

Short Philosophy of Education Examples

My teaching philosophy is centered around seeing the whole student and allowing the student to use their whole self to direct their own learning. As a secondary teacher, I also believe strongly in exposing all students to the same core content of my subject so that they have equal opportunities for careers and other experiences dependent upon that content in the future.

Philosophy of Education Philosophy of Education Society (U.S.), 1997 *Inquiry: A New Paradigm for Critical Thinking* Mark Battersby, Sharon Bailin, 2018-12-05 This volume reflects the development and theoretical foundation of a new paradigm for critical thinking based on inquiry The field of critical thinking as manifested in the Informal Logic movement developed primarily as a response to the inadequacies of formalism to represent actual argumentative practice and to provide useful argumentative skills to students Because of this the primary focus of the field has been on informal arguments rather than formal reasoning Yet the formalist history of the field is still evident in its emphasis with respect to both theory and pedagogy on the structure and evaluation of individual de contextualized arguments It is our view that such a view of critical thinking is excessively narrow and limited failing to provide an understanding of argumentation as largely a matter of comparative evaluation of a variety of contending positions and arguments with the goal of reaching a reasoned judgment on an issue As a consequence traditional critical thinking instruction is problematic in failing to provide the reasoning skills that students need in order to accomplish this goal Instead the goal of critical thinking instruction has been seen largely as a defensive one of learning to not fall prey to invalid inadequate or fallacious arguments **Encyclopedia of Social**
