Associate Professor of Philosophy New York University, 1992-08-06 Sorensen presents a general theory of thought experiments what they are how they work what are their virtues and vices On Sorensen's view philosophy differs from science in degree but not in kind For this reason he claims it is possible to understand philosophical thought experiments by concentrating on their resemblance to scientific relatives Lessons learned about scientific experimentation carry over to thought experiment and vice versa Sorensen also assesses the hazards and pseudo hazards of thought experiments Although he grants that there are interesting ways in which the method leads us astray he attacks most scepticism about thought experiments as arbitrary They should be used he says as they generally are used as part of a diversified portfolio of techniques All of these devices are individually susceptible to abuse fallacy and error Collectively however they provide a network of cross checks that make for impressive reliability

Thought Experiment Tamar Szabo Gendler, 2014-01-14 This book offers a novel analysis of the widely used but ill understood technique of thought experiment The author argues that the powers and limits of this methodology can be traced to the fact that when the contemplation of an imaginary scenario brings us to new knowledge it does so by forcing us to make sense of exceptional cases

Models of the Self Shaun Gallagher, Jonathan Shear, 1999 A comprehensive reader on the problem of the self as seen from the perspectives of philosophy development psychology robotics cognitive neuroscience psychopathology semiotics phenomenology and contemplative studies all focused on a keynote paper

Controversies and the Metaphysics of Mind Yaron M. Senderowicz, 2010 Since ancient times metaphysical theories have been shaped by the dialectical relations between metaphysical positions The present book offers a new account of the role of controversies in the evolution of ideas in current metaphysics of mind Part One develops a pragmatic theory of metaphysical controversies that combines Kantian themes and themes from current argumentation theory The theory developed in this book underscores the role of a unique type of dialectical arguments which establish metaphysical positions as controversial relevant alternatives in the evolution of chains of debates in metaphysics In Part Two and Part Three this theory is applied to chains of debates in present day metaphysics of mind which address the problems of consciousness and personal identity One of the contentions defended in this book is that the intellectual history of metaphysics is not a process in which positions are replaced by opposite positions but rather a history of their status as relevant alternatives The book analyzes in detail and demonstrates how progress in contemporary metaphysics of mind consists in a dialectical process through which challenges to extant positions lead to innovative alternatives that are intrinsically relevant to advancing the understanding of the issues under discussion

The Analytic Imaginary Marguerite La Caze, 2018-09-05 The notion of the philosophical imaginary developed by Michel Le Doeuff refers to the capacity to imagine as well as to the stock of images philosophers employ Making use of this notion Marguerite La Caze explores the idea of the imaginary of analytic philosophy Noting the marked tendency of analytic philosophy to be unselfconscious about the use of figurative language and the levels at which it works La Caze shows how analytic images can work to define the parameters of debates and exclude differing approaches including feminist ones La Caze focuses on five influential types of images in five central areas of contemporary

analytic philosophy analogies and how they are used in the abortion debates thought experiments in personal identity the myth of the social contract Thomas Nagel's use of visual and spatial metaphors in epistemology and Kendall Walton's use of children's games as a foundational model in aesthetics The author shows how the image promotes assumptions and conceals tensions in philosophical works how the image persuades and how it limits debate and excludes ideas In providing an analysis of and reflection on the nature of the analytic imaginary La Caze suggests that a more open ended and reflexive approach can result in richer more fruitful philosophical work

Practical Identity and Narrative Agency Kim

Atkins, Catriona Mackenzie, 2013-05-13 The essays collected in this volume address a range of issues that arise when the focus of philosophical reflection on identity is shifted from metaphysical to practical and evaluative concerns They also explore the usefulness of the notion of narrative for articulating and responding to these issues The chapters written by an outstanding roster of international scholars address a range of complex philosophical issues concerning the relationship between practical and metaphysical identity the embodied dimensions of the first personal perspective the kind of reflexive agency involved in the self constitution of one's practical identity the relationship between practical identity and normativity and the temporal dimensions of identity and selfhood In addressing these issues contributors engage with debates in the literatures on personal identity phenomenology moral psychology action theory normative ethical theory and feminist philosophy

Oxford Studies in Experimental Philosophy, Volume 2 Tania Lombrozo, Joshua Knobe, Shaun Nichols, 2018-03-02 The new field of experimental philosophy has emerged as the methods of psychological science have been brought to bear on traditional philosophical issues Oxford Studies in Experimental Philosophy is the place to go to see outstanding new work in the field It features papers by philosophers papers by psychologists and papers co authored by people in both disciplines The series heralds the emergence of a truly interdisciplinary field in which people from different disciplines are working together to address a shared set of questions This second volume in the series is divided into three sections that explore epistemology moral and political philosophy and metaphysics and mind

Engaging Characters Murray Smith, 2022-05-12 Characters those fictional agents populating the fictional worlds we spend so much time absorbed in are ubiquitous in our lives We track their fortunes judge their actions and respond to them with anger amusement and affection indeed the whole palette of human emotions Powerfully drawn characters transcend their stories entering into our imaginations and deliberations about the actual world acting as analogies and points of reference And yet there has been remarkably little sustained and systematic reflection on these creatures that absorb so much of our attention and emotional lives In **Engaging Characters** Murray Smith sets out a comprehensive analysis of character exploring the role of characters in our experience of narrative and fiction Smith's analysis focuses on film and also illuminates character in literature opera song cartoons new and social media At the heart of this account is an explanation of the capacity of characters to move us Teasing out the various dimensions of character Smith explores the means by which films draw us close to characters or hold us at a distance from them and how our beliefs and attitudes are formed and sometimes reformed by these encounters Integrating these arguments with research on emotion in philosophy psychology evolutionary theory and anthropology **Engaging Characters** advances an account of the nature of fictional characters and their functions in fiction imagination and human experience In this revised twenty fifth anniversary edition of **Engaging Characters** Smith refines and extends the arguments of the first edition with a substantial new introduction reviewing the debates on emotion empathy and film spectatorship that the book has inspired

Biology and Subjectivity Miguel García-Valdecasas, José Ignacio Murillo, Nathaniel F. Barrett, 2016-08-26 Some may consider that the language and concepts of philosophy will eventually be superseded by those of neuroscience This book questions such a naive assumption and through a variety of perspectives and traditions the authors show the possible contributions of philosophy to non reductive forms of neuroscientific research Drawing from the full range and depth of philosophical thought from hylomorphism to ethics by way of dynamical systems enactivism and value theory amongst other topics this edited work promotes a rich form of interdisciplinary exchange Chapters explore the analytic phenomenological and pragmatic traditions of philosophy and most share a common basis in the Aristotelian tradition

Contributions address one or more aspects of subjectivity in relation to science such as the meaning and scope of naturalism and the place of consciousness in nature or the relation between intentionality teleology and causality Readers may further explore the nature of life and its relation to mind and then the role of value in mind and nature This book shows how philosophy might contribute to real explanatory progress in science while remaining faithful to the full complexity of the phenomena of life and mind It will be of interest to both philosophers and neuroscientists as well as those engaged in interdisciplinary cooperation between philosophy and science
