Reason For Science:

The Future of Reason, Science and Faith J. Andrew Kirk, 2016-12-05 Focusing on the history of ideas this book explores important questions concerning knowledge in relation to philosophy science ethics and Christian faith Kirk contributes to the current debate about the intellectual basis and integrity of Western culture exploring controversial issues concerning the notions of modernity and post modernity Repositioning the Christian faith as a valid dialogue partner with contemporary secular movements in philosophy and ethics Kirk seeks to show that in post Christian Europe the Christian faith still possesses intellectual resources worthy to be reckoned with This book s principal argument is that contemporary Western society faces a cultural crisis It explores what appears to be an historical enigma namely the question of why Western intellectual endeavours in philosophy and science seem to have abandoned the search for a source of knowledge able to draw together disparate pieces of information provided by different disciplines Kirk draws conclusions particularly in the area of ethical decision making from this apparent failure and invites readers to consider Christian theism afresh as a means for the renewal of culture and society

Critique of Pure Reason Immanuel Kant, 1797 Metaphysicians have for centuries attempted to clarify the nature of the world and how rational human beings construct their ideas of it Materialists believed that the world including its human component consisted of objective matter an irreducible substance to which qualities and characteristics could be attributed Mind thoughts ideas and perceptions was viewed as a more sophisticated material substance Idealists on the other hand argued that the world acquired its reality from mind which breathed metaphysical life into substances that had no independent existence of their own These two camps seemed deadlocked until Immanuel Kant s Critique of Pure Reason endeavored to show that the most accurate theory of reality would be one that combined relevant aspects of each position yet transcended both to arrive at a more fundamental metaphysical theory Kant s synthesis sought to disclose how human reason goes about constructing its experience of the world thus intertwining objective stimuli with rational processes that arrive at an orderly view of nature

Reason, Science and Faith Paul Marston, Roger Forster, 2001-06-11 **Reconsideration of Science and Technology III** Liu Dachun, Yang Huili, Fan Shanshan, 2022-09-30 Drawing on debates from traditional and postmodern thoughts on science and technology the title builds a new theoretical framework to reconsider science and technology integrating the opposing viewpoints that either justify science or negate it As the third volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world this final volume seeks to restore the cultural implications of science Across the six chapters the authors probe the prospect of a pluralistic scientific culture including discussions of diversified value choices the tension between reason and unreason other binary characteristics of scientific knowledge including objectivity and uniqueness universality and locality as well as the loss awakening and reconstruction of scientific culture The authors call for a transformation of scientific culture from a dominant culture to an affirmative one and

envision a free and open world of science and technology The volume will appeal to scholars and students interested in the philosophy of science and technology the ideology of scientism and anti scientism modernism and postmodernism Marxist philosophy and topics related to scientific culture Science's War On Reason Mike Hockney,2016-01-02 People can t reason They don t even know what reason is Reason is almost always harnessed to something that has nothing to do with reason Believers in mainstream religion are feeling types who reason with their emotions or with their mystical intuitions Scientists are sensing types They subordinate their reason to their senses All scientists are empiricists and are opposed to rationalism i e the existence of a rational order of reality completely removed from the human senses which can only be apprehended rationally logically mathematically and via intellectual intuition Scientists try to don the cloak of rationalism even though they are explicitly opposed to mathematical rationalism which addresses a more fundamental noumenal reality than the one amenable to phenomenal science **The Forbidden History of Science** Mike Hockney,2015-07-31 The

problem is not to find the answer it s to face the answer Terence McKenna At school you are taught science You are not taught the history of science so you have no idea how science came to be the institution it now is You are never taught the secret history of science whereby scientific idealism based on the mind could have become the orthodoxy rather than scientific materialism based on the body In this book we will show you how easily science could have taken an entirely different route from the one it did take The heroes of this tale are Immanuel Kant in his younger Leibnizian years and the Jesuit Roger Boscovich Their system embraced mind in its own right i e mind considered as something that does not owe its existence to matter Read for yourself the astounding rival history of science You will soon discover why it s so terrified of drawing any attention to the secret history of science the forbidden history **The Science Conspiracy: How Autism Drives the World** Jack Tanner,2019-03-17 The scientific mind can best be understood in terms of autism Why do scientists reject rationalism in favor of empiricism relations of ideas in favor of matters of fact conceptualism in favor of perceptualism Why do they prefer their limited fallible senses over reason and logic Why do they deny the ontology of mathematics The future of the world is now being driven by a group high on the autistic spectrum How will this affect human progress *The Science of Politics* Patrick Edward Dove,1850 Science John Michels (Journalist),1925 *The Third Reich Sourcebook* Anson Rabinbach,Sander L. A Reason for Science Dave Seela,2008 History of the Conflict Between Religion and Science John William Draper,1896 **From Violence to Peace** Alex Deagon,2017-08-24 This book contributes to the literature on jurisprudence and theology by arguing for the role of a theoretically robust Christian theology in a legal community dominated by secular and liberal ideology It is not a doctrinal or empirical analysis but a theoretical exposition of the way in which modern law has contingently drifted from its theological origins As a result the legal system and the ideal of individual and communal relationship it envisages is characterised by antagonism and alienation or more broadly violence The book contends that the way to restore a legal community of peace is to return to a Christian theology which is informed by Trinitarian thinking or the notion of unity in diversity and reunites faith with reason Returning reason to its ground in being allows peaceful persuasion by the revelation of God s perfect being through the Trinity and Incarnation which models and enables the peaceful coexistence of difference through self sacrificing love This in turn produces the law of love to love your neighbour as yourself Since love does no wrong to a neighbour a legal community operating by the law of love can fulfil the obligations of law by going beyond merely what is required by law and love individuals as part of a community
